| **Date** | February 5, 1983 |
| **Page 1 of** | 1 |

## Problem

When OPENing a sequential file with the EXTEND phrase under LDOS, it is possible to receive an ERROR 94 on a file that has been previously opened, written to, and closed.

* *   THE FOLLOWING PATCHES ARE REQUIRED!   * *

## Solution

At LDOS READY, apply the following patches:

PATCH RUNCOBOL/CMD(X'522F'=CD 48 44 C8 FE 1C CØ AF C9)
PATCH RUNCOBOL/CMD(X'9A4Ø'=2F 52)

All previous patches to RUNCOBOL must be applied before patching and running under LDOS.
