## Automatic Features

### Original size sensor

In the reduction mode, the original size sensor automatically reads the size of the original on the platen and then displays the range of possible reduction sizes. Just press the desired size key and the reduction is automatic.

Properly place the original on the platen. The flashing lamps indicate the reduction possibilities, while the nonflashing lamp indicates the actual size of the original.

The sensor uses mirrors to read sizes optically (the light waves appear solely for illustration).

### Automatic paper selector

- Just touch the reduction key you need and the copier automatically selects the correct paper size from the two cassettes already loaded into the SF-760. If a cassette you need is not in the copier, the appropriate cassette size lamp will flash, indicating a change is necessary.
- The SF-760 will feed paper from that cassette which was inserted last. Thus, chances of feeding from the wrong cassette are greatly reduced.

## Ease of Operation

### Push-button control

A wide range of functions—from multi-copying up to 99, through repeat, pause, to instant read-out for number of copies produced—are controlled by an advanced microprocessor. You can also do priority multicopying in the pause mode.

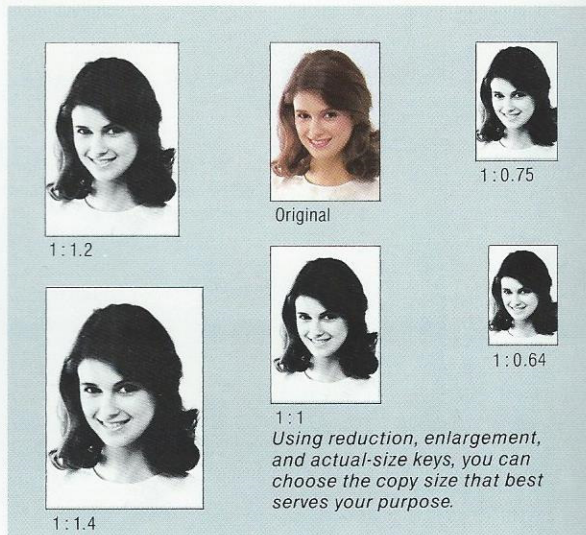

### Operator Assistance

The platen cover is equipped with a pocket for originals and there is a paper clip holder on the control panel. The SF-760 actually assists the user during the copying process.

## Expanded Freedom of Choice

### Enlargements, reductions, and size for size

The SF-760 offers you eight choices of sizes. If you need enlarged or reduced copies, touch one of the appropriate keys for the size of your choice. Of course, there is a key for the same size reproduction. The same cassette is used for either reduction, enlargement, and size for size copying. Getting the copy size you want is as easy as touching a key.

### Dual cassette system plus manual feeding

With the dual cassette system, two different sizes of paper can be kept in the copier at all times. Changing from one to the other is as easy as touching a key. And with manual feeding, you have a third paper access into the SF-760.

### Wide paper size selection

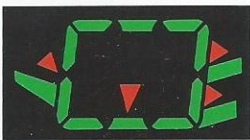

The versatile SF-760 allows you to reduce originals as large as 11" x 17". It makes size for size copies from 10" x 14" originals to as small as 3" x 5" catalog cards.

## Simplified Maintenance

### Straight paper path system

A straight paper path system remarkably reduces the chances of paper misfeeding. Should paper misfeed, the multicopy display graphically displays the misfeed location.

### Advanced self-diagnostic function

The advanced self-diagnostic function, supported by the built-in microprocessor, indicates malfunctions through an alphanumeric display on the front control panel.

### Clamshell design

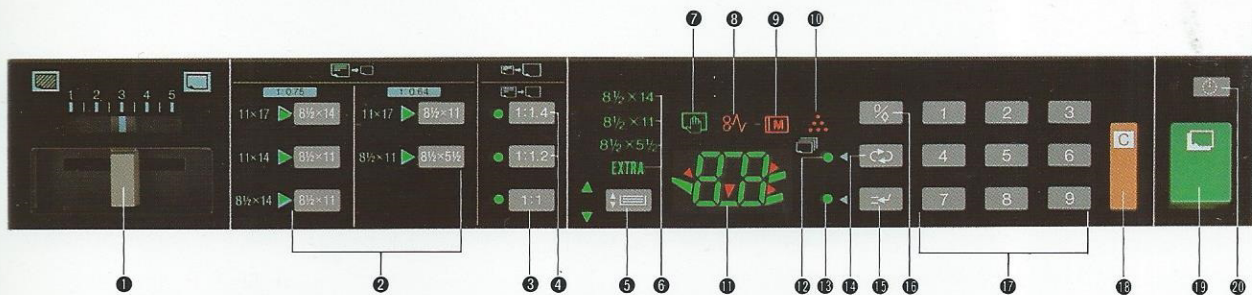

The SF-760's clamshell design provides instant access to its internal parts. This means a reduction in service time and cost, and allows the user ease of access for removal of infrequent paper misfeeds.

### Simulation function

The technician can input predetermined codes through the control panel and use the simulation function to pinpoint the exact cause of the problem.

## Controls

- 1 Exposure control lever
- 2 Reduction keys
- 3 Actual size key
- 4 Enlargement keys
- 5 Paper size selection key

- 6 Paper size lamps
- 7 Manual feed indicator lamp
- 8 Paper misfeed indicator lamp
- 9 Master replenishment indicator
- 10 Toner replenishment indicator

- 11 Multicopy display
- 12 Repeat indicator lamp
- 13 Pause indicator lamp
- 14 Repeat key
- 15 Pause key

- 16 Zero/Read-out key
- 17 Number keys
- 18 Clear key
- 19 Print button and ready indicator
- 20 Power-save key

## Quality Copies

The SF-760 is equipped with many features to assure you of superior state-of-the-art quality in your copies. An automatic toner dispensing control, voltage stabilizer, OPC (Organic Photoconductor), and a built-in dehumidifier all contribute to outstanding copy quality.

## Created for Economy

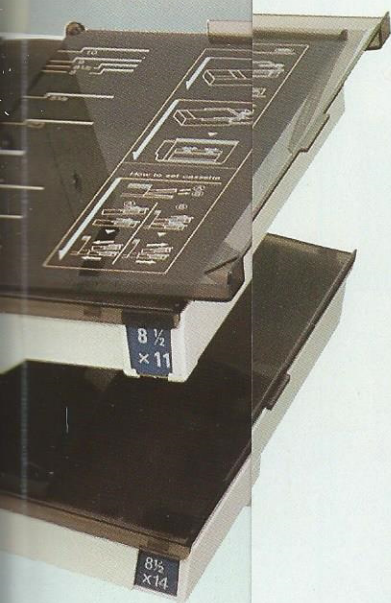

The power-save key can be activated during standby to reduce power consumption by 33 percent.

Enlargement and reduction functions in a copier have become a necessity in today's efficient office. Until now, the choice of reduction and enlargement modes has been difficult for the user. The SF-760 has alleviated this difficulty. A variety of automatic, user friendly functions such as an original size sensor, reduction size possibility display, and automatic paper selection will reduce choice errors. The dual cassette and by-pass systems further enhance the operational ease. By incorporating two modes of enlargement and two modes of reduction in a compact design, the SF-760 can expand the scope of all your copying work and increase office efficiency. The SF-760 is a compact copier that can do so much for your office.

# SF-760

## Specifications

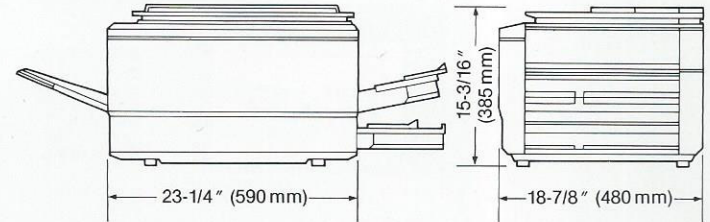

Type	Desk-top
Copying method	Electrostatic transfer system (dry copy type)
Original paper size	Max. 11" × 17"
Copying paper size	Max. 10" × 14" Min. 3" × 5"
Copying speed	12 copies/min. (every size)
Multicopying	1—99 with auto-countdown (repeat, pause, and copied number verification functions included)
Magnification ratio	1:1 ± 1% (normal), 1:1.2 ± 1% and 1:1.4 ± 1% (enlargement), 1:0.75 ± 1% and 1:0.64 ± 1% (reduction)
Paper feed	Automatic feeding from dual cassettes plus manual feeding
Light source	Halogen lamp
Power source	AC: 120V ± 10%, 60Hz
Power consumption	Max. 1.35KW
Weight (machine only)	Approx. 121 lbs. (55 kg)
Standard accessories	<ul style="list-style-type: none"><li>• 3 paper cassettes</li><li>• Copy receiving tray</li><li>• Charger cleaner</li><li>• Charger brush</li><li>• Board for layout</li><li>• Instruction manual</li></ul>

Design and specifications subject to change without notice.

## Optional accessories

- Personal counter
- Personal counter assembly
- Paper cassettes
- Cabinet
