CATALOG 9R-3

Electronic Rack Packaging Color Chart

PAINTS

Please specify the finish you require on parts and accessories by adding these 3-digit suffixes to catalogue numbers eg. a textured Gulf Blue side panel is ordered as RSSB 00 021 17 GF1. Customer colors are available on special factory order.

Note: — 1 designates Textured finish
— 2 designates Smooth Semi Gloss finish
— 3 designates Satin finish on basic rack only

— 4 designates *Laminate finish which is used on woodcore desktops, rack tops and writing surfaces only

LAMINATES

These are Arborite® high pressure laminates type GP. Not available as a substitute for painted surfaces.

These are printed reproductions of actual paint colors and therefore should be used as a color guide only.

Items in this catalog in most cases are fully modular. Each piece of a system must be ordered separately, eg. rack, side panels, door & accessories all require separate part numbers. The explanation (below) of the part number systems used in this catalog will help you match your choice of accessories.

To further simplify ordering, we have available an ordering guide insert which matches accessories to specific system racks and desks. We suggest you use the insert as a work sheet when ordering items from this catalog. Additional ordering guides are available from distributors, sales reps, or our office.

Part number explanation

The following examples explain how the part numbers were derived. This explanation will help you to define products for ordering.

Type of item	Significant Dimensions (in)			Finish
REFK	19	035	17	BK1
Knockdown Frame Rack	Width	Panel Height	Depth	Color Texture

When ordering accessories for this series correct sizing can be checked by matching width, height or depth numbers to the specific rack you are ordering. For example a correct door for the rack in the example above, would be RSDC 19 035 (Choice of color)

SHIPPING WEIGHTS

Shipping weights for the majority of products in this catalog are provided on the Electronic Rack Packaging Price List.

IMPORTANT NOTE PANEL OR U HEIGHT

Rack panel or u height is an industry wide reference dimension used for ordering racks and accessories. It refers to the height of the space (IU = 1.75") that can be filled by panels **not** the overall height. **Overall height can be 6 or 7 inches greater than panel height.** Please refer to dimension tables if you require overall height for calculation of space requirements.

WARRANTY

We warrant Hammond products to be free from defects in workmanship or material, and will, without charge, replace or repair within one year from date of shipment from our factory and products that may be found defective upon inspection at our factory. This warranty does not obligate us where products have been subjected to careless handling, improper application or faulty installation, and we expressly disclaim any obligation, warranty or liability whatsoever except as above stated.

Hammond Products are continually being revised and improved, to use the best materials available. For this reason, Hammond Manufacturing Company Limited reserves the right to modify existing electrical or mechanical characteristics of any catalog item without notice.

RSFS System racks

Rack accessories

RSFS Frame

Typical ganged RSFS racks
with optional doors and
I.D. Cowling

Typical REFK with optional door

RSFS System Racks combine design excellence with contemporary styling to provide distinctive packaging for your products at affordable costs. This system is designed for single or multiple cabinet assemblies. Interlocking ribs provide a mere 1.0" space loss on side ganged cabinets. Conformation to EIA spacing on overall cabinet height allows for front to back ganging. Side panels and doors, (ordered separately) are removable from the outside and provide easy access for equipment installation, repair and maintenance. The doors, trim and panels conceal the frame when assembly is complete. Four

adjustable panel rails and a large range of accessories provide versatile options for mounting equipment.

RSFS 19" panel racks are available in 10 heights each in three depths.

RAPID RACK

Certain RSFS cabinets are available from stock completely assembled with door, top, side panel rails and trim. These are available in two popular colors, Grey and Gulf Blue. See Hammond Rapid Rack Catalog.

FLOOR PLATES

These optional plates are available to enclose the bottom of RSFS racks. Finished in BK3.

Depth of Rack	Part Number

¹Specify overall depth in blanks

17 = 17.5" deep, 24 = 24.5" deep or 31 = 31.5" deep

²Levelling feet add at least 1" to height

FINISH

Racks are finished in textured, black, baked enamel.

PARTS LIST

- 1 RACK FRAME
- 4 panel/accessory rails
- 1/4 - 20 nuts and bolts
- 10 - 32 clip nuts (qty. see table)
- 4 levelling feet (attached)

MATERIAL

Frame - 16 gauge CRS

Rails - 14 gauge CRS

ECONOMY RACK

A knock-down cabinet that couldn't be simpler to assemble —only one bolt in each corner locks the cabinet sides to the top and bottom. The strength comes from the interlocking structure.

The economy racks are designed to be used as single, freestanding units and are not used with system ganging kits.

The four combination panel-accessory rails are fully adjustable. Because more than 2 rail supports are used on cabinets over 42.0" high,

partial height rails can be installed.

Four adjustable levelling glides are standard on all models.

The Economy Rack is designed to accept the same doors as the System Rack. (Doors are on Page 13 of this catalog.) Flush doors will fit on either front or rear of the cabinet. Clear swing doors fit on one side only to permit the opposite side to remain unpunched for use as the cabinet front, without a door, thus eliminating the need for decorative cowling covers.

Bottom top and sides are integral part of rack

Panels 19"
see page 10.

Cooling accessories and panels
see pages 31, 32.

Extra panel and accessory rails
(rack comes with 4 rails)
see pages 33, 34, 35.

Rack desks
see page 9.

Doors
See pages 34, 13 & 14.

Trim Kit
see pages 7.
also see pg. 16 for example.

REFK Economy racks

To provide an attractive cowling appearance when using Flush Doors the top and bottom cowling on one side of the REFK is **not** punched. Only plain or louvred Flush Doors (see pp 13) may be used on this side.

The top and bottom cowling on the opposite side of the REFK is punched to accept hardware for clear swing doors (see pp 13). This side will also accept Flush Doors, but punching will be visible.

- PARTS LIST** ... 1 knock-down frame, 4 panel/ accessory rails with 1/4-20 bolts and nuts. 4 levelling feet and 1 pkg. of clip nuts
- MATERIAL** 16 gauge CR steel rack
14 gauge CR steel rails

DRESS TRIM KIT

This is an attractive, brushed aluminum extruded trim kit which attaches to the cabinet face by means of concealed screws. Comes in kit form for field assembly. See photo pp. 16.

²Specify 3 digit color code from color chart inside front cover

³Levelling feet add at least 1" to overall height

GANGING KITS

Straight line ganging of System Racks requires a ganging kit of the appropriate height. Order by nominal Rack Panel Height. Although conventional 1/4 - 20 x 1.5" bolts can be used for joining, the ganging kit, which is installed from the outside of the cabinet, eliminates the need to leave interior access space. The kit also includes a front and rear extrusion which gives a custom appearance to the assembly

Specify rear panel finish with a 3 digit suffix from the color chart

Order by Rack Panel Height.

RSFS REFK Rack mounted desks

Rack mounted desks are ideal for any rack applications where a writing surface or a keyboard or instrument mounting surface is required. These desks are available for single or multiple rack applications.

These desks mount against the rack frame and extend 1.7" into the panel space. This allows you to recess the panels without leaving a gap.

The single straight desk is suitable for mounting on system racks or on the Economy Rack. All other desks are for System Racks only.

FINISH Sand, Semigloss laminate

PARTS LIST 1 desk surface, 2 support channels (per cabinet) plus mounting hardware, fillers for panel rail gaps (if rails are recessed).

MATERIAL ... Wood and high pressure laminate. 14 gauge support channels.

B2

RAISED STEEL TOPS - for 19" racks

These tops are used when an attractive solid top is required OR when top ventilation is required without the risk of dust, liquid or falling objects entering the cabinet. Tops may be completely removed from the outside. Slots and tabs at the back and friction catches at the front hold it in place.

By adjusting the top to the upper position, a 0.5" gap allows warm air to flow out on all 4 sides.

Combinations of our 3 top styles will provide attractive closure for any system design.

FINISH Black satin inner ring, top is your choice from the chart.

PARTS LIST 1 inner frame per cabinet, one top, gasketing, catches.

MATERIAL ... 12 gauge CRS frame,
14 gauge CRS top.

DIMENSIONS Overall Width, see table (for 19" racks only)

Overall Depth =
18.7, 25.7 or 32.7"
Overall Height = 1.2"
when down, or 1.7"
when raised for
ventilation.

Specify depth in the blanks

19 for 17.5" deep racks 33 for 31.5" deep racks	26 for 24.5" deep racks
--	--------------------------------

COMPLETE UNIT TOPS

RSTS tops come in single, double and triple cabinet units. They are used as a one piece top for 1, 2 or 3 cabinets, ganged in a straight line.

Top View.

CONTINUOUS TOPS

RSTG tops come in single, double and triple units, but are 5/8" narrower than cabinet width (adjustable to left or right) to allow them to be butted with other RSTG tops to cover 4, 5 or 6 cabinets ganged in a straight line, or to be used with RSFW wedge kit tops.

INTERSPACE TOP

RSTM tops come in single cabinet units only. They are 1¼" narrower than full cabinet width to allow them to be used between any two RSFW wedge kit tops. They may also be used between any two RSTG continuous tops.

Plexidoor

Louvred door

Clearswing door

Flush door

Louvred Door

Fits either side of RSFS or REFK racks. These doors fill the panel space and close flush with the cabinet frame. When open, the space between the panel rails is completely accessible.

Note: These doors should be used on the non-punched side of REFK racks for best appearance.

Doors are right hand opening only (excluding plexidoor).

COMMON FEATURES

- 2 point keyed locking.
- Instant removal by spring loaded hinge pins.
- Recessed handles with nameplate strips.
- Reversible for left or right hinging (by inverting the door).
- **Magnetic catch on clear swing door.**
- **Roller catch on flush or louvred door.**

FLUSH DOOR

Fits either side of System and Economy Racks.

These doors fill the panel space and close flush with the cabinet frame. When open, the space between the panel rails is completely accessible.

CLEAR SWING DOOR

Fits either side of System Racks and one side of Economy Racks.

These doors cover the top and bottom cowlings and sit in front of the frame when closed. When open, the entire panel space, including panel rails is accessible.

Plexi Door

Fits either side of RSFS racks and one side only of REFK rack. These doors cover top and bottom cowlings and sit in front of the frame when door is closed. Comes complete with top and bottom trim rails. Smoke plexi only.

5.25	3	PHPF 19 005
8.75	5	PHPF 19 008
12.25	7	PHPF 19 012

Specify finish with a 3 digit suffix from the color chart

ID COWLING

When clear-swing doors are **not** used, the cowling can be covered with an identification strip which matches the corner and ganging trims. When 2 or 3 System Racks are ganged, a single width strip gives a custom appearance to the assembly.

Each cowling comes with a steel sign panel and a protective plastic panel.

FINISH Black semigloss plastic, painted metal insert

PARTS LIST 1 ID strip,
1 piece of plexi,
1 metal panel

PLAIN COWLING COVER

A slip-on cover for System Rack cowlings that may be color co-ordinated to match frames, panels, etc.

Because the top cowling extends slightly into the top opening of the rack, it reduces the opening by 1.75" front and rear.

For an improved top appearance, use a cowling on front and rear with a formed panel between.

FINISH Choose from the color chart

PARTS LIST 1 cowling cover

Height = 3.7" with castors
Depth — adds 2.2" to cabinet (plus castors)

Cat. No. RSAS 16 BK3

1564 racks with optional wedge
units, desk and panels.

1469 with optional plexi door.

REFK with optional door, trim kit
and castors

The 1469 rack is a modular 19" enclosure made for situations where heavier equipment is to be mounted in an attractive package. This rack is extremely sturdy when used as a single unit and even more sturdy when ganged.

Four combination rails are included which are compatible with all the universal 19" mounting accessories found in this catalog. While doors, side panels and ganging kits are not interchangeable with System Racks, a wide choice of available finish options can be found on the following pages.

1469 racks are available in all standard colors found on Color chart

Two .50 - .75" conduit knockouts are provided in the bottom rear flange. A 9.5 x 9.5" conduit cutout is provided in the bottom complete with bolted cover plate.

A set of wiring clips are installed in each rack. A & B series have 2 each front and rear, C, E and F series have 4 each, front and rear.

RAPID RACK

Certain 1469 series cabinets are available from stock, completely assembled with door, side panel and accessory rails. These are available in 2 popular colors ASA 61 grey and Gulf Blue. See Hammond Rapid Rack brochure.

1564 Sloped Console frames

1564 Series racks provide an attractive, durable enclosure for control centre installations, or for protection of electronic, hydraulic, pneumatic, or electric equipment. 20° slope provides optimum viewing angle for control or instrument panel. Integral CRT mounting angles and optional desk panel provide versatility for many applications.

Two panel surfaces, each with EIA standard spaced mounting holes will accept all 19" or 24" panels listed in this catalog.

Ganging kits and wedge units are available as standard options.

1564 racks are finished in textured black enamel. Side panels and front surface panels are available in all standard colors

**Data Terminal Workstation
System desks
Desk accessories**

Hammond data terminal desks are ideal for the fast changing needs of modern computer room, communications, testing and word-processing centers. All units are fully modular and can be arranged in varying combinations to allow optimum use of work space.

Cantilevered leg design and cherrywood 'comfort-edge' desk top ensure operator comfort and efficiency.

Hardware mounting and storage is facilitated by the availability of several storage options: left-hand, right-hand and double pedestal desks provide built-in storage; roll-under or roll-beside cabinets provide convenient, moveable storage; and optional bookcase and floppy-disc cradle add more variety to the storage options.

Roll under/Roll beside cabinets

Roll under cabinet has metal top and is designed to roll under a DTOF desk. Comes with casters, vented back door and accessory rails. Black frame with removable sand colored side panels.

Roll beside cabinet has wood-laminate top and comfort-edge to match desk tops. Can be butted against standard desk for additional work surface or used on its own as a satellite storage unit. Comes with casters, accessory rails, vented back door, black frame with sand colored side panels.

Both cabinets will accept a wide range of optional drawers, chassis, slides or doors for a variety of equipment mounting or storage needs.

See Accessory pages 28 to 35.

Data terminal open frame desk

Features cantilevered leg design and comfort-edge, wood-laminate desk top. Comes in 22" (558 mm), 42" (1067 mm) or 62" (1575 mm) desk widths. All desks are 31.5" (800 mm) deep. Comes with legs, leveling feet, modesty panels and comfort-edged top. Black and Sand only.

For complete details on these products, request Hammond Data Terminal Workstation Catalog 9DT-3.

DTSC with
optional arms

Desktop Accessories

A complete range of desktop liberators are available as options to the system. Please see our 9DT-3 Catalog for complete details.

The lamp is different from other light sources. It is designed so that the shade is always horizontal in every position. The combination of a newly developed light source with a high gloss anodized asymmetric reflector guarantees an outstanding, shadow free illumination. While the lamp provides illumination equivalent to a 75W light, it draws only 13.7W and the high tech design is an elegant final touch to your workstation.

Telephone carrier can be rotated 360° and guarantees a secure base when dialing. Letter Trays are easily installed and will rotate 360°. Available in 2 or 3 tray models. Replacement trays are available.

Plexi Doors

These attractive, black smoked plexi doors add a fine finishing touch to pedestal desks, roll under or roll beside cabinets. Door frames are black extruded aluminum and have locking latch.

DTPD 22	Complete door and hardware

System desks and Accessories

EQUIPMENT MOUNTING OPTIONS

Cradles are 19" rack mounting boxes suspended under desk tops. Each has permanent recessed panel rails, and accessory rails welded in place to accept all standard Hammond drawer slides. The open top and rear allow access when used with other desk accessories. Equipment cradles are available in 3' heights and 3' depths. The sides are spaced down approx. 3/4" to allow warm air to escape from equipment.

Wood and high pressure laminate tops — The extra strength 1-1/4" thick top can be easily cut to insert equipment.

Rear channels

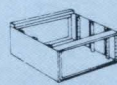

removable back panel covers a 5" deep x 17.5" high compartment which may be expanded by moving the inner panel forward.

The inner panel may also be mounted on the front legs to create a box the size of the desk.

(Limited availability)

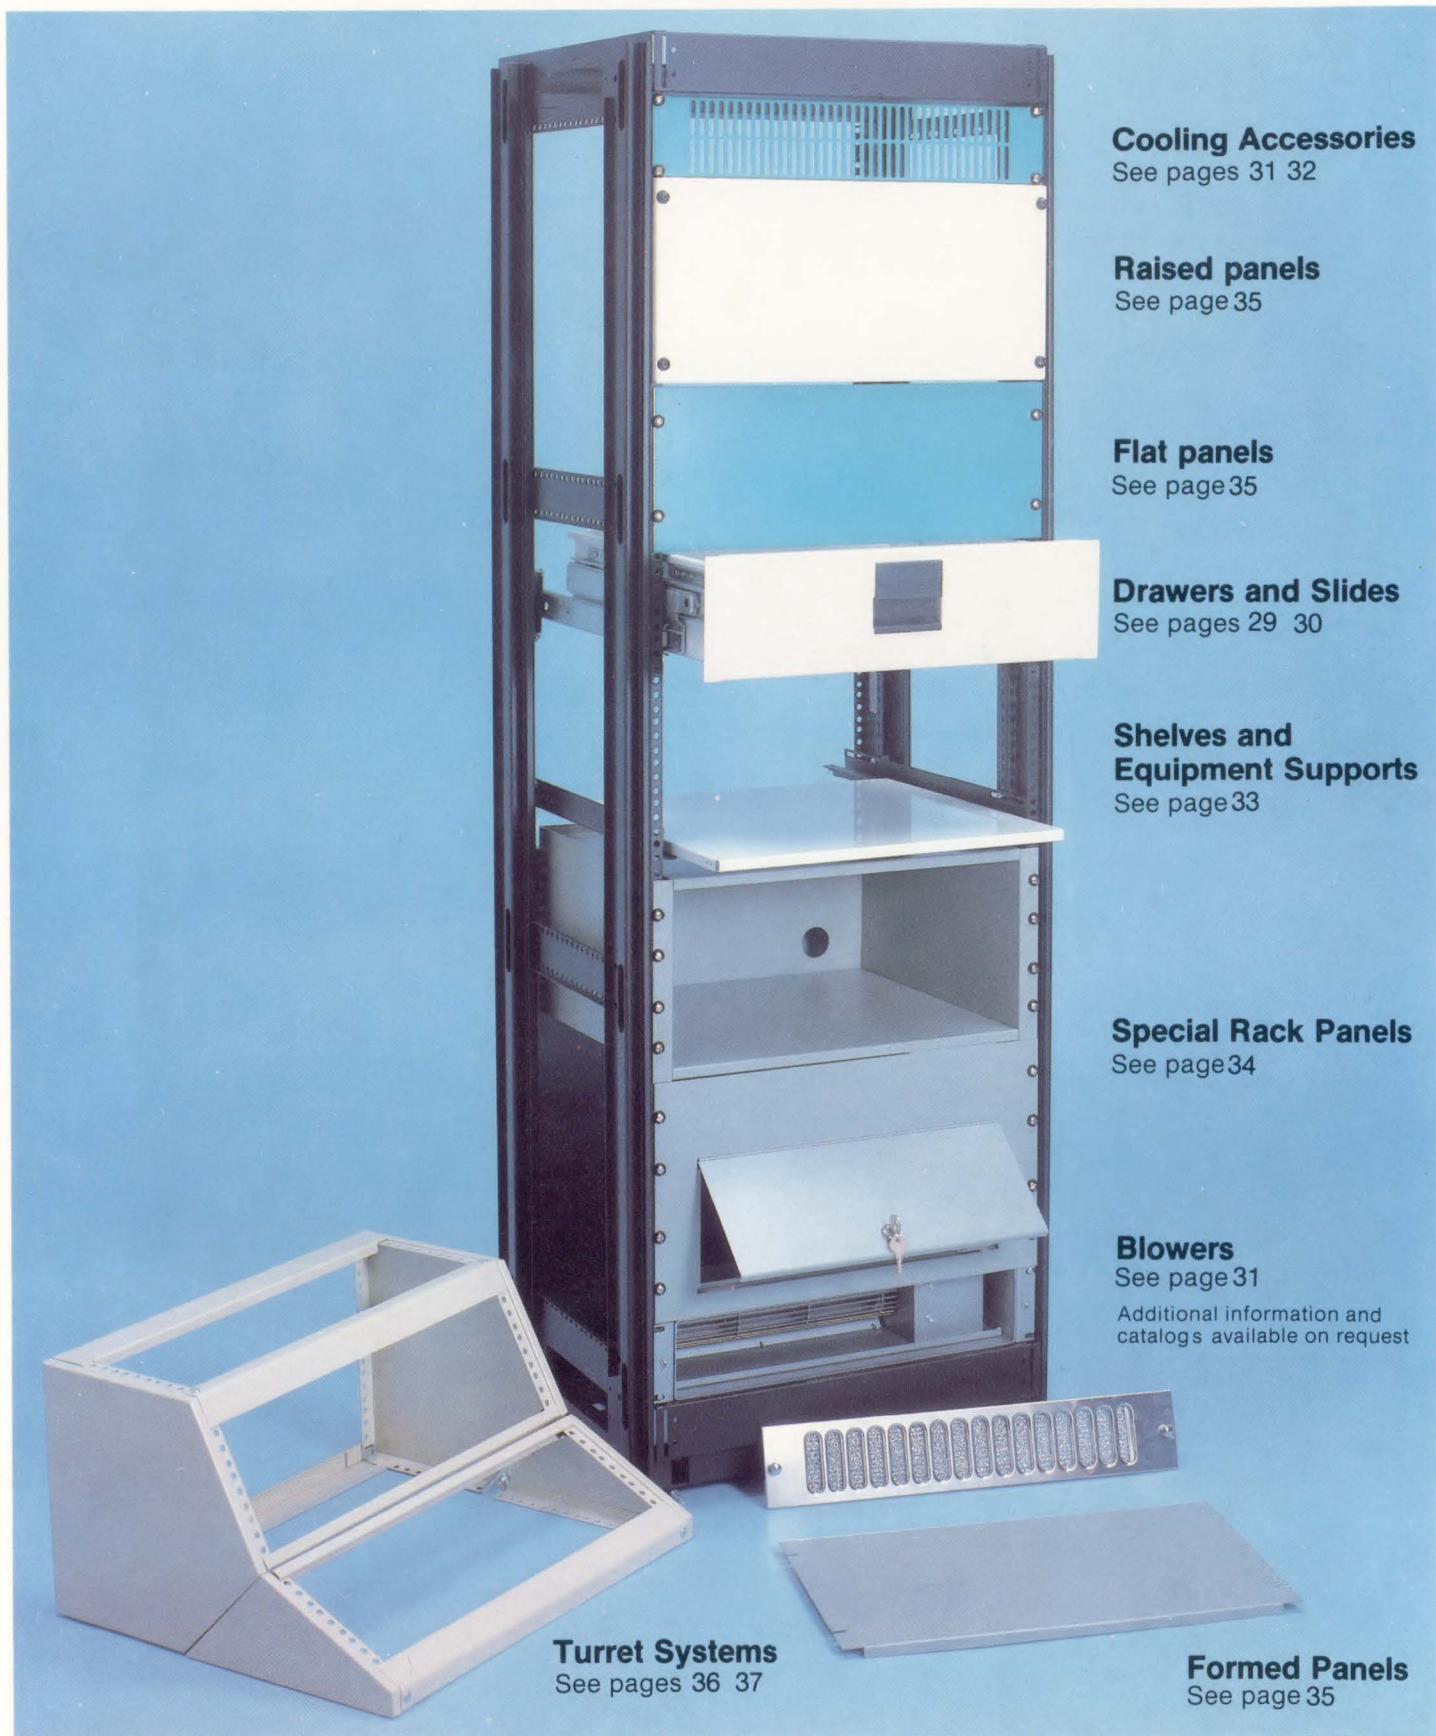

We are continuing to offer our modular "chroma" desk with limited availability. These desks will not be stocked, but will be available on 10-12 week delivery.

Ordering Guide.

This guide is designed to help users of this catalog, locate the parts required for each of our enclosure systems. It will also help the user avoid missing any necessary options that may be required.

To Use.

- 1) Locate the Rack or Data Terminal System in the left hand column under the heading Basic Component.
- 2) By following the shaded area to the right of the Basic Component, the Guide will lead you to all the major components and accessories you may require for the system. Catalog page numbers are provided to locate the part numbers in the catalog. Write the required components in the space provided below each component identification in the guide.

PRINTED IN CANADA

Storage drawers

Storage drawers have gloss white interiors and interchangeable faces which may be painted your choice of colors.

Black handles match Hammond door handles and may be installed at the top or, by inverting the face, at the bottom.

Faces to match flat or raised panels are available.

SLIDE MOUNTING

Storage drawers come with smooth full-travel, ball bearing slides with a quick release drawer removal feature.

Slides mount on the accessory rails in such a way both front and rear, as to leave the panel rail completely free for mounting of other equipment or securing the drawer (as an alternate to the lock kit). Extra slides are detailed on page 44.

Panel Height u	in	Drawer Body	Flat Drawer Face	Raised Drawer Face

¹ Specify depth in the blank spaces
12 = 11.3" inside
16 = 15.3" inside
22 = 21.3" inside

² Specify finish with a 3 digit suffix from the color chart (or see page 1). Applies to face only.

For 24" width drawers, substitute 24 in place of 19 in Cat. No.'s.

Panel not included

Locking Kits — a one point (behind the panel rail) lock rod. All hardware, including a replacement handle prepunched for lock is supplied.

Handle must be installed at the top when using locks.

Drawer not included

Hanging File Kit — for models RDDS 19 012 16 WH2 and RDDS 19 012 22 WH2 only. Rods clip into holes provided — 16" drawers take letter size, 22" drawers take letter or legal size files.

Drawer not included

Lift-Up Writing Surface or Dust Cover — hinged approximately 1.5" from the rear of the drawer to allow opening beyond 90°. High pressure laminate matches sand (SD4) desk tops.

UNITRACK CARD GUIDES and EXTRUSIONS

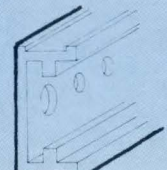

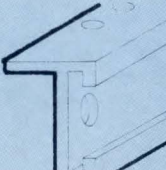

Extrusions fit across the width of the chassis (see drawing) and can be turned to accept cards in any plane.

Guides snap into pre-drilled holes in the extrusions at 0.5" centres. The connector rails will accept most card edge connectors at 0.5" centres.

Blowers used in rack cabinets should be placed at the bottom to take advantage of convection currents.

Intake blowers have an advantage over exhaust in cooling efficiency and practicality. By pressurizing the cabinet with filtered air, dust is kept out and the greater turbulence created aids in the transfer of heat to the air.

Note: Additional blowers are detailed in our blower catalog. Available from factory or Hammond Sales Offices.

FEATURES

- Centrifugal blower wheels
- 3 wire line cord (without plug)
- Filter removable from the front
- Permanent washable filter
- Upward discharge at rear of unit except on sidewinders.

FINISH Blower assembly is grey, front panel is stainless steel.

PARTS LIST 1 blower assembly with filter, front panel and line cord

MATERIAL ... Stainless steel front panel, aluminum mesh filter

DIMENSIONS see table
ELECTRICAL 115 V AC, 50/60 Hz

FILTER COAT

Provides a filter adhesive with a grease-like consistency which absorbs and traps dust particles.

1475Q 1 pint spray can

QUANTITY OF AIR REQUIRED TO CARRY AWAY HEAT:

You must know the amount of dissipated heat to be removed and the temperature rise desired for the air. The equation relating the variables is $Q = MC_p (\Delta t)$, or the heat removed equals the weight of the air times the specific heat of the air times the temperature rise. If this equation is applied to air at room conditions on a rate basis, it reduces to:

$$\text{cfm} = \frac{\text{Btu/hr}}{1.95 (\Delta t_c)} = \frac{1760 \text{ kw}}{(\Delta t_c)}$$

for the cubic feet of air required per minute when the heat to be removed is known in Btu/hr or kilowatts and when the permitted average air temperature rise is known in Celcius degrees. In order

Front panels available in stainless steel only.

BAFFLED PANELS

- Rear sloping aluminum baffle for directing air flow has a bright natural finish on bottom for reflecting heat and dull black on top for absorbing heat.
- Extends approx. 14" behind panel rails.

Panel in	Height u	Cat. No.
1.75	1	PVBB 19 001
3.5	2	PVBB 19 003

Specify finish with a 3 digit suffix from the color chart

BAFFLES

- Fastens to accessory rails behind any standard panels to direct air flow towards the panel and protect components above from excessive heat.
- Has a bright natural aluminum finish on bottom for reflecting heat and dull black on top for absorbing heat.

Cat. No. PVBS 19 BK3

Extends approx. 14" behind panel rails.

Shelves and equipment supports

EQUIPMENT SHELF

A closed utility shelf with cord access holes 1.5" dia. in each bottom corner.

MATERIAL CR steel
18 ga. top and bottom
14 ga. sides

DIMENSIONS . . (Inside)
17.2" wide
15.0" deep
Height is 1.0" less than panel space.

PULL-OUT CHASSIS/SHELF

Use as a permanently mounted support shelf between accessory rails or as a pull-out chassis. Will also accept 1.75" H slides on page 44

MATERIAL . . . CR steel, 18 ga. shelf, 14 ga. brackets

DIMENSIONS (shelf) 16.8" wide x .5" high. See table for depth

The supports are slotted to allow 1.75" adjustment in accessory rail position. Four holes in the shelf accept 10—32 bolts (supplied) or thumb screws (see page 43) for easy removal.

Cat. No.	Shelf Depth	Bracket Depth
RASC 1912 WH2	11.9	13.25
RASC 1916 WH2	15.9	17.25
RASC 1922 WH2	21.9	23.25

NOTE: RASC 1916 WH2 will not fit 17.500 deep rack unless mounted on RASS Drawer Slides.

ADJUSTABLE SUPPORT ANGLES

Mount on accessory rails with either leg of angle used as support, depending upon requirements. Slots allow up-down or front back adjustments.

MATERIAL . . . 14 ga. CRS

DIMENSIONS 1.75" x 1.75"

Cat. No.	Length
RASA 12 WH2	9.97
RASA 16 WH2	16.28
RASA 22 WH2	22.28

ADJUSTABLE SUPPORT BAR

Fastens between accessory rails. Brackets can be located at 6 different heights within a 1.75" panel space.

MATERIAL . . . 16 ga. CRS

DIMENSIONS (channel) 1.1" x 0.5" x 17.8"

Cat. No. RASB 19 WH2

The cross channel can be fastened to the brackets or to your equipment (then it also maintains a front-to-back position).

EXTRA MOUNTING RAILS

The combination rail is identical to those supplied with system or economy racks. All rails have full EIA panel mounting (.281" DIA) for 1/4—20 bolts or 10—32 clip nuts. Each rail is adjustable in a 1.0 x .281" slot.

MATERIAL . . . 14 ga. CR steel

Blank rack panels

FLAT STEEL OR ALUMINUM

Economical panels made from high quality cold rolled steel or aluminum.

FORMED STEEL

A .50" fold top and bottom adds strength without increasing the panel thickness.

RAISED STEEL

A .625" fold on four sides provides added strength so that only 4 mounting holes are required.

WIDTH ADAPTOR

THICKNESS ADAPTOR

*23" to 24" adaptors in these heights only Substitute 23 for 19 in the cat. no. Specify finish with a 3 digit suffix from the color chart.

DESCRIPTION

Turrets are used with rack cabinets or desks to create inclined panel surfaces. Each turret has a 45° angle side which can be connected to any other turret to complete a console arrangement.

These wedge shaped sections are assembled from formed sides and cross bars to make 19" rack mounting turrets. Four basic angled sections are available, each in 3 box depths (an optional extension creates 3 additional depths).

All sides (except the ganging side) use standard 19" panels, either formed or flat — see page 35

PLANNING YOUR ARRANGEMENTS

Each turret can be arranged so that any side is "up". To calculate space required use the nominal sizes for the mounting side given in the table.

The extension box can be mounted onto the long side of any of the other wedges to create depths not available as one piece.

To ensure a useful arrangement, refer to the Human Factors data on page 57 .

- FINISH** Choose from the color chart
- PARTS LIST** 2 sides, all cross bars and necessary hardware plus ganging spacers
- MATERIAL** ... 18 ga. CR steel sides, CR steel cross bars (except models noted in table which have a .125" alum panel/bar combination)

ORDERING

We have diagrammed some typical arrangements possible on desk and cabinet tops as well as rack cabinet faces. Some assemblies are suitable for standing operators and others for seated operators. Mounting heights may be adjusted accordingly.

We have selected one profile in each illustration to draw with a heavy line. This is only an example of one assembly that may be derived from the drawing. Note that raised panels have been used on the cabinet faces to fill the spaces between separated turrets.

Typical Turret Uses

MOUNTING THE TURRETS

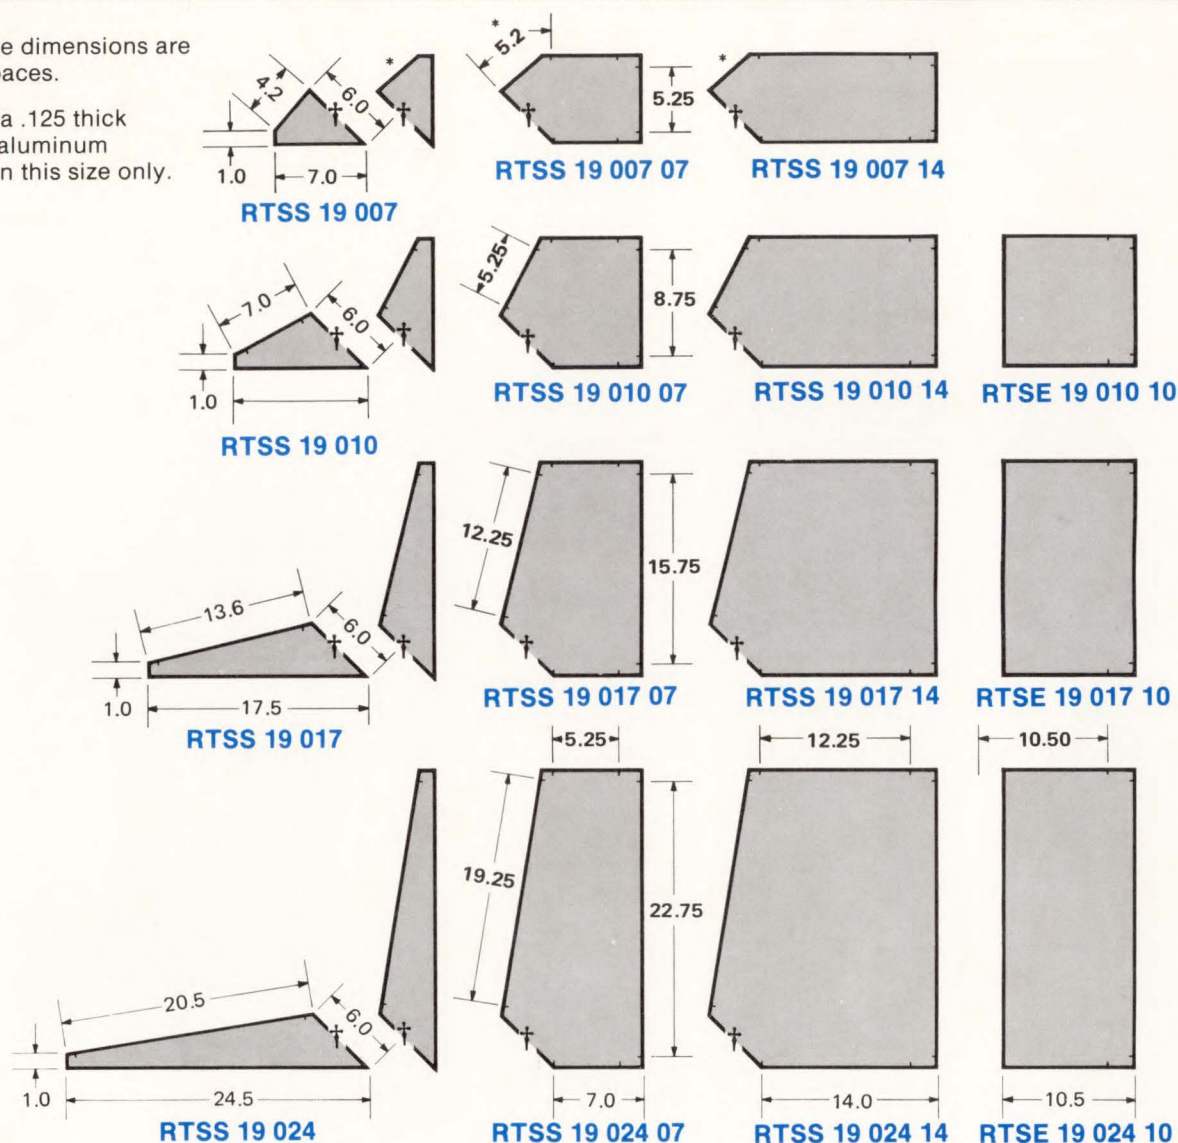

The overall width is 20.0", which allows side-by-side arrangements on desk tops and ganged system racks.

For assembly, panel rails must be fully forward, flush with the cabinet face. If flat or formed panels are to be used on the same rack, you may want to cut and recess the rails for them.

Ordering: L & R units come in pairs with necessary cross bars and hardware.

Bold face dimensions are panel spaces.

*This is a .125 thick formed aluminum panel, on this size only.

† A special panel for this surface is available when not used for ganging Cat. No. RTSP 19. Specify finish with a 3 digit suffix from the color chart.

Rack cases

This new addition to the Hammond family of quality enclosures brings an added dimension to rack and desktop cabinets. We have developed two rugged, all aluminum case styles to suit the needs of today's smaller, lighter electronic designs. Designers will find these attractive new cases ideally suited for prototyping or use in O.E.M. instrumentation, metering, monitoring, communications and other applications.

DESKTOP CASES

This Desktop case is styled for portable, desktop equipment. These units feature extra sturdy, side mounted diecast carry handles and diecast mounting feet with flip-down front feet that allow user to tilt the case to the optimum viewing angle. The case will stack for multiple instrument functions. Stocked in GF1 or SD1 Available in all standard colors on special order.

RACK MOUNT

The Rack mounting case is styled for mounting in standard 19" EIA hole spaced racks. Comes with panels.

These cases have sturdy extruded front-mounting carry handles and come in sized to fit standard U panel spaces. Stocked in GF1 and SD1 available in all standard colors.

COLORS

Both ACDT and ACRM styles come in a choice of two color combinations:

Specify SD1 for: Black textured frame, Sand semi-gloss front and rear panels, Sand textured body panels.*

Specify GF1 for: Black textured frame, Black semi-gloss front and rear panels, Gulf blue textured body panels.*

*Note: Rack mount units have ventilated body panels, Desktop units have solid body panels.

Cases come completely assembled.

WMAC

OPEN WALL OR TABLE RACKS

- Economical open modular rack for 19" panels, suitable for wall or table mounting.
- Three .5-.75" conduit knock-outs top and bottom rear for cable entrance.
- Rear has key holes for ease of wall mounting.
- Open top, bottom, sides and rear for equipment access.
- All welded 16 gauge formed steel, finished in standard ASA 61 baked grey enamel.
- Sold with top and bottom cover panels installed.
- Four screw-on rubber feet for table mounting when required.
- Cabinet comes pre-drilled for flat side panels, available in pairs as an option.

1465

1466 — 1476 SERIES

Common Features

- A heavy duty rack in 2 types, both with 4" x 6" x .37" welded angle iron bases. With mounting holes .75" dia.
- Standard finish is ASA 61 grey baked enamel.
- Mounting rails drilled and tapped 10-32 to EIA .5 - 1.25 spacings.

1466 Series

- Formed from 10 ga. CR steel into channels 3.0" x 1.4".
- For 19" panels.

1466 C Series

- Constructed from rolled channel iron, 4.1 lb./ft.
- Channel is 3.0" x 1.4".
- For 19" panels.

1476 Series

- Formed from 10 ga. CR steel into channels 3.0" x 1.4".
- For 23" panels (telephone standard).

NEW DESIGN

These new Hammond power bars feature an attractive, extruded, brushed aluminum case with matte black receptacle housing. Screw tabs are provided if permanent mounting on work surface is required. Choose from 4', 6' or 8' receptacle models; with 6' or 15' cords; with or without lighted ON-OFF switch. Extra long 4' and 6' powerbars with 8 receptacles are also available.

Series H power bars feature lighted, rocker-type ON-OFF switch for master power shut-off. Series T power bars have no switch.

CSA approved Hammond Power bars have 15 A 125 V resettable circuit breakers to prevent accidental line overload.

Also see our British style power bars below.

EQUIPMENT SLIDE ASSEMBLY DRAWINGS

ASSEMBLY INSTRUCTIONS

1. If mounting slides on rack or economy rack accessory rails, adjust rails to suit mounting centres as shown in Dim. D.

If mounting slides in drawer cradle or RCHS rack with fixed accessory rails, you will find the rails are already spaced correctly.

2. Position mounting plate so that both top and bottom holes in the plate line up with the E.I.A. spaced holes in accessory rail. See Fig. C. If this does not occur, it may be necessary to move up or down one hole space.

3. Use #10-32 clipnut and machine screw to secure plates to accessory rails.

Note:

If drawer or chassis must be mounted at extreme bottom of RSFS or RCHS, mounting plate will have to be sheared to provide clearance for rack cowling only on 3.5 and 5.25 in. deep drawers and card chassis.

4. Use #8-32 screws, hexnuts and lock washers to attach mounting fixture to drawer (or chassis).

RASS 05 001 Series
(See Fig. A)

Assemble drawer or chassis to slide by pushing rear of Mounting Fixture over Front Roller. (Fig. A, i). Glide Locking Lug over Rubber Stop (Fig. A, ii) and push Mounting Fixture over Central roller and continue towards rear of slide. (Fig. A, iii).

Cat. No.	Slide Length	Mtg. Centre Dim. D
RASS 05 001 12	12"	6.96"
RASS 05 001 16	16"	13.28"
RASS 05 001 22	22"	19.28"

RASS 05 003 Series (See Fig. B)

Assemble drawer or chassis to slide by fitting rear of Mounting Fixture slot under clip located on top of slide (fig. i) then pushing front of drawer down so that catch (z) locks into front of Mounting Fixture slot (y) (fig. i).

Cat. No.	Slide Length	Mtg. Centre Dim. D
RASS 05 003 12	12"	6.96"
RASS 05 003 16	16"	13.28"
RASS 05 003 22	22"	19.28"

STANDARD DRAWER FACE ASSEMBLY DRAWINGS

STANDARD DRAWER

1. Locate drawer face as in drawing below so that mounting angles (M) at rear of face fit inside pan at front of drawer body.
2. Secure drawer face with the four self tapping screws (C) through holes provided at drawer front side.
3. Tolerance has been provided to allow some vertical adjustment of drawer face for fitting multiple drawer units.

No. Qty. Description

A	1	Drawer Face
B	1	Handle
C	4	Screws
M	2	Mounting Angles

ASSEMBLY INSTRUCTIONS

1. If installing on existing drawer, remove drawer face and knock out non locking handle.
2. Push in black plastic handle with lock hole in upper position as shown.
3. Remove lock nut (B) and disassemble locking bar (D).
4. With key (F) vertical/teeth down insert lock through handle hole and fix with spring clip (C).
5. Slide locking bar through bracket (E) and position lock rod cam in the locked position as shown.
6. Fasten with washer and lock nut (B).
7. For 5.25" and 7" drawers, bend leading edge of slide mounting fixture E back 90° to clear lock rod.

DRAWER LOCKING KIT ASSEMBLY DRAWINGS

PARTS LIST

No. Qty. Description

A	1	Black Plastic Handle
B	1	Lock Nut
C	1	Spring Clip
D	1	Locking Bar
F	2	Keys
E		Slide Mounting Fixture

REFK CABINET ASSEMBLY DRAWINGS

PARTS LIST

Item	Qty.	Description
1	1	Top
2	1	Bottom
3	2	Sides
4	4	levelling feet
5*	12, 16,	R.H. mach. screws
	20	1/4 - 20 x 1/2
6*	12, 16,	1/4 - 20 keps nuts
	20	
7*	50,80	#10 - 32 clip nuts
8	8	1/4 nylon washers
9	8	1/4 - 20 truss HD screws

ASSEMBLY SEQUENCE

1. Insert levelling feet into base from underside.
2. Locate sides into base interlocking corners insuring cross rails are pointing upward.
3. Locate top onto sides.
4. Secure sides to top and bottom using 1/4 - 20 slotted truss head screws and nylon washers.

NOTE: If doors are to be assembled do not tighten sides to allow for adjustment.

5. Locate panel rails in desired locations on cross supports and secure using 1/4 - 20 round head screws and keep nuts supplied. Alternate method of mounting using clip nuts & 10-32 panel screws may be used if desired.

PLAIN COWLING ASSEMBLY DRAWINGS RACK MOUNTED DESKS ASSEMBLY DRAWINGS

PLAIN COWLING

The top cowlings whether for use with or without flush doors must be assembled prior to installation of panel rails.

Install cowling at an angle and rotate into position as shown in diagram.

Once in position secure using 10-32 screws and clip nuts thru holes provided in top edge of cowling. Clip nuts should be located before cowling is snapped into place.

NOTE: If raised steel top is to be used in conjunction with cowling do not secure cowling. This should be done when top mounting ring is secured.

Part	Qty.	Description
A	1	Cowling
B	2	10-32 Clipnuts
C	2	10-32 Panel Screws

BOTTOM PLAIN COWLING

Bottom cowlings for use with or without flush doors follow the same installation procedure. It is recommended that installation is done prior to mounting of cabinet rails.

Locate double sided adhesive strips supplied to inside of front face of cowling.

Slide cowling straight onto bottom frame of cabinet. Adhesive strips will hold in place and prevent vibration.

Part	Qty.	Description
A	1	Cowling
B	2	Double Sided Adhesive Strips

RACK MOUNTED DESKS ASSEMBLY

1. Locate position of desk desired and mount spacers part 4 to front and rear accessory rails ensuring that all holes line up. (If these holes do not line up with holes in accessory rail desk will not be properly centred in the panel space). Use 10-32 clip nuts and flat head counter-sunk screws for this part of assembly.
2. Mount part 2 mounting brackets to the spacers using the 1/4-20 R.H. screws in conjunction with the 1/4 flat and lock washers. **DO NOT TIGHTEN.**
3. Filler brackets are provided to fill gap existing between cantilevered top and the panel rails. These should be located at this time. Bolt into place on panel rail. Do not tighten too tight as after installation of top bracket will probably require tapping to sit flush!
4. With mounting brackets still loose now assemble top into place securing with 10-32 panel screws and lock washers thru brackets into tee-nuts provided in underside of desk.

5. Slide desk and brackets into place so that top fits snugly against cabinet corner extrusions and tighten all existing mounting screws.

Item Qty. Description

1	1	Laminate Desk Top
2	1 pr.	Mounting Brackets
3	2	Filler Brackets
4	4	Spacer
5	8	#10-32 Clipnuts
6		Flat Hd. Csk. Screws
7	8	#10-32 x 5/8
8	4	10-32 x 1/2 Panel Screws
9	4	#10 Lock Washers
10	4	1/4-20 x 3/8 R.H. Mach Scr.
11	4	1/4 Lock Washers
	4	1/4 Flat Washers

NOTE:

Quantities shown are for single width desk and will increase with double and triple widths.

STRAIGHT GANGING KIT ASSEMBLY DRAWINGS

ASSEMBLY SEQUENCE

1. Install panel rails to desired position prior to ganging.
2. Level the heights of the cabinets to be ganged together.
3. Bolt the frames together using 1/4-20 x 1 1/2 lg machine screws and nuts provided through holes in side of frames above equipment space at front and rear. (Do not tighten).
4. Cabinets may be bolted at bottom if necessary but caution should be taken to ensure bolts do not interfere with equipment mounting. (Again do not tighten)

5. Assemble extrusions front and rear so as to line up flush with tops of cabinets.

NOTE: If I.D. cowling is to be used for multiple widths, extrusion must be cut 2 5/8" short of top of cabinets.

6. Assemble spacer and spacer cover using 1/4-20 x 3/4 machine screws directly below ganging extrusion.
7. Tighten all clamps and ganging bolts.
8. Assemble filler strip between cabinets at top to cover gap as shown. (Snap off filler strip segments to obtain appropriate length).

PARTS LIST

Part Qty. Description

A	2	Plastic extrusion
B	2	Spacer
C	2	Spacer cover
D	2	R.H. Mach. Screw 1/4-20 x 1 1/2
E	2	R.H. Mach. Screw 1/4-20 x 3/4
F	2	Hex nut 1/4-20
G	2	Lock washer 1/4
H	1	Filler strip

CLEAR SWING DOOR ASSEMBLY DRAWINGS

ASSEMBLY INSTRUCTIONS

1. After selecting side on which door is to be hinged, install hinge brackets through vertical slot in cowlings and secure using 10-32 pan head screws as shown in diagram.
2. Install latch brackets in vertical slots on side opposite hinges in the same manner.
3. Locate bottom door hinge pin into bottom hinge bracket then snap top hinge into place.

4. Slight alignment of door may be required after installation. This can be accomplished by the loosening of the hinge brackets and re-tightening.

Item Qty. Description

A	1	Clear Swing Door
B	1 pr.	Hinge Brackets
C	1 pr.	Latch Brackets
D	8	#10-32x1/2 Pan. Head Machine Screws.

Note: Plexidoor has magnetic catch.

ASSEMBLY INSTRUCTIONS

1. Cabinet must be leveled prior to assembly of door.
2. Install the 3 nylon bushings in holes in the horizontal face of the top and bottom cowlings with 1 brass bushing in the bottom hole where door hinge is to be located.
3. Using the 4 self tapping screws supplied locate door stops on cowling in holes provided opposite hinge side top and bottom.
4. Apply small strips of gasket to door stops to act as cushion.
5. Locate door into bushings by means of the spring loaded hinge pins.
6. When using partial height doors, panel rails must be recessed to allow installation of the "RDSP" partial height door support.
7. Louvered flush doors to be hinged on right hand side only.

PARTS LIST

No.	Qty.	Description
A	1	Flush Door
B	2	Door Stops
C	3	Nylon Bushing
D	1	Bronze Bushing
E	4	Screws
F	2	Gasket Strips

FLUSH MOUNT DOOR

WEDGE FRAME ASSEMBLY DRAWINGS

ASSEMBLY SEQUENCE

1. Assemble corner verticals (A) to rear corners of cabinets to be hanged together flush with tops. Notch in corner vertical should go towards bottom. SECURE verticals by means of 10-32 panel screws through angle brackets as shown in sketch. Do not over tighten as this is only to prevent verticals from slipping.
2. Assemble cowlings in to above using long black 10-32 screws and clipnuts provided in line with wide frame section of cabinets. 3/8" diameter holes in cowlings should be facing down in top cawling and up in bottom cawling.
3. Assemble front joining members of wedge unit to cabinet front corner members but do not tighten top screw.
4. Install top panel, tighten top screw of front joining member to lock in front of panel. Assemble clamps as shown at rear of top panel with wing nuts to secure rear.
5. Mount rear panel using 10-32 screws and clip nuts provided.

PARTS LIST

Part	Qty.	Description
A	1 pr.	Corner verticals
B	2	Cowlings
C	1	Top panel
D	1	Rear panel
E	1	Front joining assembly
F	1	Hardware package

SIDE PANELS ASSEMBLY DRAWINGS

ASSEMBLY ON RACK SIDE PANELS

1. Attach plastic extrusions to corners of cabinet as shown in sketch A, ensuring each is flush to top of cabinet. Do not use a metal hammer for securing extrusions as this may cause damage. Plastic or rubber mallet is, if necessary recommended.
2. Locate hat shaped mounting bracket in long opening at bottom of side frame Fig. B (Locate the two small angle brackets at the holes immediately beside the long opening at top of side frame and secure with 10-32 screws and nuts provided. This will prevent side panel from sliding too low when installing.

3. Assemble side panels starting at top and working side edges into grip on extrusions, as shown in Fig. A.
4. Once side panel is located, it may be secured with nickel plated screws and nylon washers supplied through hole in sides.

PARTS LIST

Item	Qty.	Description
A	2	Side panels
B	2	Mounting Brackets
C	4	Small angle brackets
D	8	10-32 pan head screws
E	2	Nickel plated panel screws
F	2	Nylon washer
G	4	Plastic extrusions
H	4	Hex Nuts 10-32

ASSEMBLY SEQUENCE

1. Locate top to cabinet using panel screws and keps nuts provided thru hinge and holes in cabinet cowling at rear.
2. Open braces to locked position and locate on side rails of cabinet top to dimension shown in diagram, using clip nuts and panel screws.
3. Assemble locking arm as shown in diagram using 1/4" flat washers and 1/4 - 20 bolt into tee nut in front of top.

NOTE: A special plain cowling is available for use with the lift-up top if desired. Please specify RSCL 19 and desired color code. This cowling is also required at front of cabinet if I.D. cowling or clear swing door is not being used.

PARTS LIST

Item	Qty.	Description
1	1	Wood laminate top
2	1 pr.	Braces
	(installed)	
3	1	Hinge
	(installed)	
4	2	#10 - 32 keps nuts
5	4	#10 - 32 clip nuts
6	6	#10 - 32 x 1/2" panel scrs.
7	1	Locking arm
8	2	1/4 flat washers
9	1	1/4 - 20 x 1" lg hex bolt

NOTE: Quantities shown are for single width top and may increase for double and triple widths.

VENTED TOP ASSEMBLY DRAWINGS

ASSEMBLY SEQUENCE

1. Locate and secure inner frame (A) to top of cabinet using 10-32 clip nuts and panel screws (long slots in frame to front) assuring frame is square with cabinet.
2. Locate catches in raised or lowered position at rear of frame using top to determine which set of holes are to be used (this depends on type of top and as to which side of cabinet overlap is to be located or whether top is centred).
3. Hook angle brackets of top into appropriate slot in front of frame (upper or lower) and snap rear of top into position.
4. Secure top by tightening long 10-32 machine screw provided through frame into locking tab of top.

PARTS LIST

Item	Qty.	Description
A	1	Inner frame
B	2	Catches
C	1	Hardware kit

TURRETS ASSEMBLY DRAWINGS

Turrets are comprised of 1 pair of sides and necessary cross members. Assemble using 10-32 clip nuts and panel screws provided as illustrated.

NOTE: On RTSS19007 clip nuts are not necessary as cross members are supplied with weld nuts at mounting points.

The RTSE consists of 1 pair of sides and 2 cross members for the rear only. Mounting to the rear only involves the removal of rear cross member screws on deep turret and the re-insertion thru the forward flange of the "RTSE" extension.

Deeper Turrets include two rear cross members which also connect using clip nuts and panel screws. When using turret extension these may be left off allowing the assembly of a full depth panel on top and bottom of complete unit.

All Turrets may be ganged to provide a continuous console. This is done by connecting the 45° slopes using the spacers, 1/4 - 20 hex head cap screws and 1/4 - 20 keps nuts provided. If units are not to be ganged the special "RTSP" panel is required to fill the 45° sloped surface.

Note: Italic numerals indicate page numbers for assembly drawings.

Rack Packaging was designed for people and for electronics.

The versatility of the System components makes many different display/control panel combinations possible and since you will be creating your own, we have provided some of the anthropometric data that was used for the original designs.

Please note that this data must be interpreted. For instance, optimum viewing zone is illustrated with the body vertical; when the operator moves, the zone will move. Distances and angles of panels can vary depending upon their use. Make distinctions between casual, emergency, set-up or continual controls and displays. This will dictate some panel locations and sizes.

Human engineering is a very complex science, containing much more data than we could display here. For a better understanding we suggest *Humanscale 1/2/3* by Niels Diffrient, Alvin R. Tilley, Joan C. Bardagjy; designed by Henry Dreyfuss Associates, published by MIT Press.
