

MiniDOS/MPX on SWTPC 6800

The MiniDOS directory contains MiniDOS and MPX PROMs and the files that were used to create a MiniDOS/MPX disk for the SWTPC 6800 computer. See the “Disk Image Transfer” folder for information and tools for writing a disk image file to floppy disk.

The files in this directory include most of the programs and utilities that were provided with MPX. Source code is available for some of the programs. Other utilities not present here are in printed form the LFD-400 manual. If anyone keys them in and creates a new source file, please contact me so I can post the files here.

MiniDisk+ on SWTPC 6800

The MiniDisk+ directory contains MiniDisk+ PROMs and a ready to write disk image. See the “Disk Image Transfer” folder for information and tools for writing a disk image file to floppy disk.
