Date	May 28, 1982
Page 1 of	1

Problem

RM Cobol does not have the capability to detect crashed indices. The following patches should be applied immediately so as to notify the user of a crashed index so that at that point he/she can go to a back-up and re-key the data in. Once these patches have been implemented, an error code will occur upon loss of integrity of data (crashed index).

Solution

At TRSDOS READY, apply the following patches to correct the above problem.

```
PATCH RUNCOBOL A=761D F=3014FD7071FD717021 C=D021250019EB3E2CCF
PATCH RUNCOBOL A=7626 F=250019EB3E2CCF2804 C=2007FD7071FD7170C9
PATCH RUNCOBOL A=6E90 F=98 C=34
```
