1.0 ABSTRACT:

THIS IS A DIAGNOSTIC PACKAGE FOR USE WITH THE KE11-B. THIS PACKAGE INCLUDES A USER'S GUIDE WHICH CONTAINS A DETAILED EXPLANATION OF THE INDIVIDUAL ERRORS,THE PARAMETERS TO BE USED WHILE IN THE FAST ERROR LOOP MODE AND THE TEST POINTS TO BE CHECKED.
THERE ARE THREE PARTS TO THE MAIN TEST. THESE BEING 1. REGISTER TESTS,2. LOGICAL AND ARITHMETIC SHIFT TESTS AND 3. MULTIPLY AND DIVIDE TESTS. THE PROGRAM ITSELF CONTAINS A COMPREHENSIVE ERROR HANDLER WHICH PERMITS THE USER TO INSERT THE DIFFERENT PARAMETERS FOR EACH INDIVIDUAL ERROR AND ENTER A FAST ERROR LOOP WHICH SHOULD GREATLY AID IN THE DEBUGGING OF THE KE11-B.

2.0 REQUIREMENTS:

1. PDP 11 (4K MINIMUM)
2. KE11-B INTERFACE
3. TELETYPE (ASR-33 OR EQUIVALENT)

3.0 LOADING PROCEEDURE:

LOAD THIS PROGRAM VIA THE ABSOLUTE LOADER

4.0 OPERATIONAL PROCEEDURE:

4.1 CONTROL SOFTWARE SWITCH SETTINGS

NOTE: ONLY AVAILABLE WHEN STARTING AT ADDRESS 210

SR0=1 SKIP LOGICAL AND ARITHMETIC SHIFT TESTS
SR1=1 SKIP MULTIPLY AND DIVIDE TESTS

4.2 OPERATOR ACTION
LOAD PROGRAM
LOAD ADDRESS 200
PRESS START

NOTE: STARTING AT ADDRESS 200 WILL NOT ALLOW ANY "SOFTWARE" SWITCH OPTIONS.

4.3 PASS DEFINATION
NORMAL OPERATION IS WITH ALL SWITCHS DOWN. UNDER THESE CONDITIONS A PASS WILL REQUIRE APPROXIMATLY 4 MINUTES AT WHICH TIME "EAE OK!" IS PRINTED ON THE TTY

```
                                5.0     ERRORS:
                                        ------

                                5.1 BUSS TIMOUT ERRORS
                                        A CHECK IS MADE FOR BUSS TIMOUT ERRORS FOR THE DURATION
                                OF THE TESTS.  ANY ERRORS WILL CAUSE A PRINTOUT INCLUDING THE
                                LOCATION WHERE THE ERROR OCCURED AND A REQUEST FOR THE FAILING
                                ADDRESS.  THERE ARE FOUR COMMANDS ASSOCIATED WITH THIS TYPE OF
                                ERROR WHICH ARE LISTED BELOW WITH THE EXCEPTION THAT THE "R"
                                COMMAND RESTARTS THE PROGRAM FROM BUSS ERROR.

                                5.2 OPERATIONAL ERRORS
                                        THERE ARE ELEVEN TYPES OF ERRORS POSSIBLE IN THIS PROGRAM
                                NOT COUNTING BUSS TIMOUT ERRORS.  THESE ERRORS VARY AS TO THE
                                NUMBER OF REGISTERS USED,THE INFORMATION DISPLAYED AND THE WAY
                                THE ERROR LOOPS ARE CONSTRUCTED.  IF YOU FOLLOW THE DIRECTIONS
                                PRINTED AND USE THE "USER'S GUIDE" IN THIS DOCUMENT, YOU
                                WILL HAVE NO PROBLEMS.  AFTER SUPPLYING THE PARAMETERS OBTAINED
                                FROM THE USER'S GUIDE, THERE ARE FOUR COMMANDS THAT CAN BE TYPED
                                ON THE TTY TO CONTROL EXECUTION OF THE ERROR LOOP.  THESE FOUR
                                COMMANDS ARE AS FOLLOWS:

                                        S= STOP THE LOOP
                                        C= CONTINUE THE LOOP
                                        P= CHANGE THE PARAMETERS
                                        R= RETURN TO THE FAILING TEST

                                BEFORE USING ANY OTHER COMMAND,THE "S" COMMAND MUST BE USED FIRST.
```

```

MULTIPLY TESTS

ERR #	REG#1	REG#2	REG#3	SYNC PT	SYNC MNEM	TEST AREA	COMMENTS
126	177304	177302	177306	E35-5 E60-5	ROM PC BR04 ROM SC DEC	SHEET ????	TEST MULTIPLY OPERATION VIA TABLES TBLC1 THROUGH TBLC6. THIS TEST USES ALL SIGN CONVENTIONS AND DATA PATTERNS TO SHAKE OUT THE BUGS. TWO SYNC POINTS ARE NOTED BUT FURTHER POINTS MAY BE WRITTEN DEPENDENT ON TYPE OF FAILURE. THE ALU SHEET 7,8 IS DRIVEN FROM MUXES ON SHEET 9 THROUGH THREE DIFFERENT TYPES OF OPERATIONS. F=A+B, F=A-B AND F=A. SHEET 9 USED WITH FLOW CHARTS SHOULD BE A GOOD STARTING POINT. FAILURE AT THIS TEST IMPLIES BAD AC DATA.
127	177304	177302	177306	E35-5 E60-5	ROM PC BR04 ROM SC DEC		SEE ABOVE TEST 126 FOR(EXPLANATION. FAILURE HERE INDICATES BAD MQ DATA.
130	177304	177*02	177306	E35-5	ROM PC BR04	HSV6 ØQ	LOADED VIA E21-1*(SHEE\09.2HCV80GEPS ZEROED AND SR7 GETS SR6 INPUT.
