| Product Code: | Maindec 12-D6BA-D(P) |
| Product Name: | VR12 Display Test |
| Date Created: | June 6, 1969 |
| Maintainer: | Diagnostics Group |
| Author: | Dave Ferrarini |

Mnemonic : DISPTST

1. ABSTRACT

This program tests the PDP-12 Display System by generating three distinct patterns on the scope, two with the DIS Instruction, and one with the DSC Instruction.

2. REQUIREMENTS

2.1 EQUIPMENT

a. PDP-12A or PDP-12B

2.2 STORAGE

Most of locations $4000_8$ to $6000_8$

3. LOADING PROCEDURES

3.1 METHOD

a. Mount a DIAL Tape on Unit Ø.

b. Set mode to LINC and depress I/O Preset twice.

c. Set LSW=701 RSW=7300 and hit the DO toggle.

d. Depress Start 2Ø.

e. Call the program from the ASR by:

→ LO DIS TEST, Ø )

f. DIAL Loader will halt at ~~7525~~. 7775

g. Depress I/O Preset.

h. Depress Start 2Ø to execute.

i. Restart Procedure: Depress Start 2Ø.

j. This program is also available on Binary Paper Tape.

4. OPERATOR ACTION

Upon starting, the program will alternately display the three patterns, each for approximately ten seconds.

a. Freeze on current pattern.

Striking the key F will direct the program to lock into the routines that are controlling display of the current pattern.

b. Alternate between three patterns.

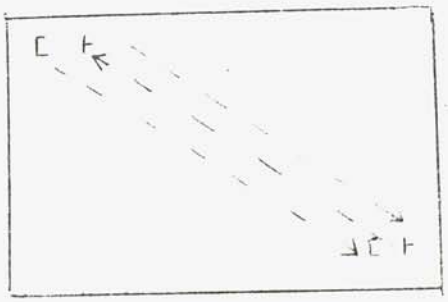
Striking any key but F will direct the program to alternate the display between the three patterns. It should be noted that requesting the alternate sequence while in alternate mode or the freeze sequence while in freeze mode has no effect.

5. PROGRAM DESCRIPTION

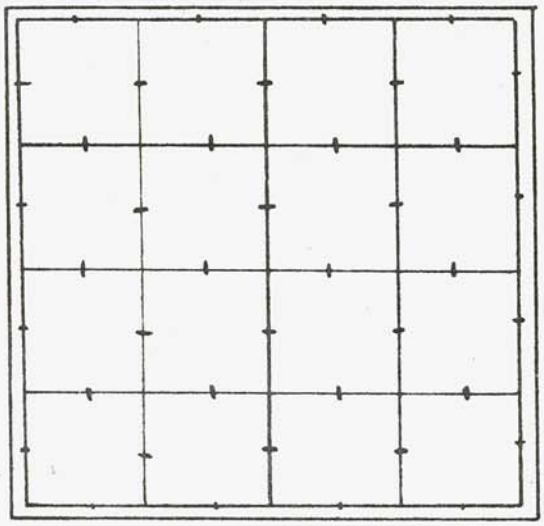
a. The pattern generated by the DSC instruction takes the following form:

| | | |
|---|---|---|
| (QUANDRANT 2) | CHAN Ø HALF SIZE / CHAN 1 FULL SIZE | (QUADRANT 1) |
| (QUADRANT) | CHAN Ø FULL SIZE / CHAN 1 HALF SIZE | (QUADRANT 4) |

The pattern does what the display says. One half of one character is displayed in one corner of the scope, then half of one character is displayed in the opposite corner of the scope. The left half of the character in quadrants 2 and 4 are displayed first, then the left half of the character in quadrants 1 and 3 are displayed. When the left half of all characters on the scope have been displayed the sequence is repeated for the right half of the characters.



b. One pattern generated by the DIS Instruction takes the following form:



This permits calibration of the scope.

c. Display a cross.

This pattern is two diagnonal lines from the bottom left corner to the top right corner of the display, and bottom right to top left. It is used when setting up the D/A converters of the VC12 Display System.

NOTE: Setting sense switch Ø to a one will cause a return to the Dial monitor.
