**PCLAN/Server 2000—Integrate Your Organization's PCs with Digital's Fast, Flexible, Yet Friendly PC LAN Server**

Your business success relies on personal computers, and you want to tie them together into a network. But connecting PCs—and integrating them—are two different things.

If you don't build the right foundation now, you may find it impossible to integrate all the PCs you need to integrate—10, or 10,000. You may be unable to run the applications you need to run when and where you need to run them. And you may learn that you can't easily integrate your PCs with both IBM and Digital networks.

The PCLAN/Server 2000 is a packaged LAN server based on Digital's proven MicroVAX 2000 microprocessor hardware, DECnet networking, and award-winning PC integration software. Its features and functions have been specially developed and fine-tuned to meet the specific needs of PC users working in small PC networks— and to connect easily to larger LANs and WANs that stretch throughout a building, across a city, or around the world.

The PCLAN/Server 2000 is the ideal PC LAN server for small businesses and work groups that want to grow—without limits.

## Authorized Distributor

## Specifications

### PCLAN/Server 2000 Hardware

| | |
|---|---|
| CPU Technology | ZMOS (MicroVAX 2000) |
| Memory | 4 Mbytes expandable to 6 Mbytes |
| Storage | 159 Mbyte hard disk |
| | 95 Mbyte streaming tape |
| | 1.2 Mbyte floppy disk |
| Console Device | VT320 terminal with LK201 keyboard |

### Power Requirements

| | |
|---|---|
| Line Voltage | 120 V or 240 V |
| Max Power Consumption | Under 160 W maximum input |
| Frequency Tolerance | 47 to 63 Hz |

### Operating Environment

| | |
|---|---|
| Temperature | 10°C to 40°C (50°F to 104°F) |
| Humidity | 10% to 90% noncondensing without diskette |
| | 20% to 80% noncondensing with diskette |
| Altitude | To 2.4 km (8000 ft) |

### PCLAN/Server 2000 Software

- VMS Operating System, 1-2 User License
- DECnet-VAX Network Software, End-Node License (includes license for VAX/VMS Services for MS-DOS)
- VAX/VMS Services for MS-DOS, Digital's PC Integration Software
- Broadcast Utility
- DECnet/PCSA Client License for 16 Users
- Client Software Media includes:
  — DECnet-DOS Network Software
  — Microsoft MS-NET
  — NETBIOS/Programming Interface Support
  — VT200 Family Terminal Emulators
  — PCMail
  — SEDT Full-Screen Editor
  — Microsoft MS-Windows Interface
  — MS-DOS (for VAXmate only)
  — DOS Utilities for all PCs, such as backup and restore facilities for networked PCs, loadable text and graphics fonts, and print screen capabilities
  — Documentation
