Problem

Corrections for known bugs in the initial release of SCRIPSIT 2.Ø

Solution

The initial release of 2.Ø SCRIPSIT has the following known bugs:

1. Sheet feeder error never gets reset.
2. Cosmetic problem in user key execution of define text block.
3. Intermittent problem in D option in save/recall format line.
4. Exciting from an printer error in Merge hangs system.
5. The following patches will correct these errors.

```
PATCH SCRIPSIT A=D6FØ F=ØØØØØØØØØØØØØØØØØ C=AF32Ø3DB3AFDDAC9

PATCH SCRIPSIT/SYS A=E4ØE F=AAAAAAAAAAAAAAAAAAA C=B1BØAFB1B6AFB1B9B8B1
```

When these patches have been made, the Scripsit initialization screen will show the date 1Ø/16/1981 at the bottom. After the first 1ØØØ or so, the disks had these patches made at the factory. So, if the date is visable, no patches need to be made.
