GAI TEST ADAPTER PLUG

PURPOSE:

Test adapter plug (103661-01) is necessary to convert a D3000 having the special interface modification (SC914) for General Automation into a standard D3000 interface. This will facilitate testing of this special configuration using standard PERTEC test equipment. The GAI adapter plug may be ordered by part number 103661-01 or built utilizing the following instructions:

PARTS REQUIRED:

QTY	PART NO.	DESCRIPTION
1	503-8361	<pre>16 Pin Dip Plug Circuit Assembly Corp. CA-16P-01</pre>
1	700-7404	<pre>I.C. Digital, Hex Inverter (T.I. SN7404N)</pre>
1		6" Strip of 30 AWG Kynar Wire.

BUILD INSTRUCTIONS:

- 1.0 Cut I.C. (700-7404) Pins 1, 2, 3 4, 10 and 11. (See Figure 1).
- 2.0 Remove pins 8 and 9 from Head As: embly (505-8361). (See Figure 1).
- 3.0 Jumper Header Assembly pins together with 30 AWG Kynar wire. (See Figure 2 for Wiring List.)
- 4.0 Epoxy I.C. to Header Assembly, placing Pin l adjacent to the corner cut. (See Figure 1)
- 5.0 Solder remaining pins of I.C. to Header Assembly.
- 6.0 Mark 103661-01 in area 2 (Se€ Figure 1)
- 7.0 GAI adapter plug (103661) can now be used in place of U226 and in conjunction with PERTEC Hand Feld Tester for proper operation in the test condition.
