# CORELDRAW! on CD-ROM

Thank you for purchasing CorelDRAW on CD-ROM.

The enormous amount of information that can be stored on this unique media allows us to provide you with an embellished version of CorelDRAW. On examining the contents of your CD-ROM disk, you will find the following:

- ☞ CorelDRAW 2.5, designed to run in the OS/2 2.X environment under PM
- ☞ Two major new programs: CorelCHART, a powerful charting and graphing application and CorelPHOTO-PAINT, a versatile painting and photo-retouching program
- ☞ Three utilities that operate in conjunction with CorelDRAW, including: CorelTRACE, the WFN Boss Font Converter and CorelMOSAIC
- ☞ Thousands of new clipart images (in addition to the image library supplied with the program as distributed on floppy disk). These drawings are supplied in CDR format and feature:
  - Samples from some of the best manufacturers in the business, such as Totem Graphics, One Mile Up, TechPool Studios, Image Club Graphics, MicroMaps Software and many more ...
  - An extensive collection of high-quality images and clipcharts from Corel
- ☞ Over 50 new typestyles (in addition to the 153 supplied with the program as distributed on floppy disk). These new typestyles are provided in both WFN and PFB formats
- ☞ An online Help file for CorelDRAW, which you can open as a standalone program item. This file was crafted for the Windows version of CorelDRAW, but references to Windows may generally be read as PM.

# Documentation

Please note the following important information concerning the documentation you have received as part of this kit. The main User's Manual is the same one shipped with the Windows version of CorelDRAW. References to Windows may generally be read as PM. The Technical Reference guide and the READ THIS FIRST sheet are specific to the OS/2 environment and should be consulted for installation and other operational procedures.

# QuickStart

You should refer to the CorelDRAW Technical Reference before commencing with the installation, especially if you're upgrading from a previous version of the program. Briefly, the installation procedure is as follows:

- Insert Floppy Disk 1 into the appropriate disk drive or, if you're installing from the CD-ROM, insert the disk into your CD-ROM drive.
- Double-click on the appropriate drive icon.
- Double-click on the Balloon icon (SETUP.EXE).
- Follow the instructions on the screen. Note that the installation procedure will not let you install into an existing directory. This must be a new directory.
- After the installation is complete, you must shut down Presentation Manager and reboot your computer in order for the changes to register on your system.

To run CorelDRAW or any of the related programs after installation, click on the appropriate icon in the CorelDRAW 2.5 group.
