

Subject index for papers in Volume 40

Each index entry below is accompanied by an author's name and a page number; the author index contains the title of the paper and the names of coauthors, if any.

Subject	Author	Page			
<i>Algorithms</i>					
A fast, highly reliable data compression chip and algorithm for storage systems	Cheng	603			
<i>Analytical models</i>					
Computer-aided 3D tolerance analysis of disk drives	Schlatter	537			
<i>Arithmetic and logical unit design</i>					
The floating-point unit of the PowerPC 603e microprocessor	Jessani	559			
<i>Artificial intelligence</i>					
Primary production scheduling at steelmaking industries	Lee	231			
<i>ASICs</i>					
BooleDozer: Logic synthesis for ASICs	Stok	407			
Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453			
Design considerations for Digital's PowerStorm graphics processor	Gianos	485			
Design methodology for IBM ASIC products	Engel	387			
Design planning for high-performance ASICs	Sayah	431			
IC technology and ASIC design for the Cray J90 supercomputer	Poli	475			
PowerPC AS A10 64-bit RISC microprocessor	Bishop	495			
Technology-migratable ASIC library design	Bednar	377			
Test methodologies and design automation for IBM ASICs	Gillis	461			
<i>Beams, charged particle</i>					
Accelerated testing for cosmic soft-error rate	Ziegler	51			
			IBM experiments in soft fails in computer electronics (1978-1994)	Ziegler	3
			Portable Faraday cup for nonvacuum proton beams	Ziegler	73
			<i>Character recognition</i>		
			A document recognition system and its applications	Yamashita	341
			Automated forms-processing software and services	Gopisetty	211
			<i>Circuit and device technology</i>		
			Charge-metering sampling circuits and their applications	Schlig	631
			Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453
			Design considerations for Digital's PowerStorm graphics processor	Gianos	485
			IC technology and ASIC design for the Cray J90 supercomputer	Poli	475
			PowerPC AS A10 64-bit RISC microprocessor	Bishop	495
			Test methodologies and design automation for IBM ASICs	Gillis	461
			<i>Circuit theory and analysis</i>		
			Critical charge calculations for a bipolar SRAM array	Freeman	119
			The floating-point unit of the PowerPC 603e microprocessor	Jessani	559
			<i>CMOS</i>		
			BooleDozer: Logic synthesis for ASICs	Stok	407
			Charge-metering sampling circuits and their applications	Schlig	631
			Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453
			Design considerations for Digital's PowerStorm graphics processor	Gianos	485
			Design methodology for IBM ASIC products	Engel	387
			Design planning for high-performance ASICs	Sayah	431
			IC technology and ASIC design for the Cray J90 supercomputer	Poli	475

PowerPC AS A10 64-bit RISC microprocessor	Bishop	495	<i>Cosmic rays</i>		
Technology-migratable ASIC library design	Bednar	377	Accelerated testing for cosmic soft-error rate	Ziegler	51
Test methodologies and design automation for IBM ASICs	Gillis	461	Critical charge calculations for a bipolar SRAM array	Freeman	119
<i>Codes and coding</i>			Field testing for cosmic ray soft errors in semiconductor memories	O'Gorman	41
A fast, highly reliable data compression chip and algorithm for storage systems	Cheng	603	IBM experiments in soft fails in computer electronics (1978-1994)	Ziegler	3
<i>Coding, arithmetic</i>			Modeling the cosmic-ray-induced soft-error rate in integrated circuits: An overview	Srinivasan	77
A fast, highly reliable data compression chip and algorithm for storage systems	Cheng	603	Nuclear physics of cosmic ray interaction with semiconductor materials: Particle-induced soft errors from a physicist's perspective	Tang	91
<i>Computer applications</i>			Soft-error Monte Carlo modeling program, SEMM	Murley	109
A document recognition system and its applications	Yamashita	341	Terrestrial cosmic rays	Ziegler	19
An overview of computer-integrated surgery at the IBM Thomas J. Watson Research Center	Taylor	163	<i>Cryptography</i>		
Automated forms-processing software and services	Gopisetty	211	A proposed mode for triple-DES encryption	Coppersmith	253
Integrated medical-image system for cancer research and treatment	Ohbuchi	185	<i>Data compression</i>		
Primary production scheduling at steelmaking industries	Lee	231	A fast, highly reliable data compression chip and algorithm for storage systems	Cheng	603
Toward on-line, worldwide access to Vatican Library materials	Mintzer	139	<i>Data encryption standard (DES)</i>		
<i>Computer architecture</i>			A proposed mode for triple-DES encryption	Coppersmith	253
Serial Storage Architecture	Judd	591	<i>Data, structures and accessing</i>		
<i>Computer organization and design</i>			A fast, highly reliable data compression chip and algorithm for storage systems	Cheng	603
Serial Storage Architecture	Judd	591	<i>Data transmission</i>		
The floating-point unit of the PowerPC 603e microprocessor	Jessani	559	A proposed mode for triple-DES encryption	Coppersmith	253
<i>Computer security</i>			Serial Storage Architecture	Judd	591
A proposed mode for triple-DES encryption	Coppersmith	253	<i>Databases</i>		
<i>Computer-aided design</i>			Integrated medical-image system for cancer research and treatment	Ohbuchi	185
BooleDozer: Logic synthesis for ASICs	Stok	407	Toward on-line, worldwide access to Vatican Library materials	Mintzer	139
Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453	<i>Design automation</i>		
Design methodology for IBM ASIC products	Engel	387	BooleDozer: Logic synthesis for ASICs	Stok	407
Design planning for high-performance ASICs	Sayah	431	Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453
Technology-migratable ASIC library design	Bednar	377	Design considerations for Digital's PowerStorm graphics processor	Gianos	485
The past and present roles of computer-aided engineering in DASD design	Kan	615	Design methodology for IBM ASIC products	Engel	387
<i>Computer-controlled manipulators</i>			Design planning for high-performance ASICs	Sayah	431
The IBM 3495 robotics and vision system	Kishi	301	IC technology and ASIC design for the Cray J90 supercomputer	Poli	475
<i>Contamination</i>			PowerPC AS A10 64-bit RISC microprocessor	Bishop	495
IBM experiments in soft fails in computer electronics (1978-1994)	Ziegler	3	Technology-migratable ASIC library design	Bednar	377
<i>Control theory and systems</i>			Test methodologies and design automation for IBM ASICs	Gillis	461
Storage control cache resource management: Increasing diversity, increasing effectiveness	Burton	331	The past and present roles of computer-aided engineering in DASD design	Kan	615

<i>Design verification</i>			Critical charge calculations for a bipolar SRAM array	Freeman	119
Architectural verification of advanced storage controllers	Soult	623	Design considerations for Digital's PowerStorm graphics processor	Gianos	485
Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453	Design methodology for IBM ASIC products	Engel	387
Design methodology for IBM ASIC products	Engel	387	Design planning for high-performance ASICs	Sayah	431
Design planning for high-performance ASICs	Sayah	431	IC technology and ASIC design for the Cray J90 supercomputer	Poli	475
IC technology and ASIC design for the Cray J90 supercomputer	Poli	475	Modeling the cosmic-ray-induced soft-error rate in integrated circuits: An overview	Srinivasan	77
PowerPC AS A10 64-bit RISC microprocessor	Bishop	495	PowerPC AS A10 64-bit RISC microprocessor	Bishop	495
Test methodologies and design automation for IBM ASICs	Gillis	461	Soft-error Monte Carlo modeling program, SEMM	Murley	109
<i>Digital libraries</i>			Technology-migratable ASIC library design	Bednar	377
Toward on-line, worldwide access to Vatican Library materials	Mintzer	139	Test methodologies and design automation for IBM ASICs	Gillis	461
<i>Display technology</i>			<i>Integrated circuits</i>		
Charge-metering sampling circuits and their applications	Schlig	631	PowerPC AS A10 64-bit RISC microprocessor	Bishop	495
<i>Faraday cup, portable</i>			<i>Interconnection technology</i>		
Portable Faraday cup for nonvacuum proton beams	Ziegler	73	Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453
<i>Films, magnetic</i>			<i>Logic design and technology</i>		
Thin-film inductive heads	Chiu	283	The floating-point unit of the PowerPC 603e microprocessor	Jessani	559
Thin-film media—Current and future technology	Johnson	511	<i>Logic synthesis</i>		
<i>Films, thin</i>			BooleDozer: Logic synthesis for ASICs	Stok	407
Thin-film inductive heads	Chiu	283	Design planning for high-performance ASICs	Sayah	431
Thin-film media—Current and future technology	Johnson	511	<i>LSI design automation</i>		
<i>Finite element analysis</i>			BooleDozer: Logic synthesis for ASICs	Stok	407
The past and present roles of computer-aided engineering in DAsD design	Kan	615	Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453
<i>Handwriting recognition</i>			Design considerations for Digital's PowerStorm graphics processor	Gianos	485
A document recognition system and its applications	Yamashita	341	Design methodology for IBM ASIC products	Engel	387
Automated forms-processing software and services	Gopisetty	211	Design planning for high-performance ASICs	Sayah	431
<i>I/O devices, systems, and technology</i>			IC technology and ASIC design for the Cray J90 supercomputer	Poli	475
Serial Storage Architecture	Judd	591	PowerPC AS A10 64-bit RISC microprocessor	Bishop	495
Storage control cache resource management: Increasing diversity, increasing effectiveness	Burton	331	Technology-migratable ASIC library design	Bednar	377
The IBM 3495 robotics and vision system	Kishi	301	Test methodologies and design automation for IBM ASICs	Gillis	461
<i>Image processing</i>			<i>LSSD design and testing</i>		
An overview of computer-integrated surgery at the IBM Thomas J. Watson Research Center	Taylor	163	IC technology and ASIC design for the Cray J90 supercomputer	Poli	475
Automated forms-processing software and services	Gopisetty	211	<i>Magnetic head design</i>		
Toward on-line, worldwide access to Vatican Library materials	Mintzer	139	Thin-film inductive heads	Chiu	283
<i>Integrated circuit design</i>			<i>Magnetic head-disk interaction</i>		
BooleDozer: Logic synthesis for ASICs	Stok	407	Thin-film media—Current and future technology	Johnson	511
Charge-metering sampling circuits and their applications	Schlig	631			
Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453			

<i>Magnetic recording</i>			IBM experiments in soft fails in computer electronics (1978-1994)			Ziegler	3
Thin-film inductive heads	Chiu	283	IC technology and ASIC design for the Cray J90 supercomputer			Poli	475
Thin-film media—Current and future technology	Johnson	511	PowerPC AS A10 64-bit RISC microprocessor			Bishop	495
<i>Magnetics—studies and structures</i>			Technology-migratable ASIC library design			Bednar	377
Thin-film inductive heads	Chiu	283	Test methodologies and design automation for IBM ASICs			Gillis	461
Thin-film media—Current and future technology	Johnson	511	<i>Microprocessor systems and applications</i>				
<i>Magneto-optics</i>			The floating-point unit of the PowerPC 603e microprocessor			Jessani	559
Optical data storage media	McDaniel	311	<i>Models and modeling</i>				
Rewritable optical disk drive technology	Asthana	543	Architectural verification of advanced storage controllers			Soult	623
<i>Manufacturing</i>			Computer-aided 3D tolerance analysis of disk drives			Schlatter	537
IBM experiments in soft fails in computer electronics (1978-1994)	Ziegler	3	Critical charge calculations for a bipolar SRAM array			Freeman	119
<i>Materials technology</i>			Modeling the cosmic-ray-induced soft-error rate in integrated circuits: An overview			Srinivasan	77
Thin-film media—Current and future technology	Johnson	511	Nuclear physics of cosmic ray interaction with semiconductor materials: Particle-induced soft errors from a physicist's perspective			Tang	91
<i>Measurement</i>			Optical data storage media			McDaniel	311
Computer-aided 3D tolerance analysis of disk drives	Schlatter	537	Primary production scheduling at steelmaking industries			Lee	231
Portable Faraday cup for nonvacuum proton beams	Ziegler	73	Soft-error Monte Carlo modeling program, SEMM			Murley	109
<i>Mechanical analysis</i>			The past and present roles of computer-aided engineering in DAsD design			Kan	615
Computer-aided 3D tolerance analysis of disk drives	Schlatter	537	<i>Monte Carlo methods</i>				
<i>Mechanical design</i>			Computer-aided 3D tolerance analysis of disk drives			Schlatter	537
The IBM 3495 robotics and vision system	Kishi	301	Soft-error Monte Carlo modeling program, SEMM			Murley	109
<i>Mechanics and mechanisms</i>			<i>Multiprocessors</i>				
The IBM 3495 robotics and vision system	Kishi	301	Integrated medical-image system for cancer research and treatment			Ohbuchi	185
<i>Medicine and medical electronics</i>			<i>Operations research</i>				
An overview of computer-integrated surgery at the IBM Thomas J. Watson Research Center	Taylor	163	Primary production scheduling at steelmaking industries			Lee	231
Integrated medical-image system for cancer research and treatment	Ohbuchi	185	<i>Optical disk drives</i>				
<i>Memory, cache</i>			Rewritable optical disk drive technology			Asthana	543
Storage control cache resource management: Increasing diversity, increasing effectiveness	Burton	331	<i>Optical disk technology</i>				
<i>Memory (computer) design and technology</i>			Optical data storage media			McDaniel	311
Accelerated testing for cosmic soft-error rate	Ziegler	51	Rewritable optical disk drive technology			Asthana	543
<i>Memory (computer) management</i>			<i>Optical science and technology</i>				
Storage control cache resource management: Increasing diversity, increasing effectiveness	Burton	331	Optical data storage media			McDaniel	311
<i>Microelectronics</i>			<i>Optimization</i>				
BooleDozer: Logic synthesis for ASICs	Stok	407	Optical data storage media			McDaniel	311
Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453	<i>Optoelectronic device technology</i>				
Design considerations for Digital's PowerStorm graphics processor	Gianos	485	The IBM 3495 robotics and vision system			Kishi	301
Design methodology for IBM ASIC products	Engel	387	<i>Pattern recognition</i>				
Design planning for high-performance ASICs	Sayah	431	A document recognition system and its applications			Yamashita	341
Field testing for cosmic ray soft errors in semiconductor memories	O'Gorman	41					

Automated forms-processing software and services	Gopisetty	211	Nuclear physics of cosmic ray interaction with semiconductor materials: Particle-induced soft errors from a physicist's perspective	Tang	91
<i>Performance analysis</i>			Soft-error Monte Carlo modeling program, SEMM	Murley	109
Optical data storage media	McDaniel	311	Terrestrial cosmic rays	Ziegler	19
<i>Physics</i>			<i>Storage (computer) devices and systems</i>		
Modeling the cosmic-ray-induced soft-error rate in integrated circuits: An overview	Srinivasan	77	Rewritable optical disk drive technology	Asthana	543
Terrestrial cosmic rays	Ziegler	19	Serial Storage Architecture	Judd	591
<i>Physics, theoretical</i>			Storage control cache resource management: Increasing diversity, increasing effectiveness	Burton	331
Nuclear physics of cosmic ray interaction with semiconductor materials: Particle-induced soft errors from a physicist's perspective	Tang	91	<i>Testing</i>		
<i>Production scheduling</i>			Architectural verification of advanced storage controllers	Soult	623
Primary production scheduling at steelmaking industries	Lee	231	Design methodology for IBM ASIC products	Engel	387
<i>Programming, mathematical</i>			Test methodologies and design automation for IBM ASICs	Gillis	461
Primary production scheduling at steelmaking industries	Lee	231	<i>Testing, accelerated</i>		
<i>Recording technology</i>			Accelerated testing for cosmic soft-error rate	Ziegler	51
Optical data storage media	McDaniel	311	<i>Testing, chip</i>		
Rewritable optical disk drive technology	Asthana	543	Field testing for cosmic ray soft errors in semiconductor memories	O'Gorman	41
Thin-film inductive heads	Chiu	283	IBM experiments in soft fails in computer electronics (1978-1994)	Ziegler	3
Thin-film media—Current and future technology	Johnson	511	Soft-error Monte Carlo modeling program, SEMM	Murley	109
<i>Reliability</i>			Test methodologies and design automation for IBM ASICs	Gillis	461
Critical charge calculations for a bipolar SRAM array	Freeman	119	<i>Testing, circuit</i>		
<i>Robotics</i>			Design planning for high-performance ASICs	Sayah	431
An overview of computer-integrated surgery at the IBM Thomas J. Watson Research Center	Taylor	163	Test methodologies and design automation for IBM ASICs	Gillis	461
The IBM 3495 robotics and vision system	Kishi	301	<i>Testing, field</i>		
<i>Semiconductors</i>			Field testing for cosmic ray soft errors in semiconductor memories	O'Gorman	41
Nuclear physics of cosmic ray interaction with semiconductor materials: Particle-induced soft errors from a physicist's perspective	Tang	91	<i>Vatican Library</i>		
<i>Simulation</i>			Toward on-line, worldwide access to Vatican Library materials	Mintzer	139
Architectural verification of advanced storage controllers	Soult	623	<i>Virtual reality</i>		
Computer-aided 3D tolerance analysis of disk drives	Schlatter	537	Integrated medical-image system for cancer research and treatment	Ohbuchi	185
<i>Soft errors</i>			<i>VLSI</i>		
Accelerated testing for cosmic soft-error rate	Ziegler	51	BooleDozer: Logic synthesis for ASICs	Stok	407
Critical charge calculations for a bipolar SRAM array	Freeman	119	Circuit placement, chip optimization, and wire routing for IBM IC technology	Hathaway	453
Field testing for cosmic ray soft errors in semiconductor memories	O'Gorman	41	Design considerations for Digital's PowerStorm graphics processor	Gianos	485
IBM experiments in soft fails in computer electronics (1978-1994)	Ziegler	3	Design methodology for IBM ASIC products	Engel	387
Modeling the cosmic-ray-induced soft-error rate in integrated circuits: An overview	Srinivasan	77	Design planning for high-performance ASICs	Sayah	431
			IC technology and ASIC design for the Cray J90 supercomputer	Poli	475
			PowerPC AS A10 64-bit RISC microprocessor	Bishop	495

Technology-migratable ASIC library design	Bednar	377
Test methodologies and design automation for IBM ASICs	Gillis	461
The floating-point unit of the PowerPC 603e microprocessor	Jessani	559
