The IBM Personal System/2 and Printers Sales Advisor

May 1989 Edition

The Sales Advisor has been created as a single source of information to help you qualify, recommend, price and sell IBM Personal System/2 products, in an effort to give you a concise, primary reference document for conducting your business with IBM.

In this edition we also included material and information previously offered in other publications, such as Marketing Programs and Promotions, Market Support Material Reference List, and IBM Telephone Numbers.

With this Sales Advisor you will find vital product information in one convenient source. Use this Sales Advisor and see how you will:

Optimize your valuable selling time

Enhance your image as a sales professional

Increase your sales of IBM Personal System/2 products

*To obtain additional copies of this publication,

1 - Replacing Standard 1MB Memory Kit on System Board.

NOTE: This chart is not intended to show every possible combination.

MEMORY CONCEPTS INTRODUCTION

The following two charts preceding the memory configurator charts are intended to explain in simple terms the difference between **EXTENDED MEMORY** and **EXPANDED MEMORY**.

1) The 8088/8086 processors in order to address memory generate a 20-bit address. The largest number that can be formed with 20 bits is 1,048,576. That means that these processors can address only 1MB of memory.

Out of this 1MB (1024KB) addressability (Called **CONVENTIONAL MEMORY**) only 640KB can be used for the Operating System and the application.

The rest of the addressability (384KB) is for **SYSTEM MEMORY**. This is memory available only to the system, but not to the applications (E.G. Video Buffer, BIOS, etc.).

2) The 80286 processor has two modes of operations : One is called **REAL MODE**, and in this mode the processor behaves like an 8088, therefore it has the same memory addressability.

However, with the appropriate software, the processor can be directed to behave in a different way. It can go in a mode of operation called **PROTECTED MODE**. In this mode it generates a 24-bit address, and therefore it can use up to 16MB of memory. Memory above the **CONVENTIONAL MEMORY** (1MB) that can be addressed directly by **PROTECTED MODE** is called **EXTENDED MEMORY**.

3) The 80386 processor works in the following way:

A) With no software intervention, it works like an 8088: 1MB maximum addressability.

B) However, with the appropriate software it can go into different modes:

It can behave like an 80286 (16MB addressability) or it can go into modes that are unique to the 80386 processor. In those modes it uses 32-bit addresses, therefore it is able to use up to 4GB of real memory.

Again, memory above **CONVENTIONAL MEMORY**, that can be addressed with a processor mode is called **EXTENDED MEMORY**. DOS is able to work only in **REAL MODE**, therefore, regardless of the processor it is running on, it can only use 640KB of memory (1MB addressability).

Other operating systems are able to switch the modes of the 80286/80386 processors and therefore are able to use **EXTENDED MEMORY**: E.G. OS/2 and AIX.

The only way for DOS to use more than 640KB of memory is to use **EXPANDED MEMORY**.

EXPANDED MEMORY can be employed with any processor: 8088, 8086, 80286 and 80386.

The processors work in real mode only (1MB maximum addressability). However, through various techniques, more than 1MB can be addressed, but only in "pieces".

With **EXPANDED MEMORY**, DOS and appropriate drivers, can handle multiple programs, each one limited to 640KB in size, and only data can occupy bigger "pieces".

EXPANDED MEMORY is not the ultimate solution because:

1) No single program can be larger than 640KB

2) Advanced features of the 80286 and 80386 processors available in modes other than **REAL MODE** (E.G. Memory Protection, Virtual Memory, Multi-tasking functions) cannot be exploited.

However, **EXPANDED MEMORY** has been used in the industry to overcome the limitations of DOS (Real Mode only), while the OS/2 operating system utilizes the advanced features of the processors.

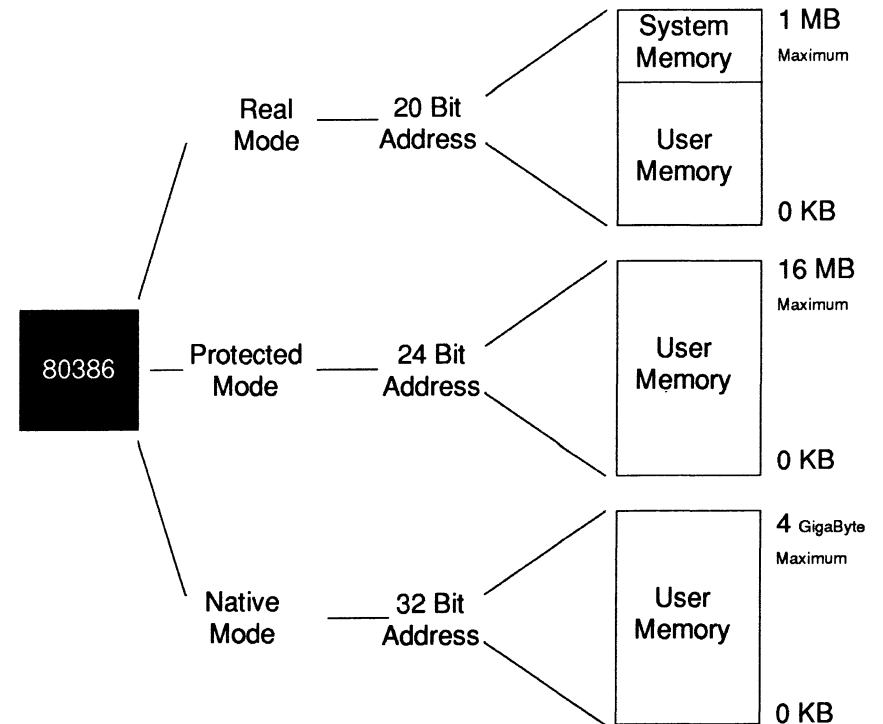

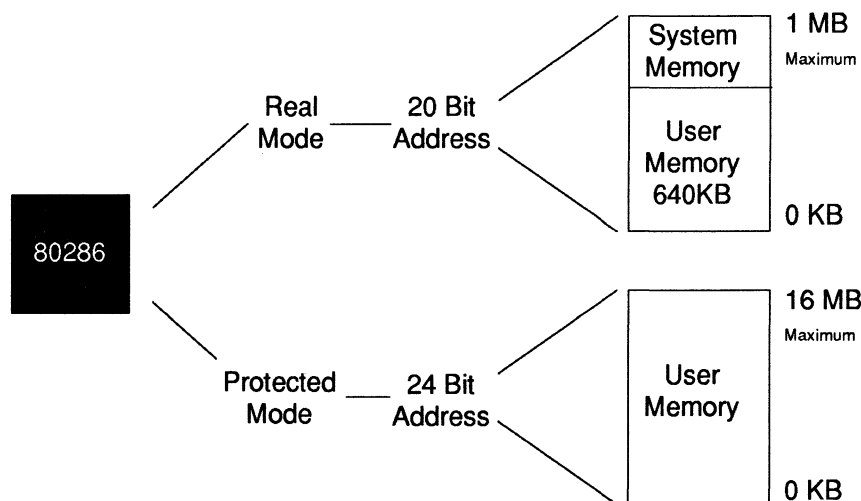

Memory Concepts

- 8088/8086 Processors have a 1 megabyte **maximum** addressability
User memory (application and operating system can use 640KB max.)

- Memory that can be addressed with a mode other than Real Mode is called **Extended Memory**.
- Once again, **DOS** can use only **640KB** of main memory and can use **Extended Memory** in a very limited way: as a **Virtual Disk** and/or **Disk Cache**.
- **OS/2** can fully exploit **Extended Memory** since it is capable of switching the modes of the 80286/80386 processor.

- Same maximum addressability applies to 80286 and 80386 processors **when used in Real Mode** (8088 Compatibility Mode).
- DOS can handle only Real Mode, therefore, regardless of the processor it runs on, it has the limitation of 640KB of memory that it can utilize.

Memory Concepts

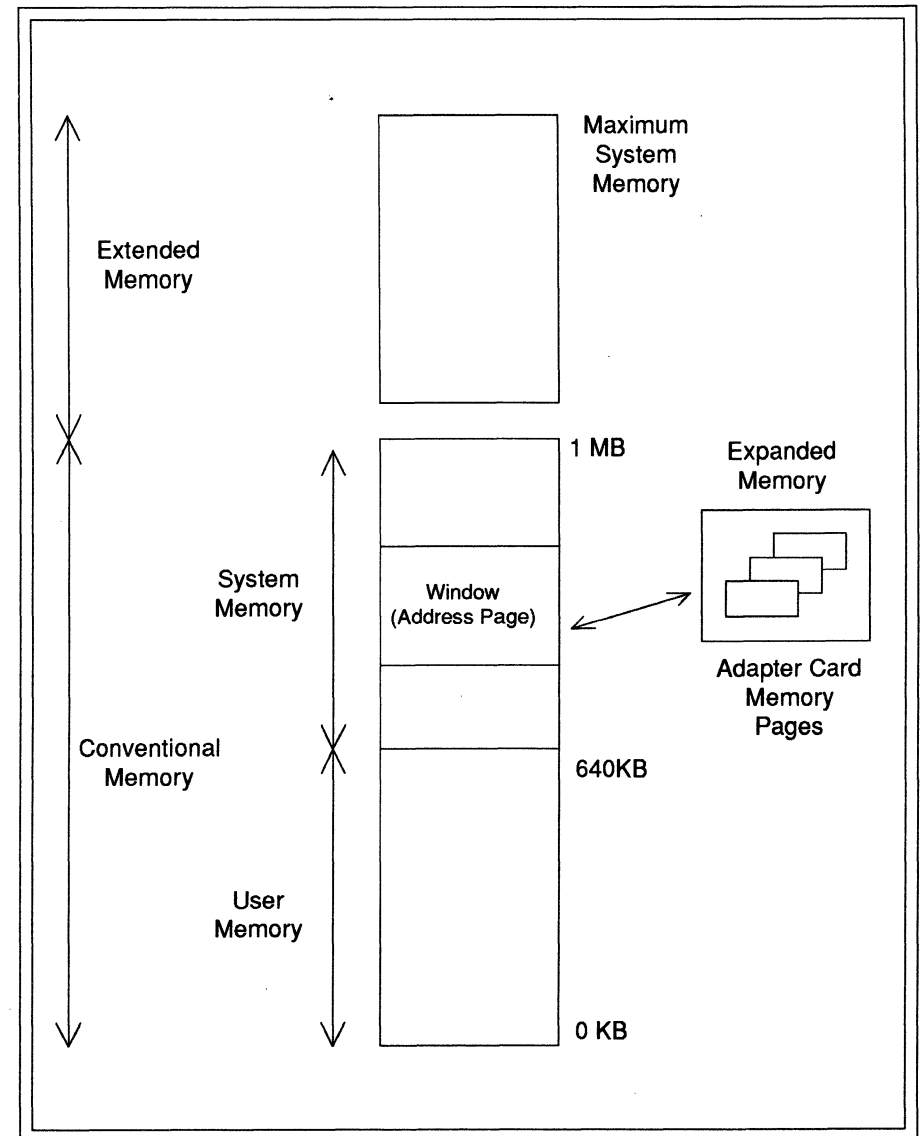

A way for DOS to use more than 640KB is to utilize **Expanded Memory**. (Supported by DOS 4.0)

DOS and **appropriate drivers** can use more than 640KB in "pages" of 640KB max. (e.g. IBM PC 3270 Workstation Program).

Each program **cannot** be larger than 640KB.

Only **data** can occupy pages larger than 640KB.

OEM Hardware Products for IBM Personal System/2 Computers with the Micro Channel Bus

Many OEM Hardware Products for IBM Personal System/2 Computers with the Micro Channel Bus are commercially marketed by other developers. In order to obtain information on these products you can.

1. Use CSS (Customer Support System)
2. Contact your IBM Representative and order the Catalog of OEM Hardware Products for IBM Personal System/2 Computers with the Micro Channel BUS G360-2824-01

The material provided through the above mentioned means is based on information provided to IBM by authorized representatives of each of the development organizations referenced. Each developer has stated that is marketing or intends to market the listed product(s) that directly attach to the Micro Channel bus of an IBM PS/2 Computer.

There may be other developers whose products are not included. To request product enrollment in future versions of the catalog, please submit a written request to :

Ms. Mildred N. Sanderson
IBM Corporation - 1709
P.O. Box 1328
Boca Raton, FL 33429-1328

IBM has not evaluated the listed products and makes no comments or judgements about their functions, quality, performance, etc. Users should contact the developer directly to verify product function, prerequisites, price, availability, and suitability for the user's purposes.

IBM DOES NOT RECOMMEND OR ENDORSE THE NON-IBM PRODUCTS. WITH RESPECT TO THE LISTED PRODUCTS OR THE COMPLETENESS OR ACCURACY OF THIS CATALOG, IBM MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. ANY AGREEMENTS OR WARRANTIES TAKE PLACE DIRECTLY BETWEEN THE DEVELOPER AND PROSPECTIVE USERS.

Personal System/2 Communications

IBM Cabling Selection

Media Selection

The IBM Cabling System provides a number of media alternatives to best match customer requirements. There are two basic types of cable represented here:

Data Grade - shielded twisted pair

Voice Grade - specified, unshielded twisted pair

Fiber optic (Type 5) can be used between closets and buildings to build the main ring path

Type 1
Data only cable

Type 3
Specified Cable
Voice wires

Type 9
Specified Cable
Data only cable for plenum
and modular furniture

Type 2
Data & Voice

Type 5
Optical fiber cable

Type 6
Data only patch
cable

Type 8
Data only undercarpet
cable

Personal System/2 Communications

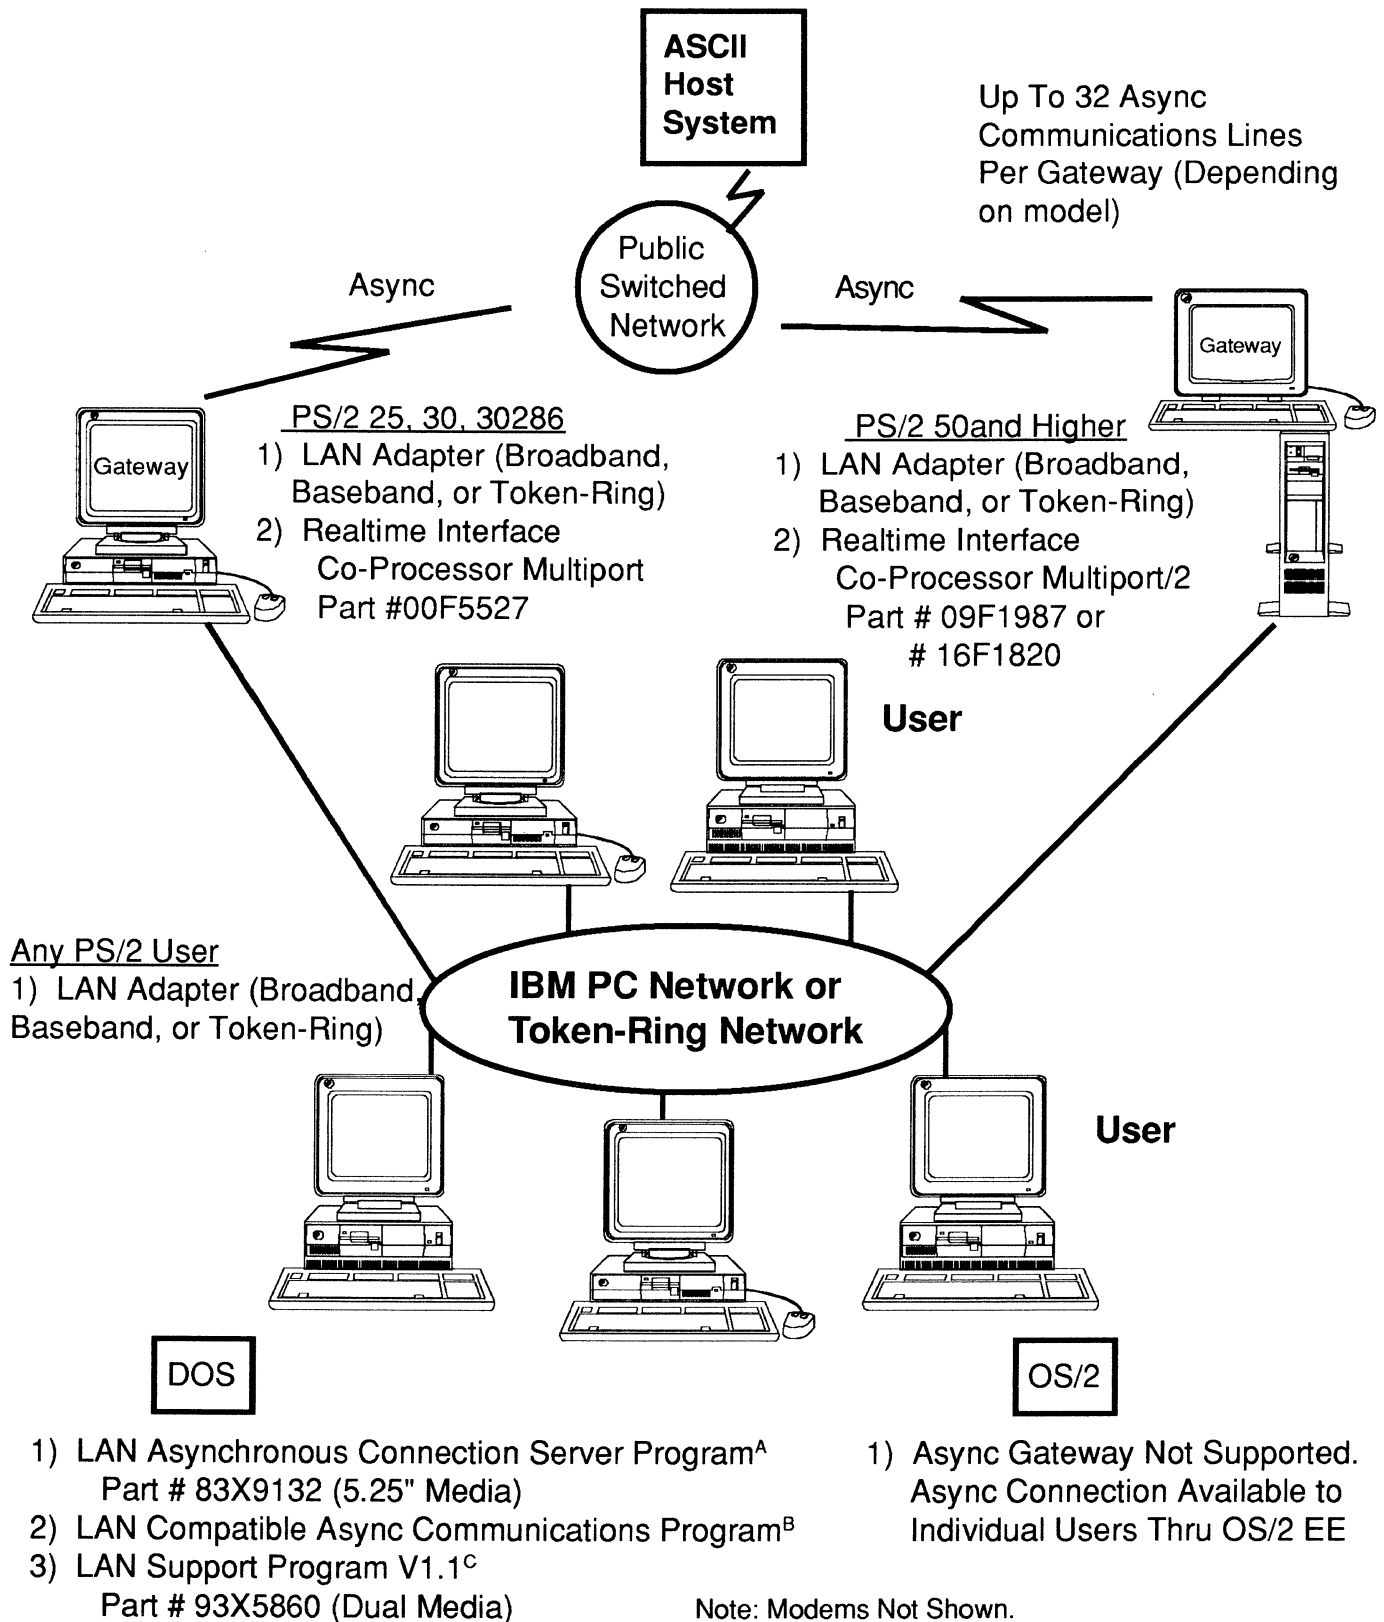

IBM Cabling System Media Distances*

	Data Grade Type <u>1, 2, 9</u>	Voice Grade Type <u>3</u>
Tested transmission rate	4, 16Mbps	4Mbps
Maximum at 4Mbps		
Number of devices	260	72
Number of wiring closets (between signal repeaters)	12	2
	<u>Type 1, 2*</u>	<u>Type 3</u>
- Without Repeaters -		
Station to Closet		
Recommended Max Distance	100m	45m
Closet to Closet		
Recommended Max Distance	200m	120m
- <u>With Repeaters</u> -		
8218 Copper Repeater		
Max Distance between repeaters or closets (Not supported at 16Mbps)	750m	600m
8220 Fiber Converter		
Max Distance between repeaters or closets		(1.5k-2.0km)

- * Note: - Type 9 distances = 2/3 Type 1 distances for Token-Ring
 - All distances are approximate. See Token-Ring Introduction & Planning Guide GA77-3677

Personal System/2 Printers

PROPRINTER II/II XL

Technology	9-wire dot matrix
Description	Entry-level, near-letter-quality, impact printers
Speed	Draft: 200-240 cps Near-Letter-Quality: 40 cps
Fonts	Two NLQ fonts (NLQ--Sans Serif and NLQ II--Courier like) Variable pitch (5, 6, 8.5, 10, 12, 17.1, and PS)
Paper Handling	Built-in adjustable tractors Front slot for single sheets Up to four-part forms support and envelope support Document-on-demand and tear assist Forms load assist Narrow carriage (8" print line) or wide carriage (13.6" print line) models
Other	Standard parallel interface 144 x 240 APA graphics resolution Operator panel selectable fonts, print modes, speeds and pitches Quiet mode Optional asynchronous serial interface Optional 8K print buffer
IBM Part No.	4201002/4202002
IBM Single Unit Price	\$575/\$799

Personal System/2 Printers

PROPRINTER III/III XL

Technology	9-wire dot matrix
Description	Fast, near-letter-quality, impact printers
Speed	Draft: 270-320 cps Near-Letter-Quality: 65 cps
Fonts	Three NLQ fonts (NLQ--Sans Serif, NLQ II-- Courier like, and NLQ II italics) Variable pitch (5, 6, 8.5, 10, 12, 17.1, 20 and PS)
Paper Handling	Built-in adjustable tractors Front slot for single sheets Papark -- one touch paper parking Up to four-part forms support and envelope support Document-on-demand and tear assist Forms load assist Narrow carriage (8" print line) or wide carriage (13.6" print line) models Optional automatic single sheet feeds
Other	Standard parallel interface Standard 7K print buffer Optional 32K print buffer 144 x 240 APA graphics resolution Operator panel push button control for most commonly used print functions Optional RS-232/RS-422 serial interface
IBM Part No.	4201003/4202003
IBM Single Unit Price	\$699/\$925

Personal System/2 Printers

PROPRINTER X24E/XL24E

Technology	24-wire dot matrix
Description	Light to medium-duty, letter quality, impact printer
Speed	Draft: 240-288 cps Letter Quality: 80-96 cps
Fonts	Four resident type styles (Draft 10/12, Courier 10 & PS, Prestige Elite 12) Up to five type styles online using download fonts Optional FontSet™ provides eleven additional type styles to choose from Variable pitch (5, 6, 8.5, 10, 12, 17.1 and PS)
Paper Handling	Built-in adjustable tractors Front slot for single sheets Propark -- one touch paper parking Up to four-part forms support and envelope support Document-on-demand and tear assist Forms load assist Narrow carriage (8" print line) or wide carriage (13.6" print line) models Optional automatic single sheet feeds
Other	Standard parallel interface Standard 14K print buffer 180 x 360 APA graphics resolution Operator panel push button control for most commonly used print functions Optional RS-232/RS-422 serial interface
IBM Part No.	4207002/4208002
IBM Single Unit Price	\$899/\$1,199

Personal System/2 Printers

QUICKWRITER PRINTER

Technology	24-wire dot matrix
Description	Medium-duty, high-function, Selectric quality, impact printer
Speed	Draft: 330-396 cps Letter Quality: 110-188 cps Selectric Font: 55- 66 cps
Fonts	Eight resident fonts (4 LQ/4 Draft) Up to Twelve online with optional fonts pitch (10, 12, 15, 17.1 and PS) Pluggable Cartridges, including Selectric quality fonts and bar codes Downloadable fonts to blank cartridges
Paper Handling	Manual semi-automatic single sheet feed Five-part forms capability Automatic printhead adjustment with envelope option 13.2" print line Optional Pinwheel Forms Feed Optional Adjustable Single Bin Sheet Feed Optional Dual Drawer Sheet Feed Optional Envelope Feed (requires Dual Drawer)
Other	Film or fabric ribbons Standard parallel and serial interface 180 x 240 APA graphics resolution 240 x 240 APA Quietwriter III emulation Optional 32K print buffer
IBM Part No.	5204001
IBM Single Unit Price	\$1,699

Personal System/2 Printers

QUIETWRITER III PRINTER

Technology	IBM exclusive Resistive Ribbon Thermal Transfer
Description	Executive letter-quality, high-function, quiet 45 dBA, non-impact printer
Speed	Draft: 160-274 cps Quality: 100-171 cps Enhanced: 80-136 cps
Fonts	Four resident fonts (Courier 10/12/17 & Boldface) Up to eight fonts online with optional fonts Variable pitch (10, 12, 15, 17.1 and PS) Pluggable Cartridges Downloadable fonts to blank cartridges
Paper Handling	Manual semi-automatic single sheet feed 13.2" print line Optional Pinwheel Forms Feed Optional Adjustable Single Bin Sheet Feed Optional Dual Drawer Sheet Feed Optional Envelope Feed (requires Dual Drawer)
Other	Standard parallel interface Standard 15K print buffer 240 x 360 PEL text resolution 240 x 240 APA graphics resolution
IBM Part No.	5202001
IBM Single Unit Price	\$1,749

Personal System/2 Printers

QUIETWRITER PRINTER MODEL 2

Technology	IBM Resistive Ribbon Thermal Transfer
Description	Executive letter-quality, quiet, non-impact printer
Speed	Letter Quality: 40-60 cps
Fonts	Up to two fonts online via cartridges Variable pitch (10, 12, 15, 17.1 and PS) Variety of optional font cartridges
Paper Handling	Manual semi-automatic single sheet feed 13.2" print line Optional Pinwheel Forms Feed Optional Single Drawer Sheet Feed
Other	Standard parallel interface Standard 15K print buffer 240 x 360 PEL text resolution 240 x 240 APA graphics resolution
IBM Part No.	5201002
IBM Single Unit Price	\$1,039

Personal System/2 Printers

IBM Personal Printers Non-IBM Product Compatibility

The compatibility information presented below is intended to give general guidelines for the attachment of IBM printers to selected non-IBM computer systems.

Compatible means only that the same test case used by IBM to perform this limited test, input to a non-IBM computer system, produced the same printer output as when it was input on an IBM PC.

The IBM printers implement IBM's version of the parallel or serial interface. IBM has performed limited test of the IBM printers and the listed non-IBM computer systems using the appropriate cables and DOS print facilities. There were no problems attributable to interface differences. However, sending data to a powered-off printer may produce unpredictable results.

The only way to ensure satisfactory results is for the user to test the specific printer, computer system, and software combination for the desired results.

IBM MAKES NO WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE WARRANTY OF MERCHANTABILITY AND THE IMPLIED WARRANTY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE COMPATIBILITY OF IBM PRINTERS AND NON- IBM COMPUTER SYSTEMS.

*IBM Desktop Publishing and
PostScript Laser Printing*

Desktop Publishing and PostScript Laser Printing Market Positioning

The Importance of Desktop Publishing and PostScript Laser Printing in Business Today

All across the country, people who already use personal computers for their basic business applications are starting to realize that they no longer have to be satisfied with less than first-rate quality when it comes to their printed communications. Now they can produce documents that look every bit as good as those coming from a printing press. That's the real impact of desktop publishing in every office today.

Why is there so much interest in desktop publishing now? It's easy to see, once you realize that we're all in the publishing business. Every one of us, whether we sell products or services, or are involved in education or government, depends on printed information to get our message across. The more professional the appearance of this message, the better impression it makes on your audience.

Time and time again, studies show that professional looking documents are more readable, and therefore, more persuasive than typewritten documents. Those who have upgraded to PostScript laser printing recognize that their message is more likely to be read, will be better understood, and it will be remembered longer.

And publishing isn't limited to printed documents. Publishing also includes presentations. If you use overhead foil projectors, and you're looking for fast, professional quality results for presentations to your boss, your colleagues, or your customers, there's nothing like creating an overhead foil with your favorite software on the PS/2 and printing it directly on foils with your IBM laser printer.

Whether you want to produce high quality presentations, forms, flyers, advertisements, newsletters, proposals, or general publicity, you don't always have the time and money to have the work done by outside design and typesetting services. With PostScript laser printing for simple documents and desktop publishing for more complex documents, this work can be brought in-house, speeding up the process of document creation, and offering significant cost benefits.

For document readability, typestyle selection is of great importance. You no longer have to settle for 12 point Courier type--you can choose from thousands of type style and size combinations. Also, you're not limited to 300 dots per inch when it comes to resolution. You can proof your publication on the new IBM Personal Page Printer II--a 300 dot per inch PostScript laser printer, and send a file to a typesetter for resolution up to 2,540 dots per inch--the resolution of the finest magazines. This service is available in most cities while you wait, or via modem overnight, at a cost of about \$5 to \$10 per page.

Desktop Publishing and PostScript Laser Printing Market Positioning

Of course, to do this, you must be sure that your desktop publishing system includes PostScript. This page description language, as implemented by Adobe Systems on the IBM Personal Page Printer II, gives you a selection of 43 different typestyles, in an almost unlimited range of sizes.

The number of fonts depends on the software that you are using. For example, with many applications like Aldus PageMaker and Ventura Publisher, you have access to thousands of fonts. Non-PostScript laser printers typically include only 6 fonts in the purchase price. If you wanted to duplicate the thousands of fonts that you get from IBM, you could spend tens of thousands of dollars for cartridges or down-loadable fonts, plus additional memory and disk storage.

IBM's new PostScript laser printer gives you additional capability not available with non-PostScript printers, such as reverse type (white type on a black background), and scaling, which lets you produce letters as large as 2 to the 90th power.

With typesetting services costing between \$100 and \$200 per page in many locations, you don't have to be a mathematician to figure out that you could justify adding full PostScript laser printing capability to an existing IBM system after producing as few as 50 pages.

More and more software products are coming out with universal PostScript drivers, which support the IBM Personal Page Printer II. Most of the popular spreadsheet, word processing, and graphics programs already have PostScript drivers or have announced plans to add them in the future. Now, you can get professional looking results directly from such applications as WordPerfect, AutoCAD, and Excel. And you can directly import files from these programs into major desktop publishing programs for inclusion in more elaborate documents.

And, if you're using software that does not yet provide PostScript support, the IBM Personal Page Printer II has the ability to emulate non-PostScript printers such as the Hewlett-Packard Laser Jet Plus and the IBM Proprinter.

With IBM's new PostScript laser printer, you can do desktop publishing with Aldus PageMaker, Ventura Publisher, the IBM Interleaf Publisher, or a low-cost, entry-level publishing package. If you're just looking for a higher quality typeset look that you want for output from word processors or spreadsheet programs, this is the laser printer to attach to the PS/2 or AT on your desktop.

With its 300 dot per inch output, its crisp, sharp, black print, its quiet, reliable operation, and its ease of use, this printer can really help an organization improve the quality of its business communications.

Desktop Publishing and PostScript Laser Printing Market Positioning

With the appropriate communications adapters and software, an IBM publishing system can communicate to other IBM systems in a network. You can use the services of your already installed network to transmit publishing files to other locations in your business. And when you are not doing publishing, a great variety of business software is available to run on your IBM PC or PS/2.

Desktop publishing isn't a matter of typographic text alone. Charts, graphs, and original artwork can be created with hundreds of graphics, paint, draw, and charting applications. And when you add the capability to include any available photograph or piece of line art, your publication takes on the look of a truly professional piece of communication. This is where a scanner comes in.

Find a pie chart, bar chart or line art that adds life to your message. In seconds, you can have a copy of the image to place in your document at any size, reduced or enlarged, that is best suited to your message.

With the superior resolution of a 128 gray level scanner--the IBM PageScanner--you can do just that. This scanner, for use on the PS/2 Model 50 or higher, provides 300 pel per inch scanning resolution in black and white or up to 128 shades of gray, and up to 600 pel per inch output resolution. Its open flatbed design accommodates pages, bound books and magazines.

Imaging is hot today, and the IBM PageScanner provides the high-quality gray scale support needed to give you the flexibility that full-function desktop publishing offers.

If you want to scan text, add IBM TextReader Optical Character Recognition software to scan typed letters, news releases, and input from a variety of sources. This is a great alternative to re-entering text, and can be used in law offices, for example, to read in lengthy typed documents such as leases and wills, for easy revision with a word processor.

Add IBM ImageEdit Version 2 image scanning software, and you can touch up and annotate photographic and drawn images. Both TextReader and ImageEdit run under the Microsoft Windows environment and have familiar icon-based user interfaces similar to those used by PageMaker. Once you've used all these desktop publishing elements together, you'll never go back to your old ways of producing documents!

With the IBM Personal Page Printer II and all the related products for publishing and typographic quality printing on an IBM platform, you can be assured of the growth potential, quality support, and the leading edge publishing solutions that will continue to bring the benefits of desktop publishing technology to all your applications.

Desktop Publishing and PostScript Laser Printing Product Line

IBM Personal Page Printer II

(4216030)

- θ Intelligent PostScript Laser Printer
- θ For Desktop Publishing
- θ For General Business Applications--word processing, spreadsheet, data base, graphics
- θ 43 typestyles available at all times
- θ Prints on cut-sheet paper, letterheads, colored paper, transparencies, adhesive labels, envelopes
- θ Connects to parallel (LPT), serial (COM), or AppleTalk port
- θ High speed parallel driver supplied for DOS environment
- θ Shareable via standard devices, IBM and other local area networks
- θ HP LaserJet Plus and IBM Proprinter emulation
- θ 16.67 Mhz Motorola 68000 microprocessor with 2Mb of RAM
- θ Optional 2 Mb memory expansion for additional font storage
- θ Print speed of up to 6 pages per minute

IBM Personal Pageprinter

(4216020)

- θ Intelligence in Personal Pageprinter Adapter Program 1.3.1 which is loaded to a card located in the system unit
- θ For Desktop Publishing
- θ For General Business Applications--word processing, spreadsheet, data base, graphics
- θ 43 typestyles available: 13 at start-up, others downloaded as needed
- θ Prints on cut-sheet paper, letterheads, colored paper, transparencies, adhesive labels, envelopes
- θ Connects to video (EPT) port
- θ Shareable via IBM local area networks
- θ IBM Proprinter emulation
- θ 10 Mhz Motorola 68000 microprocessor with 2Mb of RAM
- θ Print speed of up to 6 pages per minute
- θ Available as printer subsystem, Option SolutionPacs, System SolutionPac

Desktop Publishing and PostScript Laser Printing Printer Selection

Which IBM PostScript laser printer best meets the customer's needs?

*This table lists the characteristics of the two IBM PostScript laser printers
and provides a basis for their selection.*

	IBM Part No.	Kit Includes:	Minimum System Requirements
IBM Publishing System Option/A Kit (for IBM PS/2)	75X8275	PS/2 Adapter Card, 4216 Personal Pageprinter, PS/2 Mouse, Publishing Soft- ware* (3.5 media), User's Guides, 90-day Support	IBM PS/2 Mod 50 and Higher 8513 or 8514 VGA or 8507 Display DOS Version 3.3+
IBM Publishing System Option Kit (for IBM PC AT & XT w/5.25" Diskette Drives)	75X8210	PC Adapter Card, 4216 Personal Pageprinter, Publishing Software* (5.25" media), User's Guides, 90-day Support	IBM PC AT or IBM PC XT 286, Enhanced Color Display, EGA Card w/128K, 640K Memory, Compatible Mouse, DOS version 3.3+
IBM Publishing System Option Kit (for IBM PS/2 Model 30-021 w/3.5" Disk- ette Drives)	75X8274	PC Adapter Card 4216 Personal Pageprinter, Publishing Software* (3.5" media), User's Guides, 90-day Support	IBM PS/2 Model 30-021, 8512 (B&W) or 8513 or 8507 (Color) Display, PS/2 Mouse DOS version 3.3+
IBM Solution Pac Personal Publishing System (w/Color Display)	75X8269	IBM PS/2 Model 30-021 8513 Color Display, PS/2 Mouse, DOS version 3.3+, Installation Diskette, PC Adapter Card, 4216 Personal Pageprinter, Publishing Soft- ware* (3.5" media), User's Guides, 90-day Support	
IBM Solution Pac Personal Publishing System (w/Mono- chrome Display)	75X8268	(Same as above #75X8269 but with 8512 Monochrome Dis- play)	

* Software includes: IBM Pageprinter Adapter Program (appropriate version depending on Pageprinter Adapter Card), Aldus Pagemaker and Microsoft Windows with Write and Paint.

IBM Desktop Publishing

	IBM Part No.	Kit Includes:	Minimum System Requirements
IBM Interleaf Publishing Program	25F5911	3.5" media; fully intergrated software package which can be used to create documents with multiple type fonts, complex formats, data driven charts, complex graphics and scanned images ¹	IBM PS/2 Mod 50 and Higher with 6Mb RAM & 40Mb Fixed Disk Drive, PS/2 Mouse 8513 or 8514 VGA or 8507 Display, DOS Version 3.3+ IBM 4216-020 or 030 & Adapter & Program
IBM Interleaf Publisher Data Export	06F2458	Software package allows conversion of ASCII Interleaf documents into documents processable by the Publishing System Bookmaster Program on the IBM 9370 or S/370 ¹	(Same as above)

IBM Personal Pageprinter Subsystem²

Configured for PS/2 Model 50, 60, 70, or 80 07F4363

Confidured for PS/2 Model 30 07F4361

Configured for IBM PC AT or IBM PC XT 286 07F4362

Supplies:

Toner Cartridge (est. yeild: 4,000 pages) 6190603

Photoconductor Unit (est. yeild: 120,000 pages) 6190604

Cleaning Unit (est. yeild: 40,000 pages) 6190605

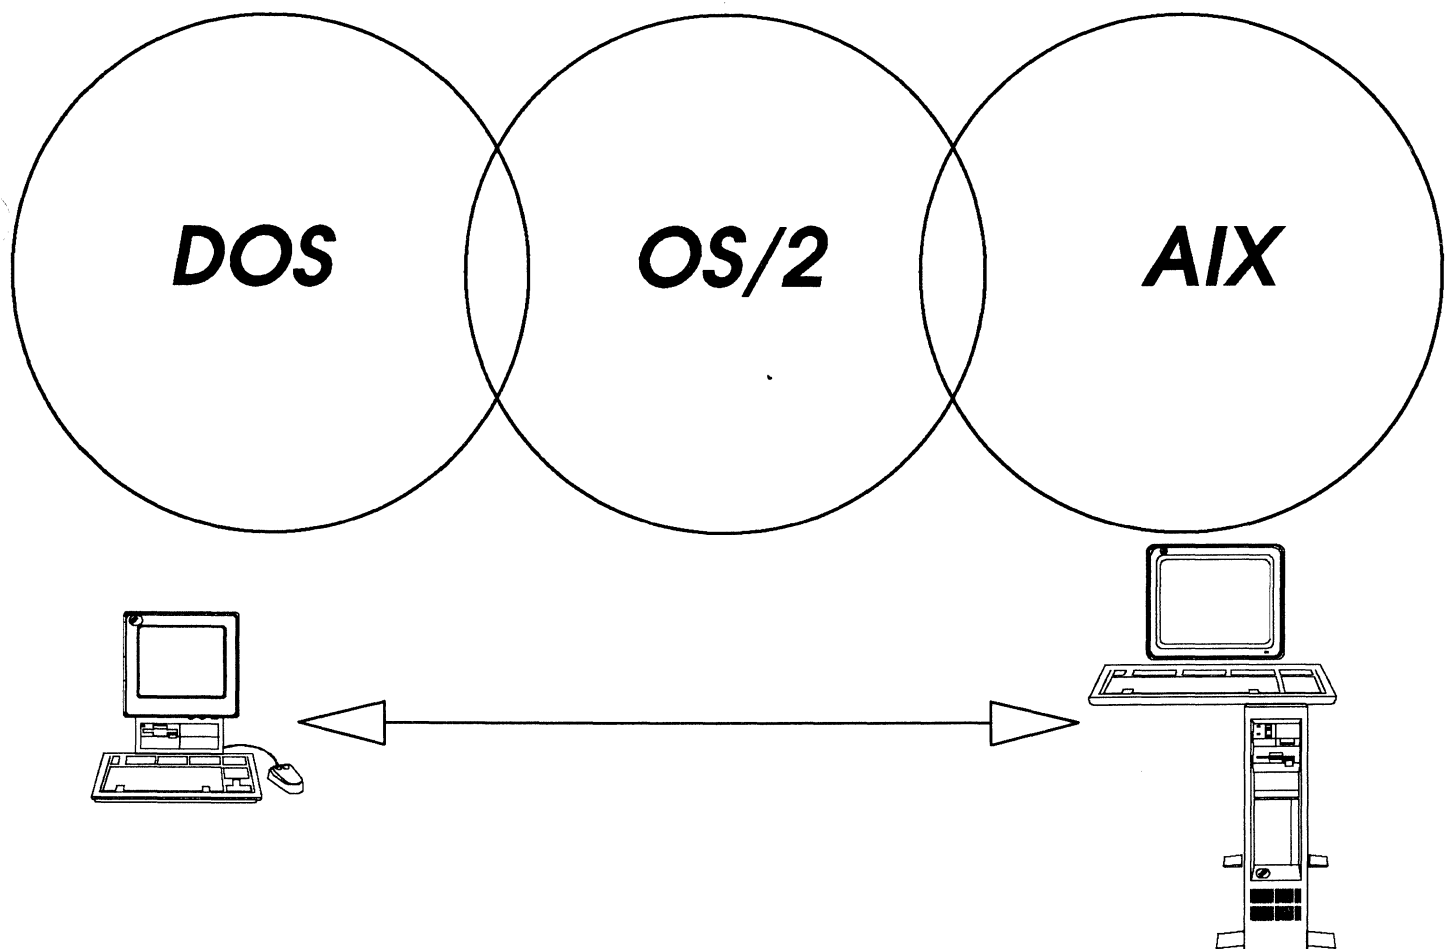

¹Additional Product information and specifications can be found in IBM Programming Announcement Green Letter #NDD 88-186.

²All subsystem components are available individually; consult IBM announce letters for part numbers and prices.

IBM PS/2 Operating Systems

Personal System/2 Operating Systems

Personal System/2 Operating Systems

IBM Disk Operating System (DOS) Version 4.0

The Single-Tasking Operating System of Choice

HIGHLIGHTS

Large Fixed Disk Support

It lets you store files greater than 32 MB. In fact, you can store files that are as large as your PS/2's fixed disk.

Expanded Memory Support

It allows you to address memory above 640KB and run programs written to Expanded Memory Specification (EMS) 4.0.

User Interface

It supplies user-friendly support providing straightforward menus of DOS applications and utilities, and extensive on-line help.

Installation Utility

It offers easy instructions to speed overall installation and help to customize DOS 4.0.

Video and Graphics Support

It provides for new video modes, display of over 25 lines of text and graphics printing.

Extended National Language Support

Menus, messages and publications are available in 14 languages - 11 translated and three versions of English, including US, UK and universal. Oriented language translations and right-to-left language supplements can also be supported.

19 Keyboard Layouts

Support a wide range of business and industry applications for 23 countries/areas. Additionally, layouts are now available for the UK, France and Italy.

Enhanced Warranty and Service

As with IBM Operating System/2™ the no-extra-charge service plan is available for DOS 4.0 after the three month warranty expires and extends up to 12 months after general availability.

Personal System/2 Operating Systems

DOS *at a glance*

Version Number	Memory Occupied	System Supported	Key Hardware/ Functions Supported
2.1	24KB	XT™, PC, PCjr.	Small memory systems and applications.
3.0/3.1	36KB	AT ^R , XT, PC, PCjr.	IBM PC Network (DOS 3.1), EGA graphics and IBM Color Printer.
3.2	44KB	AT, XT, XT286 PC, PCjr., PC Convertible	IBM Token-Ring Network, 3.5 inch diskettes and drives; IBM Enhanced Keyboard.
3.3	52KB ¹	PS/2, AT, XT XT286, PC, PCjr. PC Convertible	Large partitioned fixed disks files; Extended National Language Support.
4.0	62KB ¹	PS/2, AT, XT XT286, PC, PCjr.	Large non-partitioned fixed disk files; Menu-based user interface; Expanded memory support; Full display and printer support; Extended National Language Support; Enhanced Warranty; Enhanced installation menus.

¹ May vary depending on system configuration.

Personal System/2 Operating Systems

DOS 4.0

Questions And Answers

MEDIA

Q. Is DOS 4.0 available in 3.5-inch and 5.25-inch media?

A. Yes, in separate shrink-wrapped packages. DOS 4.0 3.5-inch version contains two 720KB double-sided diskettes. DOS 5.25-inch version contains five 360KB double-sided diskettes.

UPGRADE PROVISIONS

Q. Can you upgrade existing DOS packages to DOS 4.0?

A. Yes. Customers may acquire DOS 4.0 (in 3.5-inch or 5.25-inch diskettes) packages as upgrades from all prior levels of DOS (1.0 through 3.30) at their dealers or through their marketing representatives with proof of their license. The upgrade kits are identical to full program packages, but are available as upgrades to those customers who have proof of license of a prior version.

POSITIONING

Q. How is IBM DOS 4.0 positioned relative to OS/2?

A. DOS provides significant new function and is the required operating system for the 8086 PS/2 Model 25 and 30, and the IBM PC, XT, and Convertible. DOS, with the many thousands of applications, will also provide an excellent entry single-tasking base system for the 80286- and 80386-based PS/2 Models and the original PC XT/ 286 and PC AT. The full function, multitasking, database and communications capabilities of OS/2 are a natural and compatible growth path for DOS 4.0 users who outgrow the single-tasking architectural limitations of DOS 4.0. And the new DOS Shell provides an interface similar to OS/2's Presentation Manager which further eases potential migration.

Q. How does DOS 4.0 differ from 3.3?

A. DOS 4.0 offers more than 30 new and enhanced commands and utilities while remaining upwardly compatible. It supports the same IBM PC and PS/2 hardware systems except for PCjr. DOS 4.00 is the first release of DOS which carries a program warranty with associated defect service for one year from announcement.

Personal System/2 Operating Systems

Other Highlights of the DOS 4.0 enhancements over 3.3 include:

- Support of large hardfiles over 32 megabytes that allows a single file to be as large as the media. Conversely, DOS 3.3 requires partitioning of large disk into logical drives of 32 megabytes or less.
- A new DOS Shell provides group, file, and directory services that are user-friendly alternatives to the commands line. The DOS Shell introduces the user to an OS/2-like presentation manager. DOS 3.3 does not provide this menu-driven file organizer and application selector.
- DOS 4.0 supports the use of memory, implemented with the IBM Expanded Memory Adapter and Memory Expansion Option cards, above 640KB by applications written to the Lotus/Intel/Microsoft 4.0 Expanded Memory Specification (EMS). DOS 3.3 requires the function of the IBM Workstation Program to support the IBM Expanded Memory Adapters.
- The DOS Installation procedure (SELECT) has been enhanced with full screen interactive menus to aid the user in configuring the richer function set provided by DOS 4.0 versus 3.3.
- Video/graphics support has been enhanced to provide printing of graphics screens, additional video mode settings, and display of more than 25 lines of text.
- For worldwide users, DOS 4.0 has been translated into 11 languages, and, in addition, three English versions (U.S., U.K., and Universal) are available. DOS 4.0 allows separately available translation supplements for Asia Pacific languages, and provides right-to-left support to separately available Arabic and Hebrew supplements for these languages. New keyboard layouts for U.K., France, and Italy are now supported.

HARDFILE SUPPORT

Q. What is large hardfile support?

A. With DOS 4.0, a fixed partition of greater than 32MB can be defined. Prior version of DOS were constrained to a maximum 32MB fixed disk partition size. As a result, files larger than 32MB can now be used with DOS 4.0 without multiple partitions. This has been accomplished by enhancement to the DOS File Allocation Table (FAT) architecture which includes a new addressing format and other improvements to maintain performance in processing larger file. The ability to install on and utilize currently formatted hardfiles is maintained.

EMS

Q. What is Expanded EMS?

A. DOS 4.0 now provides operating system support for those developers who write applications that require additional memory above the DOS 640KB limit. The application must be written to the programming interfaces required by the public domain Lotus/Intel/Microsoft Expanded Memory Specification 4.0, which is known as LIM 4.0 EMS. Memory above 640KB is then addressed through a combination of a DOS 4.0 EMS device driver and IBM memory cards that contain additional memory. The 80386-based systems emulate these memory cards using their virtual paging capabilities.

In addition to supporting these EMS dependent applications, DOS 4.0 can utilize these cards/emulation to provide memory relief and associated performance improvement for specific DOS functions.

However, the PS/2 Multifunction Adapter used for expanded memory on the Model 30 286 is not compatible with the LIM EMS 4.0 drivers provided with DOS 4.0. The AboveDisc 2.0 program (P/N 30F5448) must be used.

Personal System/2 Operating Systems

MEMORY

- Q. How much memory does DOS 4.0 require?
- A. Although DOS 4.0 base requires approximately 62KB of memory on a PC AT, it will vary up and down on other personal computer configurations. Using the DOS Shell Extension requires a minimum of 256KB of memory. Systems with a minimum of 512KB memory are recommended for implementation of other DOS 4.0 extensions.
- Q. Now that DOS provides memory relief beyond 640KB, what benefits exist to switch to OS/2?
- A. OS/2 is designed for those customers who require protected large real or virtual addressing capability and/or priority-based pre-emptive multitasking memory. OS/2 is also designed to exploit the 80286 and 80386 architecture, which includes the MicroChannel. Enhancement of DOS to provide support to EMS applications for memory relief is an interim solution until these applications requiring the large memory capabilities of the high-end processors as provided by OS/2.

WHAT YOU GET

- Q. What comes with DOS 4.0?
- A. The two full DOS 4.0 packages contain either two 3.5-inch double-sided 720KB or five 5.25 inch double-sided (360KB) diskettes. Included are the DOS programs (including the DEBUG utility) the DOS commands, the Advanced BASIC Interpreter, and the Line Editor (EDLIN).

The publications in the package are Getting Started with DOS 4.0, and Using DOS 4.0. A DOS Shell Reference Card is included along with the IBM Program License Agreement, Program License information to support warranty and service, a proof of license, and an order form to obtain free National Language keyboard layouts from a fulfillment house. A separate offering, DOS 4.0 Command Reference, is being made available through IBM authorized dealers to provide detailed information for each DOS command and to supplement the Using DOS 4.0 publication.

Personal System/2 Operating Systems

- Q. Does IBM offer multiple license agreements for DOS 4.0?
- A. Additional Licenses of the Program Package (the rights to make multiple copies) are available. Additional License Upgrades are also available to prior owners. Additional licenses are available through IBM marketing representatives and require volume purchase qualification. The publications Getting Started with DOS 4.0 and Using DOS 4.0 are also separately available in a documentation-only offering for \$40 (IBM retail price). This provides a source for supplemental documentation for those customers buying DOS 4.0 Additional Licenses (Right-To -Copy) and are available only from IBM marketing representatives.
- Q. Is the DOS Technical Reference Manual still sold separately?
- A. Yes. The updated DOS Technical Reference and Application Programming Manual, contains one 3.5-inch and one 5.25-inch double-sided diskette, with the following programs: LINKER, DEBUG, EXE2BIN, VDISK.ASM AND LIB. It is available from both IBM Authorized Dealers and IBM marketing representatives and is warranted with associated defect service for one year from the announcement of DOS 4.0. It includes the DOS 4.0 Technical Reference and Programming manual, and a Quick Reference Card, along with the program license agreement, program license information, and proof of license.

WARRANTY & SERVICE

- Q. What kind of warranty is available?
- A. DOS 4.0 and the DOS 4.0 Technical Reference are the first DOS releases to provide a program warranty in addition to a media warranty. The program warranty provides for defect service to customers through registered Service Coordinators who may be dealers, or designated representatives for accounts serviced by IBM. The program warranty is for three months after purchase and the service period for DOS 4.0 will extend for one year after the availability of the product (day of announce). There is no charge for the service.
- Q. What does the warranty provide?
- A. IBM will respond to a request from a registered Service Coordinator to a defect in an unaltered DOS 4.0 by issuing a corrected code, corrected documentation, restriction, a bypass or a refund as determined by IBM. The Statement of Service in the program License Information that comes with DOS 4.0 should be referenced for details on procedures.
- Q. Who are Service Coordinators?
- A. They are the IBM Authorized Dealers, personnel designated by IBM customers, Education Product Coordinator (EPCs) or branch office marketing representatives who are registered to report defects to IBM Central Service via ServiceLine, the electronic online database, and/or via telephone. They are provided a diskette for access to ServiceLine and a Service Coordinator's Guide to assist them with problem determination and reporting. These registered service coordinators are responsible for assisting customers in determining and reporting suspected problems and receiving corrective service.
- Q. Does the warranty provide all customers with an IBM hotline number?
- A. IBM will support only registered Service Coordinators with telephone assistance in problem diagnosis and resolution. Service Coordinators may call the IBM Support Center at any time if they require assistance above that provided by ServiceLine, the electronic online data base.

Personal System/2 Operating Systems

DOS SHELL

Q. What is the DOS Shell?

A. The DOS Shell provides an alternative to the command line A> user interface. It allows start-up of applications, access and processing of files, and hardcopy output of processed data. Help information is provided relevant to the task at hand. These actions are accomplished by straight forward selections from easy-to-use menus using either a mouse or keyboard. The Shell will run in either text or graphics mode and is similar to the OS/2 Presentation Manager. Installation of the DOS Shell is optional.

Q. Is the DOS Shell based on Microsoft Windows 2.03?

A. No. It is based on several years of research into user-friendly processing that is consistent with IBM's SAA Common User Access (CUA) specifications.

IBM DOS 4.0 & WINDOWS KIT FOR THE PS/2

Q. What is it?

A. The IBM DOS 4.00 & Windows Kit for PS/2 is a set of software tools for fixed disk versions of the PS/2 Models 25, 30, 50 and 60 that provides an easy-to-use environment for creating composite documents, included illustrations, graphs, and mathematical formulas. The Kit consists of DOS 4.00, Microsoft Windows/286, a comprehensive online tutorial, graph- and formula-editing programs, a spellchecking program, an installation and user's guide, and an installation program. Microsoft Windows/286 includes a word-processing program, a drawing program, a cardfile program, and numerous other desktop programs.

OTHER

Q. Is this the last DOS product now that OS/2 is entering its second year as the personal computer operating system?

A. IBM DOS 4.0 is the 9th release of DOS and is the second developed by IBM. It is the primary operating system for 8086 and 8088 processors. IBM will continue to enhance DOS to protect customer's investment in the large base of low-end processors and applications, and to support IBM low-end processors such as the PS/2 Models 25, 30 and 30 286 that are marketed.

Q. Can customers still buy DOS 3.3 now that DOS 4.0 is available?

A. Although DOS 4.0 is an upwardly compatible enhancement, DOS 3.3 will continue to be marketed for those customers whose migration plans do not require the additional DOS 4.0 function.

Personal System/2 Operating Systems

Personal System/2 Operating Systems

IBM Operating System/2

Full Function, Multitasking Operating System with Database and Communications

HIGHLIGHTS

80286/80386 Architecture Support

Helps you create and run sophisticated applications that take advantage of IBM hardware built with 80286 and 80386 microprocessors.

16MB Addressable Memory Support

Enables developers/users to take full advantage of memory beyond 640KB (up to 16MB) for applications and data. This means that functionally such applications that process large amounts of data are now usable.

Concurrent Processing of Multiple Applications (Multiprogramming/Multitasking)

Allow the user to perform many operations concurrently, enhancing productivity and user convenience.

Enhanced Ease-of-Use Facilities

Quicker learning for computer novices, simplified operations for beginners and experienced users alike.

Presentation Manager

Provides windowing and graphics functions along with a consistent interface for applications. Improved productivity, greater transfer of skills, faster, easier application development.

DOS Compatibility

Makes it possible to continue using many DOS-based programs unchanged. Protects investment, and smooths transition from DOS to OS/2.

Contextual On-Line Help

Gives you assistance to complete the task at hand.

Communications Manager

Puts comprehensive communications capabilities in a single computer. Flexibility to receive and send data through multiple concurrent communications over a wide range of connections.

Data Base Manager

Offers facilities for developing and working with a relational database.

SAA Participation

Provides guidelines for consistency across applications and system environments

Enhanced Warranty and Service

Provide 3-month warranty coverage and a 12-month free service plan. Protects OS/2 investment, increase reliability, availability and serviceability

Personal System/2 Operating Systems

OS/2 STANDARD EDITION Version 1.1

Available 10/88 - \$340

Exceeds 640K memory limit, up to 16MB

Flexibility of Virtual Memory

Run multiple programs or program tasks

Presentation Manager
Enhanced Graphics
Windowing

On line contextual Help

Large file support (greater than 32MB)

DOS compatibility

Provide S.A.A. facilities for Common User Access Common Programming Interface for compilers

Full Screen Text Editor

Enhanced Spooler

OS/2 EXTENDED EDITION Version 1.1

Available 11/88 - \$830

Includes all Facilities of Standard Edition 1.1
PLUS

Communications
3270 Emulation (SDLC/DFT/Token Ring)
3101 Emulation (ASYNCR)
DEC VT100 Emulation (ASYNCR)
File Transfer (SDLC & ASYNCR)
APPC (LU6.2)

Programming Interfaces: APPC, SRPI, ACDI

Multiple Concurrent Communications

Full Relational Database with Structured Query Language

Provide S.A.A. Facilities for Common Communications, support

Local Area Network Support

Personal System/2 Operating Systems

IBM Operating System/2 Applications

The OS/2 application base is expanding dynamically: every month new applications are announced or become available on the market.

In order to provide information on these exciting offerings IBM and Microsoft have created an Application Database that you can consult and find the most current listings of products. These listings are available through the following facilities:

Facility	Audience
Customer Support System (CSS)	IBM Authorized Dealers
ASKINFO	Customer Technical Coordinators
IBMLINK	Customer Technical Coordinators
EQUAL	IBM Internal Users
ONLINE	Microsoft Customers

Atlanta Electronic Bulletin Board: (404) 988-2913

The Application Database is based on information provided by the companies listed as the sources for the applications. Each company has certified that it is marketing or intends to market the listed application(s) that run in the OS/2 protect mode.

IBM and Microsoft have not evaluated the listed applications of other companies, and do not recommend or endorse them. Users should contact the company directly to verify product function, prerequisites, price, availability and suitability for the user's purposes.

The information in the Application Database is provided "AS IS" without any kind, either expressed or implied, warranties of merchantability or fitness for a particular purpose. Neither IBM nor Microsoft is a party to any agreement or warranties relating to products of other companies.

The information in the Application Database could include inaccuracies or typographical errors. IBM and Microsoft may change the contents without notice.

There are other companies whose products are not included in the Database. The procedure to apply for inclusion in the Operating System/2 application database is to submit a written request to :

IBM Corporation
AG-ZIP 4607
P.O. Box 1328
Boca Raton, FL 33429-1328

Personal System/2 Operating Systems

IBM PS/2 RPG II Application Platform IBM PS/2 RPG II Application Toolkit

HIGHLIGHTS

- * Provides the capability to convert, develop, and execute System/36 RPG II applications on PS/2-OS/2 platform in a multi-user operating environment.
- * Establishes a cost-effective entry into the world of traditional data processing systems...addressing the needs of small business and small departments or locations within medium and large businesses.

Two separately ordered software packages are provided:

1) IBM PS/2 RPG II APPLICATION PLATFORM (P/N 6280294)

- * Provides a multi-user execution environment for RPG II applications that have been converted by the RPG II Toolkit to run on a PS/2 with OS/2.
- * It offers a subset of Operation Control Language (OCL) and key System/36 utilities.
- * A terminal manager supports up to 8 serially attached workstations, providing multiple end users with concurrent access to RPG II applications executing on the PS/2 central processor.
- * Attached workstations can be any mix of the following devices:
 - 3151 ASCII Display (Model 3X/4X) with the Cartridge for Multi-User System
 - Attachment (P/N 09F6151 or FC #8005).
 - Any PS/2 Model with the Enhanced Keyboard
 - Personal Computer AT^R Model 339 or Personal Computer XTTM Model 286 with Enhanced Keyboards.

Attached PS/2's and PC's can execute stand-alone DOS 3.3 or OS/2 applications (such as word processing and spreadsheets) using a hotkey capability from the RPG application.

2) IBM RPG II APPLICATION TOOLKIT (P/N 6280293)

Provides the RPG II Compiler for converting existing RPG II applications or developing new ones to run on IBM Personal System/2.

In addition to the compiler, the RPG II Toolkit includes a Screen Design Aid (SDA) and Screen Format Generator (SFGR) for designing, creating and processing display format specifications.

RPG II Auto Report is supported, as is the Date File Utility (DFU) list creation.

RPG T specifications (for telecommunications) are not supported; however, batchtransmission of files is provided by OS/2 Extended Edition 1.0.

Software prerequisites for the RPG II Toolkit are OS/2 Standard Edition 1.0 or OS/2 Extended Edition 1.0 and the PS/2 RPG II Application Platform.

Personal System/2 Operating Systems

SUMMARY OF HARDWARE AND SOFTWARE SUPPORTED AND/OR REQUIRED FOR THE PS/2 RPG II APPLICATION PLATFORM

System supported

Personal System/2 Models 50 and above capable of running OS/2; the attached PS/2 display, any model, serves as the system console and may also be used as a user workstation.

Memory Requirements

Minimum memory requirement is 1MB, IN ADDITION to OS/2 memory requirement.

Maximum required to support 8 attached workstations is 2.5MB OVER OS/2 requirements.

Software Required

OS/2 Standard Edition 1.0 or OS/2 Extended Edition 1.0 is required on the PS/2 control processor.

Printers Supported

IBM Proprinter™, all models; IBM 4224 Printer, Models 3XX (Proprinter Compatible Model).

Attached Workstations Supported

IBM 3151 ASCII Display Models 3X or 4X with the Cartridge for Multi-User System Attachment. Any IBM PS/2 with IBM Enhanced Keyboard; Personal Computer AT Model 339 and Personal Computer XT Model 286 with IBM Enhanced Keyboards.

Attachment Support

PS/2 Serial Port (RS232-C); IBM PS/2 Dual Async Adapter/A (RS232-C); 1 supported IBM Realtime Interface Co-Processor Multiport/2 Adapter (RS232-C/RS422-A). TMProprinter is a trademark of the International Business Machines Corporation.

Questions and Answers

Installation/Configuration

- Q. Must I have a PS/2 'host' or can I use a PC/AT or PC/XT 286?
- A. The host system must be a PS/2 capable of running OS/2. The PC/AT 339 and the PC/XT 286, both with the Enhanced Keyboard may be used as a workstation using the Independent Workstation (IW) Program shipped with the RPG II Platform. Any PS/2, with Enhanced Keyboard, may also be used as a workstation using the IW Program.
- Q. Must OS/2 be installed or can I use DOS on the host PS/2?
- A. OS/2 Standard Edition 1.0 or OS/2 Extended Edition 1.0 must be installed on the host PS/2. An attached PS/2 or PC, as an independent workstation, may use either OS/2 or DOS; you can 'hotkey' out of the RPG session to the OS/2 or DOS session on the attached PS/2 or PC.
- Q. Will the RPG II Platform run under the OS/2 Presentation Manager?
- A. The RPG II Platform will not run under the OS/2 Presentation Manager but will run in an independent full screen session.

Personal System/2 Operating Systems

Q. How many users are supported?

A. Up to eight workstation users are supported via attached 3151 ASCII Displays or the attached PS/2 or PC workstations. In addition, the display associated with the host PS/2, which serves as the system console, can also be used as a user workstation. Printers DO NOT count as user workstations. Response time and performance of the workstations will depend on the host PS/2 configuration and the concurrent use of the applications.

Q. How many printers are supported?

A. Printer support is via the OS/2 spooler. Two (2) printers are supported on the host PS/2 - one via the Parallel Port and one via the Serial Port, each via RS232-C and RS422-A interfaces. If the Multiport/2 Adapter is used, no other terminal connections are supported for attaching user workstations.

Q. Is there any limit on the length of cables between a workstation and the host PS/2?

A. The RS232-C interface supports a local cable attachment of 50 feet except on the Multiport/2 Adapter, where the limitation is 40 feet. The RS422-A interface supports a cable attachment of up to 4000 feet.

Q. How do I connect workstations to the PS/2 host?

A. There are three ways to attach terminals:

1) One terminal via the standard Serial port (RS232-C) on the PS/2.

2) Two terminals via the Dual Async Adapter/A (RS232-C). Only one (1) Dual Async Adapter/A is supported per 'host' PS/2.

3) Up to 8 terminals via the Realtime Interface Co-Processor Multiport/2 Adapter. This adapter supports up to 8 terminals via the RS232-C interface or up to 4 each via RS232-C and RS422-A interfaces. If the Multiport/2 Adapter is used, no other terminal connections are supported for attaching user workstations.

Q. Is there any limit on the length of cables between a workstation and the host PS/2?

A. The RS232-C interface supports a local cable attachment of 50 feet except on the Multiport/2 Adapter, where the limitation is 40 feet. The RS422-A interface supports a cable attachment of up to 4000 feet.

Personal System/2 Operating Systems

SYSTEM/36 COMPATIBILITY

- Q. Can I run RPG II programs developed on the PS/2 on the System/36?
- A. Yes, after recompiling. In fact, the RPG II Toolkit can be used as a standalone programmer development system. Data file conversion from the PS/2 ASCII format to the System/36 EBCDIC format is provided.
- Q. Is the PS/2 RPG II compatible with the System/36 RPG II?
- A. There are some differences. The major ones are:
- 1) MRT's run as SRT's on PS/2.
 - 2) The 'T' specification (Telecommunications) is not supported.
 - 3) Any System/36 Assembler subroutines must be rewritten for PS/2 Assembler.
- Q. Does the 64K program size limit for RPG II programs exist on the PS/2?
- A. Yes; to maintain compatibility back to a System/36, the RPG II program size on the PS/2 is the same as on the System/36.
- Q. Can I write communications programs using Interactive Communication Feature?
- A. No communications are supported by the RPG II Platform. All communications required OS/2 Extended Edition 1.0 or 1.1 facilities. These facilities are not accessible through the RPG II Platform application.
- Q. Is record locking provided by RPG II Platform?
- A. Yes, data management is implemented on the PS/2 in the same manner as the System/36.
- Q. Does PS/2 RPG II conform to SAA?
- A. RPG II is currently not an SAA language.
- Q. Does the PS/2 RPG II Application Platform on PS/2 replace the low end model of the System/36, the Model 5363?
- A. No. The RPG II Platform simply provides a way to make the RPG II business solutions of the System/36 available on the PS/2 as a standalone multiuser system. There are major functional differences that must be considered in evaluating the customer requirements. However, the PS/2 RPG II Application Platform system can be considered the low-cost entry into the System/36 family, including the 5363, since the RPG II business solutions are upward migratable to the System/36.
- Q. If I have an RPG II program on a System/36, how do I get it to run on a PS/2?
- A. Source code is required for compiling using the RPG II Toolkit. It is the user's responsibility to obtain the rights and licenses required to run the application on the RPG II Platform.

Personal System/2 Operating Systems

PS/2 RPG II Application Platform and AIX PS/2

The AIX PS/2 Operating System provides both a shared logic and shared resource (LAN) multiuser system capability on PS/2 (386 processors only) based on the UNIX[®] operating system. It offers very rich functional capability for engineering, scientific, and other compute intensive work.

The advantages that the RPG II Platform solution may have over an AIX PS/2 solution are:

- 1) There are thousands of RPG commercial oriented applications available today, providing a wide base of business solutions that can be ported to the PS/2 system. RPG is a powerful, easy to use programming language designed for business applications. While there are also commercial oriented UNIX applications available, these are generally written in a variety of other programming languages.
- 2) RPG II Platform and RPG II Toolkit software can operate on PS/2 Models 50 and higher (286 and 386 processors), while AIX PS/2 operates on PS/2 386 processors only.
- 3) The System/36 affinity of the RPG II Platform solution may provide a more desirable growth path for the customer, especially if that customer has System/36 systems installed in other locations.

AIX PS/2, however, offers extensive functions including:

- 1) Supports 16 concurrent users, while the RPG II Platform supports up to eight (nine if using the system console also as a user workstation). AIX PS/2 supports a wider range of attached device types as well.
- 2) Extensive peer-to-peer and peer-to-host connectivity capabilities, including 3270 emulation, file transfer, and local area networks.
- 3) Growth path to the RT/PC or System/370 processors (9370, 4381, 3090) with AIX operating systems.

Small business will more than likely make a choice based on the best application solution and support for their business needs, regardless of the operating system environment. Large accounts will generally be more concerned about the growth path and consistency with larger systems within the enterprise.

[®]UNIX is a registered trademark of AT&T.

Personal System/2 Operating Systems

IBM AIX PS/2 Operating System

A UNIX operating environment for the IBM Personal System/2

The AIX (Advanced Interactive Executive) PS/2 Operating System is a member of the IBM AIX family of operating systems, and it runs on 386-based PS/2 systems.

HIGHLIGHTS

* UNIX System V.2 compatible

- Multi-user, multitasking, virtual memory environment (up to 16 users)
- Hierarchical file system
- Bourne Shell
- Powerful editors, including vi
- C and VS FORTRAN compilers
- A symbolic debugger (sdb)
- Program development tools
- Text processing and document preparation tools
- UNIX networking facilities

Berkeley 4.3 Functions

* IBM enhancements

- Virtual storage support
- Enhanced file management
- Dynamic configuration facilities
- DOS support for multiple users
- Multiple virtual terminal support
- Multiple interactive session management
- National Language support

Connectivity Facilities

The AIX PS/2 Operating System provides a wide range of connectivity facilities that support data and program exchange and sharing for peer-to-peer and workstation to host environments. AIX PS/2 supports the following products:

- * AIX PS/2 Distributed Services
- * AIX PS/2 Network File System (NFS)
- * AIX PS/2 Transparent Computing Facility (TCF)
- * AIX PS/2 Workstation Host Interface Program
- * AIX PS/2 Transmission Control Protocol/Internet Protocol (TCP/IP)
- * AIX PS/2 INmail/INed/INnet/FTP
- * AIX PS/2 X.25

Personal System/2 Operating Systems

Compilers

- * AIX PS/2 VS FORTRAN
- * AIX PS/2 VS Pascal
- * AIX PS/2 C Language

Network Transparent Windowing System

- * AIX PS/2 X-Windows

Databases

- * ORACLE Relational Data Base Management System
- * INGRES Relational Data Base Management System

System Application Architecture (SAA) Relationship

To enhance communication with SAA systems, it is IBM intent that AIX will provide appropriate interconnections protocols between AIX systems and SAA systems.

To enhance porting of applications between AIX and SAA environments, the AIX Family Definition will provide C and FORTRAN interfaces that are compatible with the SAA definition of these languages.

As the AIX Family Definition and System Application Architecture evolve, IBM will expand the interconnect capabilities and the compatible programming interfaces. Where conflict exist between AIX and SAA, priority will be given to maintaining consistency in the UNIX environment.

Personal System/2 Operating Systems

GENERAL AVAILABILITY MARCH 1989 :

Part Number	Description
11F8182	IBM AIX PS/2 Operating System
11F8194	IBM AIX PS/2 Operating System Extensions
11F8181	IBM AIX PS/2 DOS Merge
11F8191	IBM AIX PS/2 Usability Services
11F8190	IBM AIX PS/2 Text Formatting System
11F8186	IBM AIX PS/2 X-Windows
11F8188	IBM AIX PS/2 VS FORTRAN
11F8187	IBM AIX PS/2 VS Pascal
11F8189	IBM AIX PS/2 C
11F8180	IBM AIX PS/2 Application Development Toolkit
11F8183	IBM AIX PS/2 Workstation Host Interface Prog.
11F8185	IBM AIX PS/2 Transmission Control Protocol/Internet Protocol

GENERAL AVAILABILITY JUNE 1989 :

Part Number	Description
11F8207	ORACLE DBMS
11F8213	SQL*Plus
11F8212	SQL*Forms
11F8214	SQL*Menu
11F8208	SQL*Net
11F8209	SQL*Net TCP/IP Protocol Device Driver
11F8218	Pro*C Programming Interface
11F8220	Pro*FORTRAN Programming Interface
11F8269	INGRES DBMS
11F8270	INGRES/APPLICATIONS
11F8274	Embedded SQL Preprocessor for FORTRAN
11F8275	Embedded SQL Preprocessor for Pascal
11F8271	INGRES/NET
11F8272	INGRES/STAR
11F8273	INGRES/PCLINK

GENERAL AVAILABILITY 4th QUARTER 1989 :

Part Number	Description
11F8193	IBM AIX PS/2 Network File System (NFS)
11F8196	IBM AIX PS/2 Transparent Computing Facility (TCF)
27F4254	IBM AIX PS/2 X.25

GENERAL AVAILABILITY 2nd QUARTER 1990 :

Part Number	Description
11F8195	IBM AIX PS/2 Distributed Services

AIX FAMILY OF PRODUCTS HIGHLIGHTS

Growth Over Widest Range of Processors	The AIX family of products supports the IBM PS/2 via the AIX PS/2 operating system. The 386 based PS/2 at the low end, the RT PC, 43XX and 9370 in the mid-range, and the IBM 3090 with VF at the high end.	Because of the consistent application program interface an application can be initially implemented at the IBM PS/2 level and ported to other hardware platforms as user's requirements grow.
Distributed Processing and Distributed Data	There are three products for processing distributed data: X-Windows, Network File System (NFS) and Distributed Services (DS). Transparent Computing Facility (TCF) is available for AIX/370 and AIX PS/2.	Distributed services provide the ability to support transparent distributed data high performance and administrative flexibility. TCF can manage a clutter of processors while providing end users a single system image.
OEM Connectivity via TCP/IP for Ethernet and Token Ring LANs	TCP/IP, the communications support for the AIX family of products, is an industry standard connectivity offering that will enable those OEM systems to attach to IBM processors and support terminal networks that communicate via Token Ring as well. NFS and X-Windows both run on top of the TCP/IP protocols and provide distributed file service and windowing, respectively, in connections with OEM and AIX machines.	TCP/IP, X - Windows, and NFS allow entry into existing networks of OEM machines.
Full BSD 4.3 and System V.2 Compatibility	The AIX family of products are compatible with versions of BSD (University of California at Berkeley) and AT&T's System V and includes IBM's added value extensions.	Consistency with all of these standards makes IBM's AIX products richer in function, attractive to a broad range of users, and compatible with many UNIX applications.

IBM PS/2 Single Unit Prices

IBM Personal System/2 Single Unit Prices

IBM PS/2 HARDWARE PRICE LIST - SORTED BY CATEGORIES

May 1989 Edition

"SINGLE UNIT PRICES" (SUP) reflect the price for single units (Machines, or One-time charge for licensed programs or non-IBM programs) purchased directly from IBM and are subject to change without notice. These prices are for informational purposes only, and shall not limit in any way the Remarketers' ability to set their own prices and charges for IBM products.

INGRES/PCLINK (9-16 Users)	11F8363	_____	\$150	_____

IMPORTANT NOTICE: Multiple user prices are incremental. For example: a single user system requires only the single user part number. A 2-8 user system requires BOTH the single user and the 2-8 user part numbers. A more than 8 user system (or a 9-16 user system) requires all three part numbers: i.e. the single user, the 2-8 user and the more than 8 (or the 9-16) user part numbers.

Market Support Material

INTRODUCTION

The PS/2 marketing support materials are invaluable to the successful marketing of the Personal System/2 product family. The reference material provides quick and easy access to product specifications, features, functions, and benefits of each of the PS/2 models and options. Promotional material is also available to assist customers in making the right buying decision for their personal computing needs. The PS/2 marketing support material such as slides, foils and scripts enable you to give a professional presentation of the entire PS/2 family or an individual Personal System/2 model.

Brochures...spec sheets...pocket guides...posters...they'll all help to maximize your marketing efforts. The materials lend themselves to many imaginative uses as outlined in this guide. They'll help you increase your sales, educate your sales force, inform your customers, and generate leads.

And some can be reordered whenever you want: Just select the order numbers from those supplied here, fill out the reorder form, and send it to:

IBM Fulfillment Center
PO Box 154
Dayton, Ohio 45401

Or call the IBM Fulfillment Center at:

1-800-626-9303
(in Ohio, 1-800-626-9301)

And, remember, dealer ProPlan points can be used to pay for many sales promotion materials.

Note: Z-, ZZ-, and ZV-numbered documents are not available in the IBM Fulfillment Center, Dayton, Ohio, but are stocked in the Fulfillment Center, Mechanicsburg, Pennsylvania and may be ordered via local publication ordering facility.

PERSONAL SYSTEM/2 SYSTEM UNITS

IBM Personal System/2 Family Brochure (G580-0809-03)

The wide range of PS/2 offerings is described in this glossy brochure. The 16-plus pages discuss the benefits that make PS/2 a smart investment for today and tomorrow. All the features that make the PS/2 difference - advanced technology, streamlined design, platform for growth, and more - are covered in an easy-to-read style. Full color photos show the family of PS/2 products running a variety of applications in natural-setting environments. There is also an at-a-glance chart of the basic specifications of each PS/2 system. This classy brochure is a perfect way to get across the PS/2 story to your best customers, top prospects and key decision-makers.

IBM Personal Systems Reference Guide (G360-2669-04)

Get the facts about IBM PS/2 systems, displays, printers, options and software in this 104-page spiral-bound pocket guide. It is loaded with features, functions, benefits and other highlights that show why IBM personal systems offer the best value. This guide is easy to hold, easy to use, and makes it easy for customers to see all the solutions IBM personal systems provide.

IBM Personal System/2 Facts and Features Folder (G360-2832-01)

Now its easy for sales staff to make quick comparisons of all the PS/2 models-and check their options, too. With this handy reference, all it takes is a fast look to find the facts and features you are looking for. An you can keep this vital information within easy reach-just slip the flyer in your pocket or briefcase, or keep it at your desk.

The Micro Channel Advantage Brochure (G360-2839-00)

This high-quality easy-to-read brochure explains the key benefits of the PS/2 Micro Channel Architecture. It is written for the non-technical person who wishes to understand Micro Channel Architecture and what it means to the end user. If you are comparing PS/2 to a PC clone or an IBM PC, this brochure will convince anyone that the PS/2 is the way to go.

"A Closer Look at IBM PS/2 Micro Channel Architecture" First Edition (G320-9782-00)

This newsletter gathers together many Micro Channel articles and internal IBM documents in one reference source. IBM white papers by Dr. Bob Carberry and Chet Health provide in-depth, scholarly discussions of Micro Channel Architecture. Recent trade press articles are included from industry leadership publications.

IBM PS/2 Quick Reference Guide: Features and Benefits (G360-2802-00)

Here is a quick way to see all the hardest-hitting benefits of the PS/2 family. This pocket-size folder holds seven cards that highlight seven key messages - advanced technology, price/ performance, growth, graphics, communications, operating systems, quality/reliability. Just slip out a card and quickly learn about features on one side with the corresponding, more detailed information on the other. The handy folder unfolds to reveal a model comparison chart so you can get the basic facts on the whole family in a flash.

IBM Personal System/2 Family Overview Slide/Foil Presentation (GV38-0298)

The slides and corresponding foils, packaged with a script, offer a quality comprehensive presentation of the most recently announced PS/2 models and options, as well as of the entire PS/2 family.

Marketing Presentation Guides

These sets of foil masters, each packaged with a script, provide the main highlights of the Personal System/2 models. They enable you to take a customer through the many advantages of each respective model, especially as each relates to other

Market Support Material

members of the PS/2 family. In addition, each offers some foils on performance benchmark results compared to other IBM PS/2s and PCs. An overview presentation of the PS/2 advanced architecture and technology is provided to help you educate a customer on the overall advantages of any PS/2 model. The scripts are a comprehensive document that bring you up to speed on the products as well as contain good proposal information.

The presentations are ideal for any audience who is interested in learning more about the Personal System/2.

IBM Personal System/2 Pocket Reference Flyers

There's nothing like the convenience of reaching into your pocket to find just the information you need. This guide contains clear, concise information in an at-a-glance chart and in a feature-function-benefit chart for every PS/2 model. There's a PS/2 family reference flyer that covers all the models and there's a separate reference flyer available for the PS/2 Model 80 386, Model 60, Model 50, Model 30 and Model 25.

IBM Personal System/2 (all models)	G360-2779-02
IBM Personal System/2 Model 80/386	G580-0798-02
IBM Personal System/2 Model 60	G580-0797-00
IBM Personal System/2 Model 50	G580-0796-00
IBM Personal System/2 Model 30	G580-0800-00
IBM Personal System/2 Model 25	G360-2778-01

IBM Personal System/2 Specification Sheets

Each PS/2 specification sheet highlights the features that make the model unique. Designed for easy reference, each spec sheet is neatly divided into short sections on:

- * Feature/function/benefits/highlights
- * Options
- * Warranty/service
- * At-a-glance chart of specifications
- * Graphic design of under-the-covers portrait

Spec sheets are ideal "leave-behinds" in customer offices and at sales presentations. They're excellent direct mail pieces or proposal inserts.

System Unit Spec Sheets:

IBM Personal System/2 Model 80 386	G580-0795-02
IBM Personal System/2 Model P70 386	G360-2825-00
IBM Personal System/2 Model 70 386	G360-2803-00
IBM Personal System/2 Model 60	G580-0794-00
IBM Personal System/2 Model 50 SX	G234-0025-00
IBM Personal System/2 Model 50 Z	G360-2805-00
IBM Personal System/2 Model 30 286	G360-2820-00
IBM Personal System/2 Model 30	G580-0801-00
IBM Personal System/2 Model 25	G360-2777-01

IBM Personal System/2 Model P70 386 "Day in the Life" brochure (G360-2826-00)

This is a glossy, exciting brochure that shows an end user using the PS/2 Model P70 386 in his travels throughout the day.

IBM Personal System/2 Model 30 286 and IBM Disk Operating System 4.0 Flyer (G360-2823-00)

There is a big story to tell about what the Personal System/2 Model 30 286 and DOS 4.0 can do when they are paired together. And this flyer tells it all—particularly how the two can put users on the track to higher productivity. Keep a stack of flyers in the Model 30 286 counter card pocket, or hand them out individually. The flyers show how the DOS 4.0/Model 30 286 team can help your customers bring out the best in whatever work they do.

OEM & IBM Hardware Products Catalog for IBM PS/2 Computers with Micro Channel Bus (G360-2824-00)

This Micro Channel products guides helps your customers get the most from their IBM PS/2 Micro Channel systems. It is filled with features and descriptions about IBM and non-IBM hardware that works with the PS/2 Micro Channel Architecture.

The Difference...IBM Personal System/2 Quality Brochure (G360-2816-00)

This brochure says "quality" from its cover to the story inside. It tells how IBM's commitment to quality translates into customer benefits. And, in a special photo spread, it illustrates how IBM continually strives for zero defects through rigorous product testing. From beginning to end, it will be clear to your customers that IBM quality sets IBM Personal System/2 apart from other personal computers.

IBM Personal System/2 Presentation Folder (G360-2818-00)

Here is a handy, professional way to keep promotion or proposal material in one place. An 8 1/2" X 11" folder opens to reveal two pockets for brochures, flyers, pocket guides, spec sheets and more. It is a classy closure to a presentation and a customized "give-away," with slits in the pocket for a business card.

IBM Personal System/2 Posters

The PS/2 message belongs in the limelight, and these posters will help you keep it there. In the family poster, every model is a star. And to make the Model 70 386 or 50 Z the main attraction, there is a poster to give each one special billing. The posters are attention-getters in any conference, presentation, or as a give-away for customer locations.

OS/2 Memory and Fixed Disk Capacity Planning Guide (ZZ25-9006-00)

Here is an information-packed guide that clarifies the memory and fixed disk storage capacity requirements of OS/2 Standard Edition (SE) and Extended Edition (EE). It includes product positioning relative to OS/2 SE EE V1.0 and V1.1 capacity requirements and it covers lots of background information.

Operating System/2 Information and Planning Guide (G360-2650-01)

For almost anything you want to know about the Operating System/2, turn to this extensive book. All the product and planning information is right here on the OS/2 Standard Edition and Extended Edition. It is intended for customer technical coordinators and service coordinators, programmers, system administrators, and IBM personnel as well as those who have responsibility for making decisions on information systems.

Personal System/2 Communications

Specification Sheets:

3270 Workstation Program Versions 1.0 and 1.1	G360-2734-00
Token-Ring Network	G360-2645-02
Local Area Network Server Programs	G360-2753-03
PC Network Broadband	G360-2660-02
PC Network Baseband	G360-2754-01
LAN Manager Version 2.0 and LAN Manager Entry Version 1.0	G221-4005-00
Token-Ring Network Trace and Performance Tool	G221-4006-00
8232 LAN Channel Station	G221-4009-00

IBM Personal System/2 Connectivity Products (G360-2739-02)

All the IBM PS/2 communications solutions are covered in this high-quality, 4-color brochure - local area networks, display station emulators, communications adapters and associated software. In this one promotional piece, you will have access to information on all the connectivity products of the PS/2 family.

Personal System/2 Printers

Specification Sheets:

Proprinter II and Proprinter IIXL	G360-2755-01
Proprinter III and Proprinter IIIXL	G360-2811-00
Proprinter X24/Proprinter XL24	G360-2643-00

Quietwriter III Printer	G360-2644-00
Quietwriter Printer Model 2	G360-2679-00

IBM Personal Printers Family Brochure (G360-2738-00)

This four color, high quality brochure covers in several pages a net description of the wide printer choices from IBM. It has a handy fold out that shows all the printer specs "at a glance" in addition to a Quick Reference Chart. Glossy photos showing the printers in a real live environment make this deliverable a must for your special customers.

IBM Personal Printers Product Guide (G360-2740-00)

When you need to know all the specs on a printer, just look it up in this handy flyer. There's a page for each printer, each one packed with all the specs and a picture as well.

IBM Personal Printers Marketing Reference Guide (G71K-7069-00)

Here's a three ring binder containing all the information you need on the printer family. It has nice divider pages for each printer topic and in each section there's a spec sheet, printer samples and heavy card stock pages of feature, function, benefits and highlights. This guide is truly your printer sales tool to help you drive your printer sales way up.

Personal System/2 Displays

Specification Sheets:

Monochrome Display	G580-0807-00
Monochrome Display 8507	G360-2830-00
Color Display 8512	G580-0805-00
Color Display 8513	G580-0804-00
Color Display 8514	G580-0808-00

IBM Personal System/2 Graphics Products Flyer (G580-0808-00)

If you want a summary of all the graphics options available on the PS/2 family, then turn to this handy flyer. It has the specs of each of the displays, as well as a nice easy-to-follow description of the graphics capabilities -- all in one place.

Personal System/2 Storage Products

Specification Sheets:

3.5" Diskettes	G360-2729-00
3.5" External Diskette Drive and 3.5" Internal Diskette Drive	G360-2657-00
5.25" External Diskette Drive (360KB)	G360-2658-00
6157 Streaming Tape Drive	G360-2659-02
Internal Tape Backup Convenience Kit	G360-2810-00
3363 Optical Disk Drive	G360-2656-00

IBM Data Transfer and Data Sharing Options (G360-2828-00)

Now there is information on all the diskette media migration options in one place. This flyer clearly explains all the different enhancement products available that enable a PS/2 user to work with data from a 5.25" diskette as well as a 3.5" diskette. It includes a quick reference chart of all the options and connections.

Not Reorderable Items

The following items were distributed on a one-time-offering basis:

Demonstration Diskettes

These diskettes use exciting graphics to portray the PS/2 story while showing the high-quality video capability of the PS/2. They describe the key features and benefits and show real vivid detail.

In a dealer store, while you are selling to one customer, let a demo diskette help make a sale to another. All you do is set up the demo for customers and let the computer take it from there.

- "Personal System/2 Model P70 386 Marketing Demonstration" (May, 1989)
- "Personal System/2 Model 50 SX Marketing Demonstration" (May, 1989)
- "Personal System/2 Model 50 Z and Model 70 386 Marketing Demonstration" (June 2, 1988)
- "Personal System/2 Model 70-A21 Marketing Demonstration" (December 15, 1988)
- "Personal System/2 Model 30 286 Marketing Demonstration" (September 13, 1988)
- "Personal System/2 Model 25 Marketing Demonstration Version 2.0" (June 2, 1988)
- "RPG II Application Platform Demonstration" (September 13, 1988)
- "Personal System/2: The Micro Channel Story" (December 1, 1988)

Videotapes

A perfect way to view some of the advantages of the PS/2 family is to leisurely watch a videotape. There is not a better way to drive a point home, then to show it in an up-beat, entertaining fashion. Their bound to bring in the sales and raise the level of understanding.

- "IBM PS/2 Model P70 386 Videotape" (May, 1989)
 - High-quality videotape that highlights the many advantages of the Model P70 386. Customers who have used the Model P70 386 discuss how this new PS/2 has been the ideal solution for their computing needs.
- "IBM PS/2 Model 70 386 Covers Off Demonstration" (June 2, 1988)
 - 8.5 minutes -- demonstrates the quality and reliability of the IBM PS/2 Model 70 386 and the its inherent advantages over competitive machines.
- "Model 30 286 Product Overview" (September 13, 1988)
 - 8.5 minutes -- covers an overview of the Model 30 286 as well as a question-and-answer session with Bill Lowe, president of ESD, and Dave Thomas, president of NDD.
- "PS/2 Micro Channel and OS/2: The Customers Speak" (May, 1989)
 - Videotape that shares the perspective of seven customers on why they chose IBM PS/2 and OS/2 as their Personal System of choice, and the tangible benefits they derive today.
- "The Micro Channel Presentation with Dr. Robert Carberry" May, 1989)
 - Dr. Carberry, Vice President of IBM Entry Systems Division, gives clear, concise explanation of Micro Channel architecture
 - Shows Micro Channel busmaster demonstrations shown at 1989 Spring Comdex
- "Operating System/2: The Facts" (November, 1988)
 - 17.5 minutes -- gives an in-depth technical overview via live demonstration of the Operating System/2.
- "IBM PS/2 Micro Channel Architecture: The Industry Speaks" (December 1, 1988)
 - 12 minutes -- demonstrates the acceptance of OS/2 and the PS/2 as new industry standards. It features interviews with leading software developer executives and explanations of some of the key benefits of Micro Channel. Coverage of COMDEX/Fall '88 IBM exhibitions with Micro Channel demonstrations and highlights are also included.

“PS/2 Micro Channel and OS/2 Videotape” from IBM United Kingdom (December 1, 1988)

-- contains two fresh and entertaining segments. The first is a unique presentation on the advantages of Micro Channel Architecture over the old PC and AT bus. The second is a very clear and straightforward scenario which demonstrates the business benefits of OS/2.

IBM Personal System/2 Family Overview Slide Set (June 2, 1988)

At your next presentation, just turn out the lights and let this slide set show what a bright choice the PS/2 family is. Each slide is like a mini-billboard, clearly outlining the family's major features. The set comes with a script to guide you through the slides.

OS/2 Applications Guide

It is not easy keeping up with the ever-expanding applications for IBM Operating System/2, but this guide can help you do it. A revised edition was released for Comdex, May '89 and distributed to IBM internal locations and to IBM Authorized Remarketers of advanced products.. It contains information on over 800 OS/2 application programs that are announced and available. There are applications listed from both IBM and other software developers that range from accounting to word processing. Product information...hardware and software requirements...company names...and more - it is all in this guide. And it is all easy to find.

IBM Personal System/2 Performance Guides

These guide describes how the specific Personal System/2 models perform relative to each other and to previously announced IBM Personal System/2 models and, in some cases, to the IBM Personal Computers. In achieving these measurements, representative applications are used to measure system throughput, which is the ability of a system to do useful work in a measurable unit of time. By utilizing actual application scenarios, the guides enable a user to choose a system that best meets their performance requirements.

IBM CUSTOMER CALL PROGRAM

DESCRIPTION

This is a single customer call program for all IBM authorized PS/2 remarketers. For you, the IBM Authorized PC Dealers and Industry Remarketers - PC, it includes all the Personal System/2™ and PC related products and all IBM approved value add Applications. It enables you and our IBM Sales team to work together to bring the best solutions possible to our customers.

BENEFITS

The partnership between you and the IBM sales team is made clear to your customers, solidifying IBM's commitment to you, our business partners.

Maximizes the sales resource to ensure the customer receives all the information required to make the best buying decision and the best total business solution.

Ultimately leads to the highest level of customer satisfaction possible.

Results in increased sales of IBM products and solutions through IBM Authorized PS/2 Remarketers, which is the goal we are all working toward.

REMARKETER GUIDELINES

The approval process is simple, once the criteria are met. You must sign a letter of understanding which explains the terms and conditions of call. The NDD branch confirms that the customer is in agreement to the call and is responsible for administering the program.

CRITERIA

The request to have a joint marketing call can be initiated by you, your customer or an IBM representative.

Confirmation of the Customer's agreement to a joint call.

Minimum opportunity to sell 50 system units to qualify.

A discussion of the following items may take place: Your customer's solutions requirements, IBM products and support and your support and value add.

There should be no discussion of prices, terms or conditions during the meeting.

There should be no discussion of products and solutions competitive to IBM or their pricing.

CONTACT

NDD or U.S. M&S Marketing Representative.

Programs, Promotions and Education

CUSTOMER FULFILMENT OPTION (CFO)

DESCRIPTION

CFO is established to provide customers flexibility in obtaining PS/2 products. IBM will give volume procurement agreement (VPA) credit to a customer based on products obtained from a remarketer.

A significant enhancement to the CFO programs is the addition of PC software, which provides you with the total IBM solution for your volume purchasing customers.

BENEFITS

A Remarketer can be chosen by a customer who has signed a VPA with IBM, for delivery and support of PS/2 products. This provides a choice to the customer and encourages your participation. CFO also enhances the IBM direct channel and Remarketer relationship, providing a stronger bond between IBM direct Marketing, our customers and our business partners.

REMARKETER GUIDELINES

You establish your own terms and conditions with the end user. When a certification for IBM Customer Fulfillment Option is submitted by the customer, the contract volumes are updated and sales plan commission flows to the direct marketing Representative. IBM will accept the quantity purchased from the Remarketers as credit towards their contract commitment.

REFERENCE

Green letter NDD 86-300 dated 06/16/86.

Green letter NDD 88-419 dated 09/06/88.

REMARKETER EXECUTIVE BRIEFING/PLANNING PROGRAM

DESCRIPTION

This program consists of three (3) individually tailored sessions: briefing sessions for remarketer executives, planning sessions designed to facilitate attainment of our mutual objectives, and briefings for your customers and prospects. Sessions are conducted in Boca Raton.

BENEFITS

- Helps you sell IBM
- Enhances our business partnership
- Improves your sales productivity
- Solidifies our mutual understanding
- Increases your awareness and use of IBM support

REMARKETER GUIDELINES

Arrangements for any of the sessions are made through your NDD Dealer Account Representative, normally 4-6 weeks in advance. You and your customers/prospects may take advantage of the IBM corporate jet as available. Expenses are reimbursable through ProPlan.

REFERENCE OR CONTACT

NDD Dealer Account Representative.

BUSINESS SHOW PROGRAM

DESCRIPTION

A program of planned participation in major industry, end user and Remarketer- Sponsored business shows and special events to promote awareness and acceptance of IBM Personal Computer Products.

BENEFITS

Benefits accrue directly to you when we participate in direct support of your sales or educational efforts. Indirect benefits from IBM presence at major industry and end user shows accrue to IBM Remarketers collectively.

REMARKETER GUIDELINES

By special arrangement limited show support is available for your meetings and end user shows. The local remarketer booth program is designed to satisfy most of your requests.

REFERENCE OR CONTACT

Contact your NDD Dealer Account Representative.

OUTBOUND SUPPORT PROGRAMS

DESCRIPTION

This program includes major NDD road shows such as PS/2 Forums as well as planned participation in Remarketer Seminars and Seminars designed for your customers/prospects. IBM participation is usually directed to orientation/education on new product offerings.

BENEFITS

This program makes it possible for more of your customers and prospects to hear firsthand about the excellence of IBM products and programs directly from IBM.

REMARKETER GUIDELINES

You are encourage to take maximum advantage of major road shows for you and your customers/prospects, as appropriate.

REFERENCE OR CONTACT

Requests for IBM participation in Remarketer-sponsored seminars should be directed to your NDD IBM Dealer Account Representative.

Programs, Promotions and Education

IBM BUSINESS PARTNER'S SERVICE PROGRAM

DESCRIPTION

With this program, you the IBM Authorized Dealers and Industry Remarketer of IBM Personal System/2 have become the primary providers of service solutions for these products.

IBM will :

- Provide Remarketers and Dealers the opportunity to propose the service solution in joint calls with IBM representatives.
- Designate managers in field locations to act as liaison between IBM's National Service Division (NSD) and you, our Business Partners.
- Provide a greater level of parts availability and better means to manage parts inventory.
- Provide on-site technical assistance to Remarketers and Dealers directly from field locations.

IBM will also provide new opportunities for Business Partners to profit from the marketing of service:

- Providing Remarketers and Dealers the means to remarket IBM service.
- Giving primary consideration to Business partners as subcontractors to IBM for service of non-IBM products.

REMARKETER GUIDELINES

The Customer Call Program, announced on October 25, 1988, specifies participation of a selected Business Partner in proposing a service solution at a time of a joint call.

In presenting the service solution, the Remarketer or Dealer may propose a combination of his service and IBM service. Through this process, our Business Partners will be recognized as key marketers and provider of service for the IBM Personal System/2.

BENEFITS

By combining your value add service with the expertise and resource of the IBM service organization, you are now able to formulate, propose and deliver to your customers premier service solutions for IBM PS/2 products.

PS/2 Forum *Right For Today, Ready for Tomorrow*

DESCRIPTION

IBM is conducting one-day conferences for customers involved with Personal System/2 hardware and software buying decisions. Speakers from IBM development as well as leading industry software developers will present and demonstrate the latest applications and benefits of the IBM PS/2.

General Session:

- Area Welcome
 - Executive Perspective
 - "Interruptions" Film

Business Applications Demonstrations:

- Numerous IBM and software developer demonstrations including:
- Advanced Business Microsystems, Inc.
 - California Software Products, Inc.
 - Intelligent Environments
 - Symantec
 - Plus the companies listed below

Breakout Session:

Benefits of PS/2 Architecture and Technology	Aldus
PS/2 Operating System Positioning	Ashton-Tate
OS/2 End User Advantages	Borland
OS/2 Extended Edition Enhancements	Lotus
DisplayWrite 5/2	Micrografx
PS/2 Publishing	Microrim
PS/2 AIX Advantages	Microsoft
PS/2 Local Area Network	Wordperfect
	Z Soft

BUSINESS PARTNER EDUCATION NEW APD CURRICULUM

SALES and MARKETING

1) **COURSE TITLE:** Personal Systems Training Library

DESCRIPTION: In-house, self-study training and reference material on IBM Personal System/2, Selling Data Communications, OS/2, IBM Personal Printers and business applications.

AUDIENCE: APD and IR-PC Marketing Personnel

MATERIALS: Seven (7) volumes covering PS/2 product knowledge, VHS video tapes, and a 3.5" 1.44MB diskette to be used as the student's personal "Library Card".

DURATION: Between 20 and 40 hours of study time

2) **COURSE TITLE:** Personal Systems Marketing

DESCRIPTION: A 2-day marketing course for all APD representatives on PS/2 products. Completion of Training Library is a prerequisite.

AUDIENCE: APD and IR-PC Marketing Personnel

AGENDA: PS/2 Products
OS/2 Products
IBM Networks
Selling in a competitive environment
Presenting IBM Solutions
IBM Marketing Support/Programs

DURATION: 2 days

3) **COURSE TITLE:** Personal Systems Advanced Marketing

DESCRIPTION: A 3-day optional marketing course for APD representatives on high level PC marketing skills.
One year field experience is recommended.

AUDIENCE: APD and IR-PC Marketing Personnel

AGENDA: Building trust and rapport
Discovering customer needs
Presenting solutions
Selling value
Building account plans
Ensuring customer satisfaction

DURATION: 3 days

Programs, Promotions and Education

BUSINESS PARTNER EDUCATION NEW APD CURRICULUM

TECHNICAL

1) **COURSE TITLE:** Implementing DOS Connectivity

DESCRIPTION: Hands-on course covering DOS operating environment and full range of IBM connectivity solutions.

AUDIENCE: APD & IR-PC Technical Support Reps.(TSR)

AGENDA: Connectivity/Operating Systems Overview
LAN Hardware
LAN Software
LAN Network bridging/gateways to host
LAN Network management/tuning
Asynchronous connection server
Terminal Emulation/host considerations

DURATION: 4 days

2) **COURSE TITLE:** Implementing OS/2 Extended Edition

DESCRIPTION: Hands-on course covering all aspects of OS/2 Extended Edition.

AUDIENCE: APD & IR-PC Technical Support Reps.(TSR)

AGENDA: OS/2 Extended Edition Installation
Communication Manager (Features/Lab)
- Configurations
- Host Communications
- LAN requester functions
Presentation Manager

Replacement Cartons

Replacement exterior cartons are available to replace cartons damaged in shipping. Replacement cartons are no-charge items and may be ordered by calling 303/924-4125. They will be shipped from the IBM National Parts Center in Lexington, Kentucky.

Products will not be accepted for return if repackaged in replacement cartons. If you have any questions concerning replacement cartons, please contact your IBM account administrator.

This is the complete list of available replacement cartons:
