PRICE INCREASE FOR CPU BOARD

An additional $30 is required for producing the HPMCIG's CPU board (this is not including the $45 originally collected approximately 1 year ago). The price of the bare board is approximately $47 ($2 over the original estimate). The cost of the IC's will account for the remainder of the total price.

Volunteers are needed to stuff the CPU board starting in mid November. Work generally starts about 4:30 pm on Thursday afternoons in 5L PC area and continues every Thursday thereafter until the boards are done. Contact Barry Lewis (x2601) to help. It's a great way to meet club members and help the club at the same time.

(408) 263-7500

Make checks payable to HP Micro Computer Interest Group or HPMCIG.

Send this form with check to Barry Lewis, Bldg. 90 by November 5.
