Problem

It has been found that a problem can occur in Finish Good Maintenance which causes the machine to lock up when updating the files if more than 300 raw materials are in the finished good.

Solution

The problem is corrected by following the steps listed below.

1. Backup the diskette(s) and make the changes on the Backup copy of the program.
2. In BASIC load the program by typing LOAD"FGMAINT"
3. Make the following corrections:
