

## ERE Version 2, Release 3

The IFCEREP1 program is updated to support the following products:

- IBM Model 4361 processor (370 mode only)
- IBM Model 4381 processor
- IBM Model 9081 processor
- IBM 3262 Model 5 printer
- IBM 4245 printer
- IBM 3430 tape storage device

ERE support does not necessarily mean SCP support of the listed products.

This version of ERE supercedes all prior versions. It executes under, and processes records produced by, the following operating systems:

- DOS and VSE systems
- OS/VS systems, including MVS/Extended Architecture
- VM systems, including VM/XA Migration Aid (5665-169)

### Prerequisites:

- VS1 Release 7.0
- VS2 Release 3.8
- MVS/SP Version 2, Release 1 (MVS/Extended Architecture)
- VSE/Advanced Functions Release 2.0
- VM/System Product Release 3

### System Requirements:

When this program is installed on the prerequisite system control program, the minimum configuration requirement stated in the System Control Programming Specifications for the system control program remains unchanged. Additional storage may be required.

This document constitutes "IBM's official published specifications" to which the programming described herein is warranted as provided in IBM's agreements for lease, rental or purchase of IBM machines. Any other documentation with respect to this programming, including any documentation referenced herein, is provided for information purposes only and does not extend or modify these specifications.
