MOVCPM

Before deciding on which MOVCPM program to run, first decide on how you want to declare the logical drive assignments. The CP/M Information Sheet lists the version and the logical drive assignments.

To run any MOVCPM program, enter the command **MOVCPMX**, with X being the correct letter for the version of MOVCPM that you have selected. The program will then say:

CONSTRUCTING 56K CP/M VERSION X.X
WHICH DRIVES SHOULD BE SINGLE SIDED
(C,D,E)

(some of this information, such as the drive selections, will vary with the version of MOVCPM selected.) Enter only the letter of the drive(s) you want to be single sided. Use no spaces or punctuation. If you enter less than three characters, or if you want no drives to be single sided, then you must also enter a {RETURN}. At this point the program will display:

READY FOR "PUTSYS"

If you want to make the changes permanent, run the PUTSYS program. If not, you can now operate the system with the temporary configurations in effect.

CP/M INFORMATION SHEET

We have recently come out with a number of new products, and, consequently, a number of new versions of CP/M. An explanatory list is given here for clarification of the different versions and their functions.

CP/M BIOS Versions & Functions - Rev 10/16/81

Version	Size	System	Drives Supported	Controller	MOVCPM	Timeshare
A	8K	SB, VIP	Micropolis	Micropolis	MOVCPM	No
B	8.5K	2800	Qume 8" single density	Qume	MOVCPM/B	No
C	8.75K	2800	Qume 8" double density	Qume	MOVCPM/C	No
C	10K	3030	Winchester hard drive; Micropolis	Megastor	MOVCPMHD	No
D	10K	2800	Qume 8" single or double density; Micropolis	Qume	MOVCPM/D	No
H	8.75K	2600 3005 3105 3100 3032 VIP-T	Tandon, double or single sided, & Micropolis. Drive A must be Tandon double sided; B,C,&D can be either.	Dualmode	MOVCPMH	No
I	9.5K	5005 5032	Tandon, double or single sided, & Micropolis. Drive A must be Tandon double sided; B,C,&D can be either.	Dualmode	MOVCPMI	Yes
J	9.5K	3005 3105	Seagate hard drive as A&B; C,D,&E can be Tandon single or double sided or Micropolis.	Dualmode	MOVCPMJ	No
K	10K	5005	Seagate hard drive as A&B; C,D,&E can be Tandon single or double sided or Micropolis.	Dualmode	MOVCPMK	Yes
L	9.5K	3005 3105	Seagate hard drive as A; B,C,&D can be Tandon single or double sided or Micropolis.	Dualmode	MOVCPML	No
M	10K	5005	Seagate hard drive as A; B,C,D,E can be Tandon single or double sided or Micropolis.	Dualmode	MOVCPMM	Yes
N	9.5K	SB	Micropolis only, using Dualmode controller;	Dualmode	MOVCPMN	Yes

For Timeshare system
upgrades.

P	10K	3032	8" Quantum hard disk as A,B,C,&D; Tandon floppy as E or F - Either or both may be single sided. Configuration is determined by MOVCPM.	Dualmode	MOVCPMP	No
Q	10.5K	5032	Same as above.	Dualmode	MOVCPMQ	Yes
R	8.75K	SB	Micropolis only, using Dualmode controller; For B5 upgrades.	Dualmode	MOVCPMR	No
S	9.5K	SB	Seagate hard drive as A; Micropolis floppy's as B & C; For B5 upgrades.	Dualmode	MOVCPMS	No
T	9.5K	SB	Seagate hard drive as A & B; Micropolis floppy's as C & D; For B5 upgrades.	Dualmode	MOVCPMT	No
