Filed: [Iris]<White>Appointment.Bravo

I am pleased to announce that, effective immediately, Jim Frandeen is appointed Project Leader, D0 Microcode Integration.

As a member of the I/O Project, Jim recently developed the D0 SA4000 rigid disk microcode for Teak. In his new role, Jim will be responsible for assembling the D0 microcode systems required by future System Software releases. This function was performed in the past by Bill Kennedy's Diagnostics and Microcode Group, which recently became a part of System Design and Test.

A second D0 Microcode Integration project member, as well as a replacement for Jim within the I/O Project, will be announced at a later date.

Please join me in supporting Jim in his new position.
