### Problem

On page 9 of the manual there are two command errors.

### Solution

1. OUTP Command. Manual says `OUTP(A,X)` outputs "A" to port "X". This should be transposed, it should read; `OUTPUTS "X" to port "A"`.
2. SQR Command. Manual says that this is a square root function. Not so, this is a square function so that `SQR(4)` Returns 16 not 2.
