

**Supplemental License Information for:**  
**IBM DB2 Information Integrator Classic Federation for z/OS Connector**  
**Or IBM DB2 Information Integrator Event Publisher**

If you have purchased a license for IBM DB2 Information Integrator Classic Federation for z/OS Connector or IBM DB2 Information Integrator Event Publisher ("IBM Product") from Business Objects, then the following supplemental terms and conditions apply to your use of the IBM Product:

Unless otherwise agreed in writing between you and Business Objects, you may install and use the IBM Product on only one (1) Logical Partition ("LPAR") and only with data from one (1) specific data source (a "data source" is a database or data container, such as VSAM, DB2, etc., that is designated in your written license or order documentation). In addition, you may use the IBM Product only in conjunction with your use of the Data Integrator product licensed to you by Business Objects. Except as stated herein, all other terms and conditions of the license agreement for the Data Integrator product between you and Business Objects remain in effect and apply to your use of the IBM Product.
