RT-11 SOFTWARE DISPATCH
Published by
Administrative Services Group, Software Services
Digital Equipment Corporation
P.O.Box F
Maynard MA 01754

The **RT-11 Software Dispatch** complements the **RT-11 V3 Software Dispatch Review**. It publishes new and revised Software Product Descriptions, programming notes, software problems and solutions and documentation corrections. Much of the material is developed from answers to customer Software Performance Reports (SPRs) significant to the general audience.

The material is formatted to establish a reference notebook for the customer's software interests. The following products are supported in the **RT-11 Software Dispatch**:

APL-11 V1	FORTTRAN/RT-11 Extensions V1B	MU BASIC/RT-11 V1
BASIC/RT-11 V1B, V2	FORTTRAN/RT-11 LSI Extensions V1	PDL/RT-11 V1
BASIC/RT-11 Extensions	FORTTRAN IV/RT-11 V1C, V2	PEAK-11 V2
CTS-300 V3, V4	GAMMA-11 F/B V2	PLOT-11/RT-11 V1
CTS-300 DICAM V1	INDUSTRIAL BASIC/RT-11 V1	REMOTE/RT-11 V1
CTS-300/DIS V1	LA-11 V3	RT-11 V2C, V3
DECnet/RT V1	LV11/RT-11 Plotting Package V2	RT-11/2780 V2
FOCAL/RT-11 V1B		SSP-11/RT-11 V1

The material in this document is for information purposes only and is subject to change without notice. Digital Equipment Corporation assumes no responsibility for any errors which may appear in this document. Comments on the contents of this publication should be directed to your local DIGITAL Field Office.

Software binaries and sources are provided only under licenses. The standard terms and conditions, OEM Agreement, and/or Quantity Discount Agreement contain the licenses for all binaries other than for DECsystem-10.

DISTRIBUTION: The Dispatch is directed to one software contact (the system manager) at each licensed Category A and B software installation. No mailing will be made to addresses without a software contact.

Address changes and requests for information about maintenance service after the first year should be sent to the nearest DIGITAL Field Office. For address changes, include the new address and mailing label from the most recently received publication.

Eleanor F. Hunter, Editor
Roxanne Alexander, Associate Editor

ANNOUNCING RT-11 Version 3B

To continue its timely support of new hardware, RT-11 V3B will be available from the SDC (Software Distribution Center) in the beginning of May 1978. The contents of V3B are discussed below. All RT-11 V3 orders will automatically become V3B orders as soon as V3B is released. At V3B release, V3 will no longer be available. RT-11 V2C will remain available from the SDC, unsupported.

You may receive RT-11 in one of the following three ways:

1. One year software warranty in effect when V3B is released Order RT-11 V3B In-warranty Update Kit
2. One year Post-warranty Binary Program Update Service in effect when V3B is released Sit tight. Your update has been prepaid as part of your service. RT-11 V3B will be sent to you automatically.
3. No service in effect Order RT-11 V3B Post-warranty Update Kit

Your Dispatch mailing label displays your membership number and the expiration date of your service so you can determine your situation. For specific price and order information, contact your local DIGITAL Field Office.

With Version 3B, 7-track magnetic tape distribution has been discontinued. RT-11 will not distribute on RK07, but RK07 will be supported both as a system device and a data device. Sources will be available on floppy disks for V3B as well as RK05, RL01, and 9-track magnetic tape.

The primary goals of RT-11 V3B are to support new hardware devices and to introduce two new system utility programs. Some existing system components have been improved as well, and most known problems in V3 have been corrected.

NEW DEVICE SUPPORT

RT-11 supports two new mass storage devices and several hardware devices:

RL01 Disk

RT-11 supports the RL11/RLV11/RL01 disk as a storage medium and as a system device. The RL01 is a high-speed removable cartridge disk that offers approximately twice the storage capacity of the RK11/RK05 disk. RT-11 supports a replacement table for manufactured bad blocks on the RL01. RT-11 is distributed on the RL01. RT-11 does not support error logging for the RL01. This device supports a complete optional system generation (SYSGEN) with no special requirements.

RK07 Disk

RT-11 supports the RK711/RK07 cartridge disk as a storage medium and as a system device. The RK07, a removable cartridge disk with more than 24 megabytes of storage, uses the same RK611 controller and the same device handler as the RK06 disk. Programmed request allows programs to distinguish between the two devices on the one controller. Support of replacement of manufactured bad blocks for the RK07 is the same as for the RK06. RT-11 supports optional error logging for the RK07. Optional SYSGEN is supported on this device.

COMPANY CONFIDENTIAL

Announcing RT-11 V3B (cont.)

VT55 Terminal

RT-11 supports the VT55 graphics display terminal. Software for the VT55 included with RT-11 consists of the following two files:

PLOT55, a single FORTRAN-callable routine that provides access to the graphics features of the VT55 terminal.

TEST55.FOR, a FORTRAN program that provides a simple but thorough demonstration of the VT55 graphics terminal in action.

Cache Memory for the PDP-11/34A Processor:

RT-11 supports cache memory (the KK11-A unit) on the 11/34A processor. Cache memory does not affect the system except to increase the speed of memory accesses. RT-11 error logging detects and reports cache memory errors.

MSV11-DD Memory for the LSI-11:

RT-11 supports the MSV11-DD memory board unit for the LSI-11 microcomputer. This board enables the user to access up to 30K words of memory with the SJ or FB monitor. The normal high limit is 28K words. A special jumper is required before the user can use the extra 2K words of memory.

The REV11 bootstrap is not compatible with the 30K words option of the MSV11-DD board. The BDV11 bootstrap is required when using the MSV11-DD jumpered for 30K.

New Line Interfaces:

RT-11 multiterminal support includes support for the following line interfaces:

1. DLV11-J serial line interface (four DLV11s on a single board—RT-11 supports two DLV11-Js).
2. DZV11 asynchronous four-line multiplexer for the LSI-11 microcomputer (RT-11 supports one DZV11). The DZV11 was supported in RT-11 V3 also.

NEW SYSTEM UTILITY PROGRAMS

Two system utility programs, RESORC and FORMAT, are new in RT-11.

RESORC Utility Program:

The RESORC program examines the currently-running RT-11 system and displays useful information about the status of the monitor, devices, terminals, and the system configuration.

FORMAT Utility Program:

The FORMAT program writes headers for RK05 disks. It can format an RK05 disk in any unit (0–7) of the device. Formatting an RK05 disk takes approximately 25 seconds.

Languages:

Languages which are available with V3 (FORTRAN IV, BASIC-11, APL-11, MACRO) will also be available with V3B.

USER LETTER
Jan Fair, SPR Administration

Customers (and others) have brought to our attention the need for additional information regarding SPR service, particularly as it involves SPR Administration. The following represents our attempt to fulfill this need. Your comments and suggestions are most welcome.

HOW TO MAKE THE BEST USE OF SPR FORM

What WE Can Do for YOU

1. Blank SPR forms are available upon request in the desired quantities through SPR Administration (P.O.Box F) and your local office/SPR Center.
2. Copies of the SPR acknowledgment and answer are sent to the appropriate DIGITAL Office/SPR Center for their information.
3. SPRs marked *SOFTWARE ERROR* or *INQUIRY* will have a response for supported Category A and B products. These SPRs should refer to suspected deficiencies in the software.
4. SPRs marked *FYI* or *SUGGESTION* are forwarded to the pertinent software group for information purposes, and are responded to at their discretion.
5. SPRs marked *DOCUMENTATION ERROR* should report those problems dealing with software manuals or newsletters, and will be forwarded to the pertinent software group.

What YOU Can Do For US

1. Customer Name and Address and Problem Statement should always be typed or printed clearly.
2. SPRs should not be used for problems concerning software policy, software distribution, or hardware. Your local office should be contacted in these cases.
3. It would be most helpful to all concerned, if problems with patches are reported as soon as possible.
4. For security SPRs, it is imperative that the *DO NOT PUBLISH* box be marked.
5. It would be helpful if tapes submitted with SPRs are labeled (track and density), and have a directory attached.
6. Should you ever receive an unacceptable SPR response, please contact us or the appropriate SPR Center so that the response may be readdressed.

LEGAL CHARACTERS IN ISAM RECORDS (ES)

ISAM is capable of handling any arbitrary character as a key or data value. The ISAM utility (ISMUTL), however, is not.

In the course of REORGing an ISAM file, ISMUTL produces intermediate, sequential work files. When reading these files back in, any character in a key or data record which has an ASCII code identical to a DIBOL record terminator or null character, will cause premature truncation of the record and subsequent malfunction of ISMUTL. These characters are:

<u>Character</u>	<u>Decimal Code</u>
Null	0
HT	9
LF	10
VT	11
FF	12
CR	13
↑Z	26
Esc	27

Users are urged to avoid the inclusion of any of the above characters in ISAM data records. If such characters are included, the users will be obliged to supply their own ISAM LOAD and REORD functions.

ADDITIONAL FILES ON RELEASE KIT (MUB*.*) (SPR11-16503 CF)

The following files listed under MISCELLANEOUS in the RT-11 V3 Software Dispatch Review (October 1977) as supplied with RT-11 V3 may be ignored:

MUBET1.OBJ
MUBLNK.COM
MUBRTE.OBJ
MUBSID.OBJ
MUBTAB.OBJ
MUBXT1.OBJ
MUBZNI.OBJ
MUBZ1.OBJ.

They were included in the kits for a purpose that was subsequently overridden.

CUMULATIVE INDEX
MAY 1978

This is a complete listing of all articles for current versions of RT-11 and related products. In the case of subordinate software, missing sequence numbers may pertain to problems unique to interaction with previous versions of the same product.

IMPORTANT!

Retracted articles are indicated: RETRACTION.

Flags are currently being installed for all articles. The flags and definitions are as follows:

M = Mandatory patch. These are critical patches which each customer is required to install.

O = Optional patch. These articles are applicable only if the reported problems have occurred at the customer site or if they are unique to his operation.

R - Restriction. These problems are not patchable in released software. Restrictions are reviewed and corrected when possible as part of the normal release cycle.

N = NOTE. This information may be helpful to the user.

DECUS SPECIAL INTEREST GROUPS

A DECUS Special Interest Group (SIG) is an activity whereby members of the DIGITAL Equipment Computer Users Society who share common interests in a particular field, join together to promote the interchange of information. Specialization may be in application areas such as education or industry, specific software systems such as OS/8 and RSX-11, or a specific main-frame such as the DECsystem-10/20.

SIG members derive numerous benefits from communicating with others who share specialized interests and who may wish to share their experiences. SIG s sponsor business meetings, tutorials, and workshops at the various chapter symposia which fulfill the two-fold purpose of fostering communication among users and between users and DIGITAL. Channeled communication provides DIGITAL and the users with insight into the direction of future developments. SIG s provide direct feedback to DIGITAL's in-house activities and have thereby made substantial contributions to OS/8, RSX-11, RSTS and TOPS-10.

User submitted articles, minutes of local meetings, and letters comprise the major portion of the individual SIG newsletters. Suggestions, hints, bug fixes, program plans, or questions of a non-commercial nature are suitable material for SIG newsletters.

SIG members are encouraged to make presentations at the SIG sessions held during DECUS Symposia.

The semi-annual U.S. Symposia sessions are organized by special interest areas. Submissions received from the user community are reviewed by symposia committee members from the special interest groups for appropriate placement on the agenda.

Special Interest Group participation in the review of programs submitted to the DECUS Program Library provides an opportunity to improve the quality and utility of programs available to you and to fellow users.

DIGITAL standards are issued to DECUS members for review and on the theory and philosophy of the standards. DECUS is a voting member of ANSI X3. Users are encouraged to register their areas of expertise with DECUS and assist with reviewing standards. SIG s often play a role in this process.

Below is a list of U.S. based Special Interest Groups within DECUS.

If you would like information regarding membership in any of the Special Interest Groups, contact DECUS U.S. Chapter, 129 Parker Street, PK3-1/E55, Maynard, Massachusetts 01754 or one of the other DECUS Chapter offices in Kanata, Sidney or Geneva.

MCPU SIG - Multi-CPU Special Interest Group
NETSIG - Networks Special Interest Group
Biomed SIG - Biomedical Special Interest Group
RSTS SIG - RSTS and RSTS/E Special Interest Group
SIGIG - Special Interest Group on Interactive Graphics
ESIG - Engineering Applications Special Interest Group
SIG-18 - 18-Bit Users Special Interest Group
12-Bit SIG - 12-Bit User Special Interest Group
RSX-11/IAS SIG
RT-11 SIG

PASCAL SIG
DBMS SIG
TECO SIG
SIGIL - Special Interest Group on Implementation Languages
LSI-11 SIG
FOCAL SIG
STANDARDS SIG

RT-11 SPECIAL INTEREST GROUP

A Special Interest Group has been formed to serve users of RT-11. The organization of the SIG consists of a SIG Chairman and working committees for standards, documentation, library submissions, newsletter, and help for new users.

Submissions to the newsletter should be directed to:

John T. Rasted
CAM Systems, Inc.
17 Brown Street
Waterbury, CT 06702
(203) 757-8010

Other communications can be sent to:

Thomas J. Provost
P. O. Box 95
Middleton, MA 01949
(617) 774-2370
(617) 245-6600 (Boston tie line)

or

Thomas J. Provost
RT-11 SIG Chairman
c/o DECUS
146 Main Street, PK3-1/E55
Maynard, MA 01754
(617) 897-5111, ext: 2414

SIG's activities encompass the following:

- 1. Preparation of a SIG newsletter (user submissions are strongly encouraged).
2. Exchange of user-written programs. This exchange could include TASKS representing user-written extensions to RT-11 (including, but not limited to device drivers) as well as utility and applications programs, etc.
3. Establishment of communications with the DECUS staff to obtain for SIG members early information on RT-11 related additions to the DECUS Library. These communications will also serve to provide prompt testing of such submissions.
4. Establishment of user input to appropriate groups within DEC, so that they will receive user feedback on any additions or needed changes to RT-11. Additionally, SIG members may receive early warning from DEC about RT-11 changes.
5. Establishment of SIG-maintained files of RT-11 errors and error solutions, where they exist, independent of DEC publications.
6. Establishment of RT-11 "Welcome Wagon" type services to aid new users.
7. Coordination of user input to standards and documentation work.

If you wish to become a member of the RT-11 SIG, please fill out the form below and return it to the DECUS Office. (Please type or print).

NAME _____ *DECUS MEMBERSHIP NO. _____

AFFILIATION _____

ADDRESS _____

CITY _____ STATE _____ ZIP CODE _____

Are you registered with DEC as an RT-11 user? _____

Version Number _____

Fortran? _____

Basic? _____

*Please note one must be a member of DECUS prior to requesting RT-11 SIG involvement. For general membership information, contact the DECUS Office, 146 Main Street, Maynard, MA 01754.

debug

DEBUG is dedicated to establishing an interchange of ideas between business users of DEC computers in accounting allied applications, and between the users and DEC.

DEBUG MEMBERSHIP APPLICATION

Name _____ Title _____
 Firm _____
 Address _____ Telephone _____
 City _____ State _____ Zip _____
 DECUS NO. *

_____ BACKGROUND AND EXPERIENCES _____

Like all non-profit service organizations, DEBUG can best serve its members by utilizing the skills, experiences and viewpoints of its own membership. To let us know where your own experiences and interests lie, we ask that you fill out the following vitae form. You may, of course, decline to do so – we will treat your response with respect and confidentiality in any case.

ACADEMIC BACKGROUND	favorite subject area	minor subject area	also studied
BUSINESS AREAS AND/OR FUNCTIONS	most experience with	fair experience with	worked around
COMPUTER SYSTEMS WORKED WITH	favorite system, language	also experienced with	smattering of

*Please note one must be a member of DECUS prior to requesting DEBUG SIG involvement. For general membership information, contact the DECUS office, 129 Parker Street, PK3-1/E55, Maynard, MA 01754.

I would consider:

- Chairing a DEBUG session
- Organizing a session
- Working with the DEBUG steering committee

2/18/76

DIGITAL EQUIPMENT COMPUTER USERS SOCIETY
Special Interest Group in Implementation Languages

SIGIL

A Special Interest Group on System Implementation Languages, Tools and Techniques (SIGIL) was formed at the 1973 Fall DECUS Symposium.

The initial goals of the group are to provide the following:

1. Interchange of ideas and modules among programmers working in the system implementation area. The chief aim in this area is to avoid inventing square wheels when someone else has already developed round ones. The contributions in this area can range from core management modules to internal documentation practices, with distribution by newsletter.
2. Work with DEC Software Development for the user community on improving the existing languages used for systems implementation (MACRO-10, BLISS-10 and ALGOL). This is envisioned as a small group of users willing to spend the time and effort necessary.

To make a success of SIGIL, or to widen the area of interest across product lines, requires active participation of the members. Submissions to the newsletter or other communications may be sent to the following address:

SIGIL
c/o DECUS Office
146 Main Street/PK3/E55
Maynard, MA 01754

.....

To join SIGIL, please fill out the form below and return it to the DECUS Office.

Are you a DECUS Member? _____ DECUS Membership Number _____

NAME _____

AFFILIATION _____

ADDRESS _____

CITY _____ STATE _____ ZIP CODE _____

TELEPHONE NUMBER _____

SOFTWARE PROBLEMS OR ENHANCEMENTS

Questions, problems, and enhancements to DIGITAL software should be reported on a Software Performance Report (SPR) form and mailed to the SPR Center at one of the following DIGITAL Offices: (SPR forms are available from the SPR Center).
