701 S. Aviation Blvd.
El Segundo, California 90245

Warning: As to equipment manufactured prior to October 1, 1983, such equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions manual, may cause interference to radio communications. As permitted by regulation, it had not been tested for compliance with the limits for Class A compliance with the limits for Class A computing devices pursuant to Subpart J of part 15 of FCC rules, which are designed to provide reasonable protection against such interference. Operation of this equipment in a residential area is likely to cause interference, in which case the user, at his own expense, will be required to take whatever measures may be required to correct the interference.

As to equipment manufactured after October 1, 1983, such equipment complies with the requirements in Part 15 of FCC Rules for Class A computing devices. Such equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case the user, at his own expense, will be required to take whatever measures may be required to correct the interference.

The *Network Administration Library* cumulative index is designed for easy cross-reference among all the booklets in the *Library*. The cumulative index contains all the commands, procedures, and other terms you may need to reference in the *Network Administration Library*.

You can find a comprehensive listing of all the commands found throughout the *Library* under the COMMANDS heading. You can also find a listing of all the procedures in the *Library* under the PROCEDURES heading.

All items are referenced by booklet. Some items may appear in more than one booklet. If this is the case, all the applicable booklets are listed with corresponding page numbers.

COMMANDS		
Activate Service	Server Operation and Maintenance	14, 36, 43
	Server Software Installation	22
Add Alias	Boot Service	3, 18
	Clearinghouse Service	5, 35-36
Add Circuit	Internetwork Routing Service	3, 9-13
	Server Software Installation	31
Add Communication Interface Unit	External Communication Service	3, 8
	Server Software Installation	31
Add Configuration	Clearinghouse Service	101
	Gateway Service	3, 9-10, 14
Add Domain	Clearinghouse Service	5, 22, 30-32, 52-53, 85, 88
	Server Operation and Maintenance	66
	Server Software Installation	28
Add File Drawer	Boot Service	3, 18
	File Service	5, 15, 39
	Interactive Terminal Service	10
	Remote Batch Service	10
Add Foreign Domain	Clearinghouse Service	103
	Mail Service	5, 11, 16, 56, 58-59
Add Foreign Gateway	Clearinghouse Service	103
	Mail Service	5, 11, 15, 56
Add Group	Clearinghouse Service	5, 26, 91
	File Service	5, 41
	Remote Batch Service	9
	External Communication Service	3, 26, 36
Add IBM 3270 Host	Clearinghouse Service	96, 103
	Gateway Service	8
	Mail Service	5, 17, 20, 28
Add Mailbox	Clearinghouse Service	96, 103
	Gateway Service	8
	Mail Service	5, 17, 20, 28
Add Member	Clearinghouse Service	5, 15, 26, 92, 95
	File Service	5, 41
	Remote Batch Service	9
Add Monitored Server	Server Monitor Service	3, 7, 14
Add Partner	Remote Batch Service	5, 13

Index item	Book name	Page number
Add Port	Remote Batch Service	5, 11
Add Print Service	Clearinghouse Service	5
Add RS232C Port	External Communication Service	3, 13, 16, 22, 31, 33

Changing monitoring parameters	Communications Monitoring Service	35 – 40

Index item	Book name	Page number
Changing log attributes	Communications Monitoring Service	38 – 39
Changing remote log handling	Communications Monitoring Service	39 – 40
Changing the log name	Communications Monitoring Service	39
Changing the protocol	Communications Monitoring Service	37 – 38
Changing the 8000 port and multipoint configurations	External Communication Service	40
Changing the printing option	Print Service	21
Checking that the mail clerk delivers the Gateway mail	Gateway Service	12 – 13
Checking for mail via the 860	Gateway Service	12
Checking for mail via the 6085/8010	Gateway Service	13
Checking the Internetwork Routing Service link (IRS level 1)	Basic Troubleshooting of Network Services	10 – 12
Checking the local Internetwork Routing Service (IRS level 2)	Basic Troubleshooting of Network Services	13 – 14
Checking the network (Network level 1)	Basic Troubleshooting of Network Services	27 – 29
Checking the remote Internetwork Routing Service (IRS level 3)	Basic Troubleshooting of Network Services	15 – 17
Checking the server (Server level 1)	Basic Troubleshooting of Network Services	18 – 20
Checking the workstation (Workstation level)	Basic Troubleshooting of Network Services	23 – 26
Configuring a local 8000 port for the Gateway Service	Gateway Service	9 – 10
Configuring a local 8000 port for the Remote Batch Service	Remote Batch Service	11 – 12
Configuring an 8000 port or multipoint option	External Communication Service	30
Configuring circuits for the Internetwork Routing Service	Internetwork Routing Service	9 – 13
Circuit type 1. X.25 SVC	Internetwork Routing Service	10
Circuit type 2. Auto-dialed	Internetwork Routing Service	11
Circuit type 3. Manually-dialed	Internetwork Routing Service	11 – 12
Circuit type 4. Dedicated	Internetwork Routing Service	12 – 13

Index item	Book name	Page number
Configuring CIU ports	External Communication Service	33
Configuring the local 8000 port for IBM 3270 BSC terminal emulation	External Communication Service	22
Configuring the Server Monitor Service database	Server Monitor Service	7-8
Copying a portion of the file system to a floppy disk	File Service	76-77
Copying a primary volume to an auxiliary volume	File Service	48-49
Copying an auxiliary volume to an auxiliary volume	File Service	49-50
Copying directories	Interactive Terminal Service User Guide	46
Copying files	Interactive Terminal Service User Guide	44
Correcting domain inconsistency	Clearinghouse Service	55-56
Correcting typing mistakes	Interactive Terminal Service User Guide	17
Creating a postmaster mailbox name requirements	Mail Service Mail Service	19-20 19
Creating and sending messages	Interactive Terminal Service User Guide	22-26
Creating directories	Interactive Terminal Service User Guide	46
Creating domains	Clearinghouse Service	52-54
Creating file drawers for users	File Service	13-15
Creating files	Interactive Terminal Service User Guide	43-44
Creating mailboxes for users	Mail Service	17-18
Creating the Interactive Terminal Service user profiles drawer	Interactive Terminal Service	10
Mailbox configuration guidelines	Mail Service	17
Defining and displaying the interpretation of data received	Remote Batch Service	26-27
Deleting a CIU configuration	External Communication Service	42
Deleting a communication partner or port	Remote Batch Service	19-20
Deleting a host configuration	External Communication Service	43
Deleting circuit configurations	Internetwork Routing Service	18

Index item	Book name	Page number
Deleting copies of domains	Clearinghouse Service	50 – 51
Deleting directories	Interactive Terminal Service User Guide	46 – 47
Deleting file drawers	File Service	91
Deleting files	Interactive Terminal Service User Guide	44
Deleting foreign gateways	Mail Service	51
Deleting mailboxes	Mail Service	27
Deleting messages	Interactive Terminal Service User Guide	31 – 32
Deleting obsolete backup increments	File Service	57 – 58
Deleting obsolete backup increments when backup volume becomes full	File Service	58 – 59
Deleting obsolete desktops	File Service	86
Deleting RS232C port configurations	External Communication Service	42
Deleting the Gateway Service configuration	Gateway Service	20
Deleting users, groups, or other registered objects	Clearinghouse Service	43
Describing RS232C ports	External Communication Service	45
Describing the contents of the file drawers in use	Remote Batch Service	28
Displaying a log	Communications Monitoring Service	29
Displaying monitoring parameters	Communications Monitoring Service	34
Displaying statistics	Communications Monitoring Service	30 – 33
Editing files	Interactive Terminal Service User Guide	45
Editing messages	Interactive Terminal Service User Guide	35 – 38
Adding to messages	Interactive Terminal Service User Guide	36
Inserting and deleting text	Interactive Terminal Service User Guide	36 – 37
Redisplaying edited text	Interactive Terminal Service User Guide	37
Reviewing a message	Interactive Terminal Service User Guide	38
Searching in the field mode	Interactive Terminal Service User Guide	35 – 36

Index item	Book name	Page number
8040 Series Electronic Printer maintenance	Print Service	41
Changing paper handling options	Print Service	46 – 48
Checking printer image alignment	Print Service	48 – 49
Checking printer operation	Print Service	45 – 46
Checking the dry imager	Print Service	44 – 45
Controlling power consumption on B2 electronic printers	Print Service	56
8040 Series Electronic Printer paper	Print Service	42 – 44
Getting to know the 8040 Series Electronic Printer	Print Service	41 – 43
Responding to L2 and L4 error codes	Print Service	49 – 50
Ending your practice session	Interactive Terminal Service User Guide	61
Entering your network number and server name	Server Software Installation	20 – 22
Establishing Mail Service backup parameters	Mail Service	21 – 23
Establishing standard operation of your Print Service	Print Service	28
Establishing standard operation of the 8040 Series Electronic Printer	Print Service	28 – 30
Establishing standard operation of the Formatting Print Service	Print Service	35
Establishing standard operation of the NS 8000 Laser CP Electronic Printer	Print Service	30 – 31
Establishing standard operation of the Telecopier 495-1 Printer	Print Service	31 – 34
Expanding the Clearinghouse database	Clearinghouse Service	48 – 49
Expanding the Mail Service database	Mail Service	34 – 35
Explicitly running a service	Server Operation and Maintenance	38 – 39
Expunging a service	Server Operation and Maintenance	48 – 49
Font installation for a Print Service	Server Software Installation	38

Index item	Book name	Page number
Formatting Print Service maintenance	Print Service	79
Changing the Target Print Service	Print Service	79–80
Responding to forwarding errors	Print Service	80–81
Updating paper handling options	Print Service	80
Forwarding messages	Interactive Terminal Service User Guide	38
Getting additional drives on-line	Server Software Installation	39
Getting on-line help	Communications Monitoring Service	24
Help	Interactive Terminal Service User Guide	59–60
Helping emulation users	External Communication Service	54
Image gap reprinting	Print Service	82–83
Initializing a primary File Service volume	File Service	10–11
Initializing auxiliary (secondary) File Service volumes	File Service	11–12
Initializing the Boot Service	Boot Service	6
Initializing the Clearinghouse Service	Clearinghouse Service	19–20
Initializing the CMS	Communications Monitoring Service	6–7
Initializing the ECS	External Communication Service	6
Initializing the 850/860 Gateway Service	Gateway Service	6
Initializing the External Mail Gateway	Mail Service	14–16
Enabling inbound mail reception	Mail Service	15
Enabling outbound mail transmission	Mail Service	15–16
Initializing the Internetwork Routing Service	Internetwork Routing Service	6
Initializing the Mail Service	Mail Service	12–13
Initializing the Remote Batch Service	Remote Batch Service	8
Initializing the Server Monitor Service	Server Monitor Service	6
Initializing your Interactive Terminal Service	Interactive Terminal Service	6–7

Index item	Book name	Page number
Initializing your Print Service	Print Service	16
Initializing the 8040 Series Electronic Printer	Print Service	16 – 17
Initializing the Formatting Print Service	Print Service	20
Initializing the NS 8000 Laser CP Electronic Printer	Print Service	17 – 18
Initializing the Telecopier 495-1 Printer	Print Service	18 – 19
Recovery operations for unsuccessful Print Service initialization	Print Service	21 – 22
Installing additional services	Server Software Installation	41
Installing System Software	Server Software Installation	14 – 15
Installing the Boot Service database	Boot Service	8
Installing the services	Server Software Installation	23 – 25
Interrupting the backup process	File Service	55 – 56
Limiting access to remote networks	Internetwork Routing Service	16
Listing and configuring RS – 232C port information	Server Operation and Maintenance	66
Listing boot statistics	Boot Service	12
Listing circuit configurations	Internetwork Routing Service	19
Listing directories	Interactive Terminal Service User Guide	47
Listing file attributes	Interactive Terminal Service User Guide	45
Listing file drawers	File Service	88 – 89
Listing floppy disk files	Boot Service	13
Listing mailbox contents	Interactive Terminal Service User Guide	27 – 28
Listing mailboxes	Mail Service	26
Listing remote server event recipients	Server Monitor Service	17
Listing the boot files in the Boot Service database	Boot Service	15
Listing the boot files on the floppies	Boot Service	15
Listing the Gateway Service configuration	Gateway	16 – 19

Index item	Book name	Page number
Listing users	Interactive Terminal Service	14
Loading extended language fonts onto your Print Service	Print Service	27
Loading fonts onto your Print Service	Print Service	23 – 26
Logging off	Interactive Terminal Service User Guide	19
Logging on	Basic Troubleshooting of Network Services	65
	Interactive Terminal Service User Guide	18
	Server Software Installation	21
Maintaining groups	Clearinghouse Service	39 – 41
Managing secondary drives	Server Operation and Maintenance	59 – 63
Changing the volume name	Server Operation and Maintenance	63
Copying complete volumes	Server Operation and Maintenance	61 – 63
Creating a services volume on a secondary drive	Server Operation and Maintenance	59 – 60
Replacing a disk pack	Server Operation and Maintenance	61
Manual registration	Communications Monitoring Service	6
Manually updating Clearinghouses connected via dial-up links	Clearinghouse Service	57 – 63
Merging internetworks	Clearinghouse Service	44 – 45
Monitoring External Mail Gateway and domain activity	Mail Service	52 – 53
Examining a particular foreign gateway	Mail Service	52
Viewing the set of Mail Gateways or Mail Domains	Mail Service	53
Monitoring Interactive Terminal Service sessions	Interactive Terminal Service	11
Monitoring Mail Service statistics	Mail Service	29 – 31
Monitoring your services volume	Server Operation and Maintenance	67 – 68

Index item	Book name	Page number
Moving a File Service volume	File Service	90
Moving a foreign domain	Mail Service	58 – 59
Moving directories	Interactive Terminal Service User Guide	47
Moving file drawers to another volume	File Service	86
Moving files	Interactive Terminal Service User Guide	46
Moving mailboxes	Mail Service	28
Moving the Mail Service	Mail Service	46 – 47
Expunging the old Mail Service	Mail Service	47
Installing the new Mail Service	Mail Service	46
Moving mailboxes to the new Mail Service	Mail Service	47
Running the new Mail Service	Mail Service	47
Narrowing the problem to a system on the network (Network level 2)	Basic Troubleshooting of Network Services	30 – 31
NS 8000 Laser CP Printer maintenance		
Changing the banner option	Print Service	60 – 61
Checking printer image alignment	Print Service	68
Responding to P1, P2, P3, and P4 error codes	Print Service	61 – 67
Partitioning the server disk	Server Software Installation	12 – 13
Performing corrective action at the server (Server level 2)	Basic Troubleshooting of Network Services	21 – 22
Performing fault analysis	Basic Troubleshooting of Network Services	64
Powering the server up or down	Server Operation and Maintenance	20 – 21
Preparing a backup file drawer	File Service	39 – 40
Preparing a network to support network installation of workstation software	Boot Service	18 – 19
Preparing for a server software installation	Server Software Installation	3 – 8
Printing files from the File Service	Interactive Terminal Service User Guide	56
Printing files stored at your local terminal	Interactive Terminal Service User Guide	57 – 58

Index item	Book name	Page number
Print Service maintenance	Print Service	38
Deleting fonts from your Print Service	Print Service	38 – 39
Print Service statistics	Print Service	39 – 40
Removing the Print Service from a server	Print Service	40
Proceeding	Server Software Installation	34 – 37
Reconfiguring foreign Mail Gateways and domains	Mail Service	54 – 57
Reconfiguring Interactive Terminal Service resources	Interactive Terminal Service	12 – 13
Reconfiguring the boot files in the Boot Service database	Boot Service	15 – 16
Reconfiguring the Boot Service database	Boot Service	14
Recovering from a disk label check	Basic Troubleshooting of Network Services	85
Recovering from an inconsistent file system	Basic Troubleshooting of Network Services	82
Recovering from an unrecoverable disk error	Basic Troubleshooting of Network Services	86
Registering an asynchronous/873 port	External Communication Service	16
Registering an asynchronous/8000 port	External Communication Service	13
Removing monitored servers	Server Monitor Service	20
Removing the Clearinghouse Service from a server	Clearinghouse Service	46 – 47
Removing the CMS from a server	Communications Monitoring Service	41
Removing the ECS from a server	External Communication Service	56
Removing the Gateway Service from a server	Gateway Service	21
Removing the Interactive Terminal Service from a server	Interactive Terminal Service	16
Removing the Internetwork Routing Service from a server	Internetwork Routing Service	24
Removing the Mail Gateway option	Mail Service	60 – 61
Removing the Mail Service from a server	Mail Service	43 – 45
Expunging the Mail Service	Mail Service	44 – 45
Shutting down the Mail Service	Mail Service	44

Index item	Book name	Page number
Removing the Server Monitor Service from a server	Server Monitor Service	24
Removing users from a monitored server's list	Server Monitor Service	22
Renaming the CMS	Communications Monitoring Service	40
Renaming the ECS	External Communication Service	55
Renaming the Interactive Terminal Service	Interactive Terminal Service	15
Renaming the Internetwork Routing Service	Internetwork Routing Service	2
Renaming the Remote Batch Service	Remote Batch Service	35
Repairing the Mail Service database	Mail Service	39 - 42
Database damage warning messages	Mail Service	39
Replicating domains	Clearinghouse Service	21 - 23
Restoring a damaged local database	Clearinghouse Service	30 - 34
Restoring a primary pack containing MS or CHS	Server Operation and Maintenance	64 - 66
Restoring File Service data	File Service	63 - 64, 71 - 73
Restoring File Service data (full restore) from floppy disks	File Service	65 - 69
Restoring part of a File Service volume from floppy disks	File Service	69 - 70
Restoring File Service data from a rigid disk	File Service	71 - 75
Restoring part of a specific backup disk from a rigid disk	File Service	73 - 74
Restoring the Mail Service	Mail Service	37 - 38
Retrieving files	Interactive Terminal Service User Guide	48 - 49
Running and initializing the Clearinghouse Service	Server Software Installation	26 - 27
Running fixed disk diagnostics	Basic Troubleshooting of Network Services	60
Running removable disk diagnostics	Basic Troubleshooting of Network Services	67 - 78
Displaying the bad page table	Basic Troubleshooting of Network Services	76 - 77
Formatting a disk pack	Basic Troubleshooting of Network Services	69 - 71

Index item	Book name	Page number
Running a confidence test	Basic Troubleshooting of Network Services	68–69
Running the echo test	Basic Troubleshooting of Network Services	40
Running the physical volume scavenger	Basic Troubleshooting of Network Services	72
Setting up the removable disk diagnostics	Basic Troubleshooting of Network Services	67–68
Using the bad page utility	Basic Troubleshooting of Network Services	72–75
Using the Exit option	Basic Troubleshooting of Network Services	77
Saving a log	Communications Monitoring Service	28
Saving the backstop log	Server Operation and Maintenance	31
Scavenging the services volume	Server Operation and Maintenance	50–58
Selecting one of several communication partners	Remote Batch Service	18
Setting backup parameters	File Service	41–45
Setting current directory	Interactive Terminal Service User Guide	43
Setting format options	Interactive Terminal Service User Guide	54–55
Setting printing options	Interactive Terminal Service User Guide	52–53
Setting software options	Server Software Installation	17–19
Setting the display format for your terminal	Interactive Terminal Service User Guide	14–16
Setting up auto-logging	Communications Monitoring Service	20–22
Setting up to monitor communications	Communications Monitoring Service	9–11
Setting up to monitor RS-232C communications	Communications Monitoring Service	17–19
Setting up to monitor SNA communications	Communications Monitoring Service	12–13
Setting up to monitor X.25 communications	Communications Monitoring Service	15–16
Setting XModem options	Interactive Terminal Service User Guide	48
Showing a communication partner or port	Remote Batch Service	24-25
Showing an active log	Communications Monitoring Service	26

Index item	Book name	Page number
Showing/changing the server profile	Server Operation and Maintenance	42-44
Showing monitored server statistics	Server Monitor Service	12-13
Showing Remote Batch Service statistics	Remote Batch Service	29-31
Showing RS232C port statistics	External Communication Service	51
Showing the Internetwork Routing Service statistics	Internetwork Routing Service	20-22
Stage 2. Creating or replicating replacement domains	Clearinghouse Service	83-90
Stage 3. Registering users and user groups in replacement domains	Clearinghouse Service	91-92
Stage 4. Updating file drawer access lists	Clearinghouse Service	93-94
Stage 5. Updating user group members in long-term domains	Clearinghouse Service	95
Stage 6. Adding mailboxes to long-term Mail Services, if necessary	Clearinghouse Service	96
Stage 7. First general announcement	Clearinghouse Service	97
Stage 8. Renaming servers and services/installing and configuring replacement Mail Service(s)	Clearinghouse Service	98-104
Stage 9. Starting user change-over	Clearinghouse Service	105-107
Stage 10. Third general announcement	Clearinghouse Service	108
Stage 11. Removing obsolete entries from file drawer access lists	Clearinghouse Service	109
Stage 12. Removing redundant members from user groups in long-term domains	Clearinghouse Service	110
Stage 13. Deleting obsolete mailboxes from long-term Mail Services	Clearinghouse Service	111
Stage 14. Expunging Mail Services	Clearinghouse Service	112
Stage 15. Deleting obsolete domains, or obsolete domains and organizations	Clearinghouse Service	113-114
Stage 16. Replicating domains	Clearinghouse Service	115

Index item	Book name	Page number
Stage 17. Taking down dial-up links	Clearinghouse Service	116
Starting and stopping the Server Monitor Service	Server Monitor Service	10-11
Starting the logging process	Communications Monitoring Service	25
Starting the system	Server Software Installation	16
Stopping a communication session	Remote Batch Service	36
Stopping and restarting the Remote Batch Service	Remote Batch Service	16
Stopping one or more services	Server Operation and Maintenance	40-41
Stopping the logging process	Communications Monitoring Service	27
Stopping the Mail Service	Mail Service	32-33
Storing files	Interactive Terminal Service Users Guide	49-50
Switching to a different IBM 3270 host	External Communication Service	44
Telecopier 495-1 Printer maintenance	Print Service	70
Changing paper handling and transmission options	Print Service	70-71
Isolating equipment failures	Print Service	71-76
Terminating and restarting a session	Interactive Terminal Service Users Guide	23-24
Testing an internetwork routing/clusternet port on CIU	Internetwork Routing Service	25-27
Testing an internetwork routing/clusternet port on the local port	Internetwork Routing Service	28-30
Testing an RS-232C port	Basic Troubleshooting of Network Services	45-47
	Remote Batch Service	32-34
Testing the Communication Interface Unit	Basic Troubleshooting of Network Services	36-37
Testing the dialer	Basic Troubleshooting of Network Services	38-39
Testing the floppy disk drive	Basic Troubleshooting of Network Services	43
Testing the terminal	Basic Troubleshooting of Network Services	48-49

Index item	Book name	Page number
The Genesis install-- preparing to install your first server on your Ethernet network	Server Software Installation	5-6
Undeleting messages	Interactive Terminal Service User Guide	33
Using remote administration capabilities	Server Operation and Maintenance	28-30
Using Server Monitor Service logs and messages	Server Operation and Maintenance	32
Using the bad page utility	Basic Troubleshooting of Network Services	72-75
Using the Boot command	Basic Troubleshooting of Network Services	63
Using the Delete Old Versions command	File Service	79
Using the MAKE DOCUMENT and MAKE SCREEN features	Server Operation and Maintenance	29-30
Using the Quit command	Basic Troubleshooting of Network Services	66
Using the Report Disk Usage command	File Service	81-83
Using the Show Activity, Show Statistics and Reset Statistics commands	File Service	79-81
Using the Show Backup Index command	File Service	60
Using the Show Ethernet Statistics command	Basic Troubleshooting of Network Services	50-56
Validating desktops	File Service	84-85
Verifying Clearinghouse entries	External Communication Service	10
Verifying the problem (Entry level)	Basic Troubleshooting of Network Services	7-9

	Server Operation and Maintenance	16, 20, 22 – 23
	Server Monitor Service	18
	Server Software Installation	10
	Server Monitor Service	22, 29, 31
Starting and stopping the Server Monitor Service	Server Monitor Service	10–11
Starting the logging process	Communications Monitoring Service	25
Starting the system	Server Software Installation	16
startup	Boot Service	6, 9, 14 – 16
	Communications Monitoring Service	6
	External Communication Service	56
	Gateway Service	5
	Internetwork Routing Service	4, 13, 23 – 24

Index item	Book name	Page number
	Introduction to Network Administration	21
Explicitly running a service	Server Operation and Maintenance	38-39
interrupt points	Server Operation and Maintenance	8, 24-26
non-normal option	Server Operation and Maintenance	8, 24-25
startup prompt	Interactive Terminal Service User Guide	12
Statistical commands		
Show Activity	Mail Service	6, 29-30
Show Delays	Mail Service	6, 29
Show History	Mail Service	6, 29-30
Show Message Lengths	Mail Service	7, 29-30
Show Other Servers	Mail Service	7, 29-30
Show RS232C Port Statistics	Mail Service	7
Show Status	Mail Service	7, 21, 29, 31, 37, 52, 54, 58
Show Usage	Mail Service	7, 29, 31
statistics	Gateway Service	16-18
	Internetwork Routing Service	4, 15
	Server Monitor Service	12-13
reset	Internetwork Routing Service	20-21
	External Communication Service	4
	Gateway Service	3, 10, 15
	Internetwork Routing Service	4, 9, 17-18
	Print Service	12, 81
	Server Monitor Service	4, 10-11, 19, 24
	Server Operation and Maintenance	18
Stop Backup command	File Service	7, 22, 48-49
Stop Circuit command	Internetwork Routing Service	4, 16-18, 25
Stop command	Basic Troubleshooting of Network Services	45
Stop Communications Monitoring Service command	Communications Monitoring Service	4, 41
Stop IBM 3270 Emulation command	Basic Troubleshooting of Network Services	45
	External Communication Service	4, 26, 36, 41, 43-44

Index item	Book name	Page number
Stop Logging command	Communications Monitoring Service	4, 11, 27
Stop Printing command	Print Service	12, 23, 38
Stop Queuing command	Print Service	12
Stop Service command	Basic Troubleshooting of Network Services	21, 36
	Boot Service	4, 15
	Clearinghouse Service	22, 30, 33, 47–48, 52–53, 85, 87, 99, 101, 112
